Title	The Convention refugee determination process in Canada
Author, Place of publication, Publisher, Date of publication, Pagination	by M. Young. Ottawa : Library of Parliament, Research Branch, 1987. 13 p. Bibliogr. (Current issues review ; 86-26E) <i>French ed. (La reconnaissance au Canada . . .) on the same fiche.</i>
Series statement	ISBN 0-660-12567-6 MICROLOG 88-00800 1 fiche
Notes	
ISBN	
Microfiche	
Accession Number	
Abstract	The increase of refugee status claiming immigrants in Canada has led to a review of the immigration policy concerning this group. This report looks at the weaknesses of current legislation which is linked to the Geneva Convention and its Protocol, studying Canada's past adherence to the rights afforded under its protection. Also discusses public and government opinion on support for a humanitarian and generous refugee policy and questions of balancing efficiency with procedural fairness to claimants. Gives a chronology of events since 1969.

Numéro d'ordre de la microfiche	
Résumé	Le processus de reconnaissance du statut de réfugié au sens de la Convention de Genève, tel qu'il est énoncé dans la Loi sur l'immigration, sert à déterminer si les personnes qui revendiquent ce statut y ont effectivement droit et peuvent bénéficier de la protection accordée aux réfugiés au sens de la Convention. Ce processus s'est avéré inadéquat, tant au point de vue juridique que pratique. Dans ce bulletin, on examine les mécanismes en vigueur actuellement et le projet de réforme contenu dans la loi C-55 déposé en mai 1987.

INTRODUCTION

Microlog: Canadian Research Index puts all of Canada's hard-to-find government and research literature at your fingertips. This monthly indexing, abstracting and document delivery service covers all levels of government in Canada, as well as institutions receiving research grants. Most titles included in **Microlog** are available in either paper or microfiche format. Combined with a microfiche collection, the **Microlog Service** is a powerful tool for finding Canadian report publications. The unique **Microlog Accession Number** is the key to immediate retrieval of any document.

SCOPE

Among other documents, **Microlog** includes research papers in physical, natural and social sciences, policy papers, important statistics, and annual reports. Every effort is made to ensure the currency of the index. For instance, documents appearing in the Checklist of Canadian Government Publications are delivered by **Microlog** approximately two months after publication of the list.

LANGUAGE POLICY

Documents issued in English or French are indexed and abstracted in the language of publication, while bilingual documents are indexed and abstracted in both languages.

SOURCES AND COVERAGE

Federal Documents: The **Microlog** editors review all checklists issued by the Canadian Government Publishing Centre and order every document relevant to the service. Except for serials, maps, pamphlets, and manuals, all monographs covered by the Federal Depository Plan are included in the index. Also, a special effort is made to track down elusive but important titles which do not appear in the lists.

Microlog offers a special collection of documents published by the Federal Government but not issued through the Federal Depository Plan. These titles, available to subscribers as the Non-Depository Publications collection, are indicated in the Titles section by a bullet (•). **Microlog** is also the direct distributing agent for many government bodies.

Provincial Documents: Depository arrangements with several provincial libraries have been established to ensure that **Microlog** subscribers receive all publications from those provinces. Where no depository arrangement exists, all publications lists issued by the province are reviewed for acquisitions.

Municipal Documents: Since these titles are very difficult to obtain, the **Microlog** editors make special efforts to include publications from municipal sources.

ACCESS

The Index provides access by subject, corporate or individual author, and series title.

The full **Microlog** file from 1979 to date, consisting of almost 50,000 records, is available online through Can/OLE. This is an ideal way to locate hard-to-find reports which may then be ordered directly online through the Can/DOCS service. Contact: Can/OLE Client Services, CISTI, Ottawa, Ontario, K1A 0S2.

FEATURES

Microlog comprises the following sections:

1. **Titles and abstracts:** A full bibliographic citation and a descriptive abstract for each title.
2. **Name Index:** Access by personal author, corporate author, and conference name.
3. **Series Titles:** Lists by title and number all reports in series in the service; series are available as an ongoing subscription or retrospective collection.
4. **Subject Index:** Descriptors based on Library of Congress and Canadiana Subject Headings are assigned to each document. A cross-referencing structure assists searchers.
5. **Microfiche collections:** Lists contents of each fiche collection for quick reference. These collections can be used as current awareness lists in broad subject areas to notify users of new acquisitions. This section is included in the annual cumulation as a separate fished product.

MICROLOG AND CANADIAN STATISTICS INDEX

Statistical Material: The **Canadian Statistics Index (CSI)** provides further access to statistical material contained in **Microlog** monographs and special or annual reports. The CSI identification number has been included with the **Microlog** citation for the convenience of subscribers to the CSI fiche collection.

Annual Reports: Storage of annual reports in a single sequence has been a problem for clients in the past. The CSI numbers for annual reports are now listed in the bibliographic citation and appear on the microfiche header of each report, to make such sequencing possible.

DOCUMENT DELIVERY

Institutions may subscribe to complete or partial collections of the documents in **Microlog**. Individual copies on microfiche or paper reprint may be ordered through Micromedia's Document Delivery Service. To order, please contact:

INTRODUCTION

Microlog: Index de recherche du Canada met à votre disposition toutes les publications du gouvernement et les travaux de recherche difficiles à se procurer. Combiné aux collections sur microfiches, le service **Microlog** constitue un outil très efficace pour retrouver les publications des différents gouvernements du Canada, ainsi que celles des organismes qui reçoivent des subventions pour la recherche. **Microlog** est aussi un service de livraison de documents, sur microfiches ou sous forme imprimée.

CONTENU

Microlog contient entre autres des recherches en sciences physiques, naturelles et sociales, des énoncés de politique, des statistiques et des rapports annuels. Par l'intermédiaire du service **Microlog**, on peut obtenir les documents qui figurent sur la Liste des publications du gouvernement du Canada environ deux mois après leur parution sur cette liste.

POLITIQUE LINGUISTIQUE

Les ouvrages publiés en français ou en anglais sont indexés et résumés dans la langue de publication; les ouvrages bilingues sont traités dans les deux langues.

SOURCES

Publications fédérales: Les rédacteurs de **Microlog** examinent les listes émises par le Centre d'édition du gouvernement du Canada et commandent les documents pertinents. En dehors des publications en série, cartes, brochures et manuels, toutes les monographies régies par le Programme de dépôt du gouvernement fédéral figurent dans l'index, ainsi que des ouvrages importants ne figurant pas sur les listes.

Microlog propose aussi une collection spéciale de publications fédérales non déposées, identifiées par un point (●) dans la section Titres et résumés. **Microlog** est aussi l'agent de diffusion de nombreux organismes gouvernementaux.

Publications provinciales: Des ententes de dépôt ont été conclues avec plusieurs bibliothèques provinciales pour que les abonnés de **Microlog** reçoivent toutes les publications de ces provinces. Lorsqu'aucune entente n'existe, les listes de publications émises par les provinces sont examinées afin d'acquiescer les documents.

Publications municipales: Ces ouvrages étant difficiles à se procurer, les rédacteurs de **Microlog** redoublent d'ardeur pour les inclure dans l'index.

ACCÈS

L'index imprimé est bilingue et les publications sont répertoriées par sujet, par auteur (collectivité et personne physique) et par titre de collection.

Le fichier complet de **Microlog**, de 1979 à aujourd'hui, contient près de 50,000 notices et est accessible sur

Can/OLE. Il s'agit d'un moyen idéal pour mettre la main sur des rapports difficiles à trouver qu'on peut commander par l'intermédiaire du service Can/DOCS. À ce propos, veuillez vous adresser au Service à la clientèle Can/OLE, ICIST, Ottawa (Ontario), K1A 0S2.

ORGANISATION DE L'INDEX

Microlog est divisé en cinq sections:

1. Titres et résumés: tous les titres sont catalogués et accompagnés d'un résumé descriptif.
2. Index des noms: donne un accès par auteur, collectivité-auteur et titre de conférence.
3. Titres de collections: tous les rapports publiés en série sont classés par titre et numéro. Ces collections peuvent être commandées individuellement.
4. Index des matières: les descripteurs permettent de trouver facilement les publications pertinentes; un réseau de renvois facilite la recherche.
5. Collections de microfiches: chaque collection apparaît dans une section séparée pour faciliter la recherche. Ces listes peuvent aussi servir à renseigner les usagers sur les nouveautés. Dans la refonte, cette section est insérée sous forme de microfiches.

MICROLOG ET L'INDEX DES STATISTIQUES DU CANADA

Données statistiques: L'Index des statistiques du Canada (CSI) constitue une autre source de référence sur les statistiques contenues dans certaines publications indexées dans **Microlog**. Celles-ci ont un numéro d'ordre spécial qui est inclus dans la référence bibliographique.

Rapports annuels: Afin de rendre le classement des rapports annuels plus facile, le numéro d'ordre CSI correspondant à ces documents figure maintenant dans les références bibliographiques et est inscrit sur les en-têtes de microfiches.

LIVRAISON DE DOCUMENTS

On peut s'abonner à l'ensemble ou à certaines des collections de documents de **Microlog**. On peut également commander des reproductions de documents sur microfiches ou sur papier par l'intermédiaire du service de livraison de documents de Micromedia. Pour commander, communiquer avec:

Micromedia Ltée

240 rue Catherine, Ste 305
Ottawa, ON K2P 2G8

Sample CRI Search

*"How can a person from a foreign country
qualify for refugee status in Canada?"*

The researcher can search in CRI as in any library catalogue - by subject, author and title.
Because the index is bilingual, searching can be done in English or in French.

Recherche type avec IRC

*"Comment une personne d'un pays étranger
peut-elle demander le statut de réfugié au Canada?"*

La méthode de recherche dans IRC est la même que dans une bibliothèque, puisque les documents sont indexés par auteur, par sujet et par titre. L'index étant bilingue, la consultation peut se faire en français ou en anglais.

STEP 2/DEUXIÈME ÉTAPE

A unified search strategy

The search strategy should include all the monthly issues. Start with the most recent issue and work back. Monthly issues are cumulated annually.

Établir une stratégie de recherche unifiée

La stratégie de recherche doit tenir compte de toutes les publications mensuelles, à commencer par les plus récentes. Chaque année, ces publications font l'objet d'une refonte.

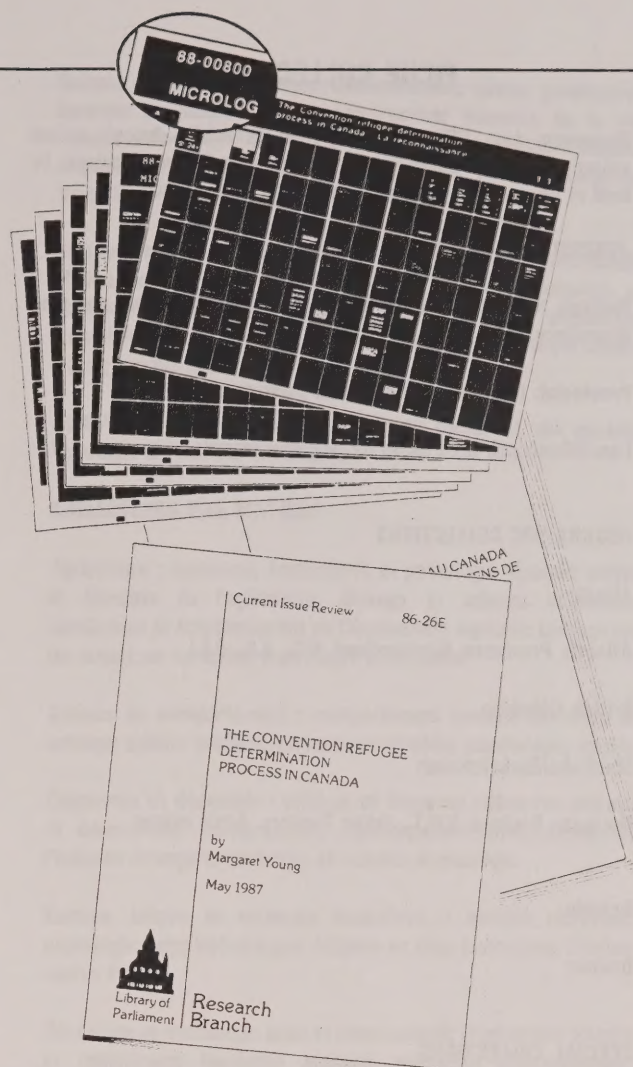

STEP 3/TROISIÈME ÉTAPE

Retrieve the publication

Each bibliographic citation gives a full description of the relevant document. Locate the document by the microfiche number in the library's collection or order from Micromedia. Individual publications are available for purchase on microfiche or paper. The bibliographic description provides publisher source information.

Repérer la publication

Chaque notice bibliographique comprend une description complète du document; celui-ci peut être repéré grâce au numéro de microfiche de la bibliothèque; sinon, il faut le commander à Micromedia. On peut se procurer les monographies sur microfiches ou sur papier. La description bibliographique comporte également des indications sur l'éditeur.

FICHE COLLECTIONS

Documents from CRI are available on microfiche through various subscription plans ranging from the complete collection to subsets by level of government (jurisdiction), geographic area, or subject.

JURISDICTION COLLECTIONS

Federal: titles issued at the federal level, both depository and non-depository

Provincial: titles issued by provincial governments

Local/Municipal: titles issued by local governments

GEOGRAPHIC COLLECTIONS

Alberta

Atlantic Provinces: Newfoundland, N.S., N.B., P.E.I.

British Columbia

Manitoba/Saskatchewan

Northern Regions: N.W.T., Yukon Territory, Arctic regions

Ontario

Quebec

SPECIAL COLLECTIONS

Critical issues: documents from Canadian jurisdictions on issues that receive public attention and are the subject of debate

Fisheries and Oceans Canada: documents published by the Dept. of Fisheries and Oceans

Canada Centre for Mineral and Energy Technology (CANMET): documents published or contracted out by the Centre

Depository Collection: documents published by the federal government issued through the Federal Depository Program

FEARO: documents published by the Canadian Environmental Assessment Research Council (CEARC) and/or the Federal Environmental Assessment Research Office (FEARO)

Non-Depository Collection: documents published by the federal government, not issued through the Federal Depository Program. Available as a complete collection or as a science or social science sub-collection

ONTERIS (ON COLLECTION): ONTERIS documents for which we have microfilming rights and which meet our inclusion policy

COLLECTIONS DE MICROFICHES

Les publications incluses dans l'IRC sont en vente sur microfiches, en collection complète ou en collections plus petites regroupant des titres par juridiction, par aire géographique ou par matière.

COLLECTIONS GOUVERNEMENTALES

Fédéral : publications émises par le gouvernement fédéral, régies ou non par le Programme de dépôt

Provincial : publications émises par les gouvernements provinciaux.

Local/Municipal : publications émises par les gouvernements locaux et municipaux

COLLECTIONS GÉOGRAPHIQUES

Alberta

Provinces de l'Atlantique : T.-N., N.-É., N.-B., Ile-du-Prince-Édouard

Colombie-Britannique

Manitoba et Saskatchewan

Régions du nord : Territoires du Nord-Ouest, Yukon, régions arctiques

Ontario

Québec

COLLECTIONS PARTICULIÈRES

Sujets d'actualité : documents publiés au Canada et portant sur des questions d'intérêt public et des sujets de débat

Pêches et Océans Canada : documents publiés par le Département des pêches et océans

Centre canadien de la technologie des Minéraux et de l'énergie (CANMET) : documents publiés ou commandés par le Centre

Programme de dépôt : documents publiés par le gouvernement fédéral régis par le Programme de dépôt

BFEE : documents publiés par le Conseil canadien de recherche sur les évaluations environnementales (CCREE) et/ou le Bureau fédéral d'examen des évaluations environnementales (BFEE)

Collection non déposée : documents publiés par le gouvernement fédéral, non régis par le Programme de dépôt, disponible en collection complète ou en sous-collection Scientifique ou Sciences humaines.

ONTERIS (COLLECTION ON) : documents d'ONTERIS pour lesquels nous avons les droits de microfilmage et qui satisfont à nos politiques d'inclusion

Science: agriculture; energy; environment; fisheries; forestry; life sciences; natural resources, earth sciences and mining; physical sciences; planning, housing and construction industry; technology; telecommunications; transportation

Social sciences: behavioural sciences; commerce and economics; culture, recreation and humanities; education; external affairs; health and medical care; justice and law; labour; native peoples; public administration; public works; social affairs

Statistics: statistical documents or documents containing a significant amount of statistical data

SUBJECT COLLECTIONS

Agriculture: agricultural chemistry and economics; agricultural equipment facilities and operations; agricultural resource surveys; agronomy, horticulture and plant pathology; animal husbandry and veterinary medicine; food technology

Behavioural sciences: abuse; human behaviour; psychology; public opinion; suicide; survey methods

Commerce and Economics: banking and finance; consumer affairs; domestic and international commerce, marketing and economics; foreign industry development and economics

Culture, Recreation and Humanities: archaeology; arts; history and historic sites; libraries; lotteries; recreational activities; sports; theatre

Education: community and school; educational legislation; educational research; issues related to school-aged children; learning; school and university funding; teacher collective bargaining and pension funds; teaching methods

Energy: batteries and components; electric power production; fuel conversion processes; fuels; geothermal energy; heating and cooling systems; policies and regulations; resources; solar energy; supply and demand; transmission

Environment: environmental assessment reports; environmental health and safety; environmental policy; pollution and control of air, noise, solid wastes, water, pesticides and radiation

External Affairs: disarmament and arms control; foreign affairs and policy; foreign aid; international relations and trade

Fisheries: aquaculture; commercial fishing, fishing equipment and processing of fishery products; fish biology and habitat; fishing boat accidents; laws related to fisheries; sport fishing

Forestry: afforestation and reforestation; forest ecology; forest fires and prevention; forest products; logging; pulp and paper industry; wood trade

SC Science : agriculture; énergie; environnement; pêche; planification logement et industrie de la construction; sciences de la vie ressources naturelles, sciences de la Terre et exploitation minière sciences physiques; sylviculture; technologie; télécommunications; transport

SS Sciences sociales : administration publique; affaires extérieures affaires sociales commerce et économie; culture, récréation e sciences humaines; éducation; justice et droit; population; autochtones; santé et soins médicaux; science du comportement travail; travaux publics

ST Statistiques : documents statistiques ou contenant une quantité importante de données statistiques

COLLECTIONS PAR MATIÈRE

AG Agriculture : agronomie, horticulture et pathologie végétale; chimie et économie de l'agriculture; élevage et science vétérinaire; installations et fonctionnement de l'équipement agricole; sondage sur les ressources agricoles; technologie alimentaire

BS Science du comportement : comportement humain; méthodes de sondage; opinion publique; personne maltraitée; psychologie; suicide

CO Commerce et économie : affaires et finances; commerce national et international; consommation; développement et économie de l'industrie étrangère; marketing et science économique

CU Culture, loisirs et sciences humaines : activité récréative; archéologie; arts; bibliothèques; histoire et sites historiques; loteries; sports; théâtre

ED Éducation: apprentissage; école et communauté; financement scolaire et universitaire; législation scolaire; méthodes d'enseignement; négociation collective et fonds de pension de l'enseignant; questions concernant les enfants d'âge scolaire; recherche en éducation

EN Énergie : combustible; énergie géothermique; énergie solaire; offre et demande; piles et composantes; procédés de conversion du combustible; politiques et règlements; production d'électricité; ressources; systèmes de chauffage et de refroidissement; transmission

EV Environnement : contrôle et pollution (air, bruit, déchets solides, eau, pesticides et radiation); politique environnementale; rapports d'évaluation environnementaux; santé et sécurité de l'environnement

EX Affaires extérieures : aide étrangère; commerce international désarmement et contrôle des armes; relations et politiques étrangères; relations internationales

FI Pêche : accidents de bateaux de pêche; aquiculture; biologie et habitat du poisson; loi concernant la pêche; pêche commerciale, équipement de pêche et transformation des produits de la pêche; pêche sportive

FO Forêts et sylviculture : écologie forestière; exploitation des forêts; feux de forêts et prévention des feux de forêts; industrie des pâtes et papiers; menuiserie; produits forestiers; reboisement

Health and medical care: health care assessment and quality assurance; health care utilization; health-related cost; health services; public health and industrial medicine; technology; vital statistics	HE	Santé et soins médicaux : assurance de la qualité et évaluation des soins médicaux; coûts reliés à la santé; exploitation des soins médicaux; santé publique et médecine industrielle; services médicaux; statistiques démographiques; technologie
Justice and law: coroner; corrections; courts; crime; human and civil rights; law reform; ombudsman; police activities	JU	Justice et droit : activités policières; coroner; correction; cour; droits civiques et de la personne; Ombudsman; réforme de la loi
Labour: arbitration and collective bargaining; job training and career development; personnel management, industrial relations and manpower studies; productivity; salary administration; unemployment	LA	Travail : arbitrage et négociation collective; chômage; études sur la gestion du personnel, les relations industrielles et la main-d'œuvre; formation à l'emploi et évolution de carrière; productivité; salaires
Life sciences: anatomy; biology; botany; ecology; genetics; medicine; nutrition; pathology; physiology; zoology	LS	Sciences de la vie : anatomie; biologie; botanie; écologie; génétique; médecine; nutrition; pathologie; psychologie; zoologie
Native peoples: documents published about Canada's native peoples, or about issues involving them	NP	Populations autochtones : documents publiés sur les peuples autochtones du Canada, ou sur des questions connexes
Natural resources, earth sciences and mining: cartography; geology and geophysics; hydrology and limnology; mineral industries; natural resource management; natural resource surveys; oceanography; snow, ice and permafrost; soil sciences	NR	Ressources naturelles, sciences de la Terre et mines : cartographie; géologie et géophysique; gestion des ressources naturelles; hydrologie et limnologie; industries minérales; neige, glace et permafrost; océanographie; sondages sur les ressources naturelles

The 1994 British Columbia seafood industry : year in review

Victoria : Ministry of Agriculture, Fisheries & Food, 1995. 8 p. : ill.
MICROLOG 96-00338 (1 fiche)

This document gives highlights of the seafood industry; data on seafood production for the last two years by type; and detailed data for wild salmon, sockeye salmon, canned and pink salmon, farmed salmon, herring, halibut, groundfish, hake, shellfish and marine plants. It also describes initiatives undertaken for the future, including the fish processing strategic task force, underutilized species development, and coastal community development.

Acoustic emission tank car test method review and evaluation

Prepared for Transportation Development Centre, Policy & Coordination Group, Transport Canada ; by S.L. McBride. Kingston, ON : Queen's University, Canadian Institute of Guided Ground Transport, 1994. 2 v. : ill., Bibl. (CIGGT report / Canadian Institute of Guided Ground Transport ; no. 93-6) Contents: Vol. 1 : Final report -- vol. 2 : Appendices.
MICROLOG 96-00438 (4 fiche)

This report critically reviews the Association of American Railroads (AAR) procedure for acoustic testing of railroad tank cars. The AAR procedure is required as a component of the Transport Canada

assessment of the efficacy of Canadian adoption of acoustic emission testing of the integrity of tank cars. The review pays particular attention to the validity of load hold testing as it is implemented in the AAR procedure. The investigation included determination of the number and size of acoustic emissions resulting from fatigue crack growth during constant-amplitude cyclic loading, and examination of the effect of load history on acoustic emission test results for material subjected to variable amplitude loading. The report highlights circumstances which could result in missed defects even when the AAR procedure is followed, and proposes changes in the procedures which could lead to improved detectability of defects.

Adaptive applications for microprocessor based distribution and transformer protection systems

By Daniel L. Aronson and Greg Payne. Montreal : Canadian Electrical Assn, Protection, Control & Substations Committee, 1995. 20 p. : ill. Presented at Electricity '95.
MICROLOG 96-00168 (1 fiche)

This paper describes a protection, control, metering, monitoring, and communications system, utilizing multiple microprocessors, for electric power distribution systems. The system has a common hardware platform used for a multifunction distribution relay that provides radial feeder protection and bus protection, and a multifunction transformer relay that provides transformer differential protection and bus protection. The paper explains the system's calculation processes, fault location and oscillographic data storage capabilities, overcurrent functions, voltage control and alarm functions, high-speed phase and ground protection functions for two-winding power transformers, and protection schemes. It also gives information on the system's time overcurrent characteristics, reclosing and breaker failure logic, communications interfaces, alarm and control functions, and self-testing capability.

Adaptive relaying for ground fault protection of a distribution network

By M.S. Sachdev, T.S. Sidhu and B.K. Talukdar. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operating Section, Power System Protection Sub-section, 1995. 13 p. : ill., Bibl. Presented at Electricity '95.
MICROLOG 96-00123 (1 fiche)

With the advent of digital technology and microprocessor-based relays, it is possible to continuously monitor a power network, analyze it in real time, and change the relay settings to those most suitable at that time, thereby achieving improved protection of the network. This approach, known as adaptive relaying, was applied to the Saskatoon distribution network. This paper describes the software modules developed for setting ground fault overcurrent relays in the adaptive relay protection system. The major task in this system was the on-line coordination of relays, as most faults in a distribution

system are of the single-phase to ground type and current unbalance due to single-phase loading contributes to the complexity of relay coordination. The modules served for network topology detection, state estimation, fault analysis, and relay setting and coordination. The paper also presents results of a study of the proposed adaptive ground fault protection scheme using a model distribution network.

Advanced performance semiconducting shields for medium voltage power distribution cables

By C.L. Flenniken. Montreal : Canadian Electrical Assn, Distribution Section, Underground Equipment & Design Committee, 1995. 9 p. : ill., Bibl. Presented at *Electricity '95*.

MICROLOG 96-00169 (1 fiche)

Many studies suggest direct correlation between chemical cleanliness and cable life. Metal ions are often found within water trees in cables, and these ions are believed to have migrated from the cable shields, such as from contaminants in the carbon. It has been proposed that improvements in carbon black cleanliness have resulted in reduced propensity for water treeing. This paper presents results of a study in which several carbon blacks (conventional to extraclean) were compounded into semiconductive formulations which were then evaluated for ionic content, degree of dispersion (smoothness), and water treeing propensity. Results presented include water tree counts from field cell studies at 7,000 hours and the degree of correlation of treeing severity with the smoothness of the carbon black compounds.

MICROLOG 96-00317 (2 fiche)

Adventure travel is the fastest growing sector of the North American tourism industry, and offers a significant opportunity for the Canadian tourism industry. This study sets out to create an inventory of adventure travel operations in Canada, describe the current state of the adventure travel sector, evaluate primary target markets, identify key factors and issues affecting the evolution of the adventure travel sector, evaluate the Canadian adventure travel industry's performance and competition, identify trends and business practices, and offer recommendations for increasing efficiency, productivity, and competitiveness. The study methodology included a tour operator survey and collection of data from secondary sources. The scope of adventure travel is considered to include most outdoor activities such as wildlife viewing, canoeing, hiking, and cross country skiing, but excluding hunting, fishing, and sports. Relevant statistics on adventure travel are included.

Aeroderivative advancement for power generation : evolution of the Trent EconoPac system

By R.D. Buxton, R.J. Thoman and W.K. Howard. Montreal : Canadian Electrical Assn, 1995. 11 p. : ill. Presented at *Electricity '95*.

MICROLOG 96-00100 (1 fiche)

The Trent 800 aircraft engine evolved from the Rolls-Royce RB211 engine. The industrial version of this engine differs from the aircraft version in three major areas: a two-stage compressor replaces the bypass fan, the combustion system is designed to achieve low emissions of nitrogen oxides and carbon monoxide, and the low-pressure turbine stages are modified to allow direct drive to a generator. The industrial Trent engine is incorporated into the Trent EconoPac, a 51-megawatt packaged power system with a 42% simple-cycle efficiency. The EconoPac includes engine, generator, enclosures, standard accessories, instrumentation, controls, and electrical equipment. This paper describes the evolution of the Trent engine and the EconoPac design, and reviews the status of the EconoPac development program, including results of testing and performance.

Aircraft ground de/anti-icing fluid holdover time field testing program for the 1992-93 winter

Prepared for Transportation Development Centre, Policy and Coordination, Transport Canada ; by APS Aviation Inc. Montreal : The Corporation, 1993. xxvii, 183 p. : *Ill.*
MICROLOG 96-00442 (3 fiche)

This study was undertaken to manage, conduct and analyze holdover time tests used to assess the time effectiveness of commercially produced de/anti-icing fluids. Tests included a snow test, a simulated freezing fog and drizzle test, and under artificial snow conditions. Testing consisted of pouring de/anti-icing fluids onto clean, inclined flat aluminum plates, exposing them to various winter precipitation conditions, and recording the elapsed time before the snow was no longer being absorbed or accommodated by the fluid. Variables

measured included total precipitation, failure time, temperature, humidity, wind speed and direction, fluid thickness, type of fluid and type of precipitation. This report presents methodology, a description of data, a meteorological analysis and other analyses, recommendations on future testing, procedures and an equipment list, and results.

Alternative dispute resolution mechanisms in human rights commissions and analogous institutions in Australia, the United Kingdom, the United States, and Canada

The Human Rights Research and Education Centre ; Errol Mendes, Karen L. Rudner, Patrice Jourdain. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1994. vi, 73 p. : Bibl. (Technical report / Canada. Dept. of Justice. Research Section ; TR1994-12e)
MICROLOG 96-00381 (1 fiche)

The purpose of this report is to identify and review how human rights institutions in Canada and three other countries apply alternative dispute resolution (ADR) mechanisms to human rights complaints. ADR, in the context of this report, can be defined as any form of settlement or resolution process which is used as an alternative to adjudicating the dispute at a formal board/tribunal hearing or proceeding by means of a court action. For Australia and the United States, the report reviews human rights institutions at both the federal and state/jurisdictional levels. Institutions reviewed for the United Kingdom include those covering race discrimination, sex discrimination, fair employment, and equal opportunity. Canadian institutions reviewed include the Canadian Human Rights Commission, seven provincial commissions, and one territorial commission.

AMADIFF, a FORTRAN routine for irregular-frequency-free calculation of added mass and damping of two-dimensional floating bodies by the extended boundary condition method

By Samon Ando. Dartmouth, NS : National Defence, Research & Development Branch, Defence Research Establishment Atlantic, 1995. vi, 22 p. : ill., Bibl. (DREA technical memorandum / Defence Research Establishment Atlantic ; 95/213)
MICROLOG 96-00712 (1 fiche)

Research on environmental loads is being conducted to help naval architects better exploit modern structural analysis techniques. Most computer codes for predicting environmental loads have a common problem, the existence of irregular frequencies, or wave encounter frequencies at which ship motions or environmental loads cannot be predicted because the underlying solution method breaks down at these frequencies. This memorandum describes the development and testing of a method called AMADIFF (Added Mass And Damping; Irregular Frequency Free), which calculates added mass and damping of two-dimensional cylinders floating in the free surface of deep water by the integral equation method using the exact Green function. The extended boundary condition (or lid) method, in which source is distributed along the waterline inside the cylinder as well as on the cylinder's wetted surface, is used to suppress irregular frequency. AMADIFF is suitable for implementation in two-dimensional seakeeping codes.

Analyse des cas de gonorrhée, de chlamydiae, d'infection par le virus de l'hépatite B et de syphilis déclarés au Québec par année civile, 1990-92

Par Raymond Parent et Michel Alary. Québec : Gouvernement du Québec, Ministère de la santé et des services sociaux, Centre de coordination sur la sida, 1994. 132 p. : ill. ISBN 2-550-29764-4
MICROLOG 96-00013 (2 fiche)

Le Québec s'est doté depuis maintenant déjà quelques années d'un système informatique centralisé quant à l'enregistrement des cas de maladies dont la déclaration est légalement obligatoire. Chaque région socio-sanitaire de la province est électroniquement reliée à l'ordinateur central. Ce système simplifie l'agrégation des données au plan provincial tout en fournissant un outil standard à

chacune des régions. Le système a été mis en place grâce à la collaboration de certains DSC lors d'une phase pilote d'implantation en 1989 et a été étendu à tout le territoire québécois en 1990. Ce document présente les résultats de l'analyse des cas de gonorrhée, de chlamydiae, d'infection par le virus de l'hépatite B et de syphilis déclarés au Québec par année civile de 1990 à 1992.

Analyses of Royal Canadian Mounted Police data, CPIC/FPS Identification Data Bank : assault causing bodily harm, assault with a weapon

By Sherilyn A. Palmer. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1994. xii, 47 p. : ill., Bibl. (Technical report / Canada. Dept. of Justice. Research Section ; TR1994-8e)
MICROLOG 96-00385 (1 fiche)

The Royal Canadian Mounted Police operates and maintains a Finger Print Service (FPS) through its Canadian Police Information Centre (CPIC). The CPIC/FPS data banks include an Identification Data Bank which contains two files, the Criminal Record Synopsis and the Criminal Record Level II. The Level II file is national in scope and currently accommodates about 2.7 million criminal records, providing a significant resource for statistical studies. This report presents results of a study of selected Level II data concerning convictions for assaults. The purpose of the study was to determine the type and length of dispositions handed down by the courts for three offenses (all for adult offenders): assault with a weapon, assault causing bodily harm, and uttering threats. Whenever possible, the results are compared to those of a 1993 study conducted by the Canadian Centre for Justice Statistics that focused on 65 high-volume offenses.

Analysis of variable speed drive (VSD) nuisance tripping due to capacitor switching using EMT

By I.A. EL-Nahas and E.J. Tarasiewicz. Montreal : Canadian Electrical Assn, 1995. 12 p. : ill., Bibl. Presented at *Electricity '95*.
MICROLOG 96-00112 (1 fiche)

Ontario Hydro received complaints from an industrial customer regarding periodic overvoltages that resulted in interruption of their variable speed drives (VSDs). The timing of these events was suspected to coincide with the switching of substation capacitor banks, and transient voltage recordings

suggested the presence of magnified capacitor transients. This paper describes a study initiated to locate the sources of the problem and recommend control measures. The study method involved simulations using the electromagnetic transient program EMTP. The paper presents results of the base-case simulations, illustrating the effect of switched capacitor size and shunt capacitive compensation at lower voltage levels on the transient voltage magnitude at the customer facility, and the effects of the control measures proposed. These measures included synchronized switching, use of power factor correction capacitors, and addition of a choke in series with the VSD terminals.

Analytical derivatives for Markov switching models

By Jeff Gable, Simon Van Norden and Robert Vigfusson. Ottawa : Bank of Canada, 1995. 24 p. : *Bibl.* (Working paper / Bank of Canada ; 95-7 ISSN 1192-5434) ISBN 0-662-23685-8
MICROLOG 96-00355 (1 fiche)

This paper derives analytical gradients for a broad class of regime-switching models with Markovian state-transition problems. Such models are usually estimated by maximum likelihood methods, which require the derivatives of the likelihood function with respect to the parameter vector. These gradients are usually calculated by means of numerical techniques. The paper demonstrates the effectiveness of analytical gradients in speeding up maximum-likelihood estimation and the relative accuracy of the use of such gradients. A sample program listing is included.

An Analytical literature review of the cost-effectiveness of ADR

Concorde Inc. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1994. iv, 55 p. : *Bibl.* (Technical report / Canada. Dept. of Justice. Research Section ; TR1994-11e)
MICROLOG 96-00387 (1 fiche)

This study presents results of a search of electronic databases, a review of academic and popular literature, and interviews with key informants known to have expertise in measuring cost-effectiveness of government programs (alternative dispute resolution (ADR) in particular). The review evaluated virtually all major forms of ADR, from arbitration to summary jury trials. The program evaluation field was also surveyed in the health and social services sectors, since this is related to discussion of models measuring cost-effectiveness. Findings discussed in this report include the factors to be considered in assessing the cost-effectiveness of ADR; comparative models of analysis applicable to ADR cost-effectiveness measurement; the cost-effectiveness of ADR in general and of specific types of ADR such as arbitration and mediation; the prevalence of ADR; and ways to maximize the cost-effectiveness of ADR.

Annual report on multiculturalism, 1994-95

Multiculturalism B.C. Victoria : The Agency, 1995. 8 p.
MICROLOG 96-00339 (1 fiche)

The Ministry of Skills, Training and Labour was created in September 1993 to reform British Columbia's post-secondary education and training systems while continuing to promote stability in labour relations. Its mandate is to revitalize the learning and training systems to make them more relevant to British Columbian workers and the changing economy. This report describes the initiatives that the Ministry has undertaken during the fiscal year to promote multicultural policies. These initiatives have been organized under the following headings: corporate commitment; ministry goals and objectives; communication; review and evaluation of pro-

grams, services, policies and legislation; structural change; awareness/education sessions; and continuing and new initiatives. The report concludes with an overview of progress on multicultural initiatives in the Ministry.

APACS : monitoring and diagnosis of complex processes

Bryan M. Kramer...et al. Montreal : Canadian Electrical Assn, 1995. 10 p. : *Bibl. Presented at Electricity '95.*
MICROLOG 96-00113 (1 fiche)

This paper describes APACS (Advanced Process Analysis and Control System), a new framework for systems that detect and identify faults in industrial processes. The APACS approach adapts model-based diagnosis to include traditional numerical simulations, and its framework allows the system to include components that deal with real-time constraints as well as less time-critical knowledge-based components. Sections of the paper review the protocols and software components in the APACS framework, and detail the plant analyzer (simulation), monitoring (abnormality detection), diagnosis (fault identification), and human computer interface components that are combined to build an advisory system for a particular plant. The overall APACS approach uses the adjusted quantitative simulations in the plant analyzer components to generate discrepancies and test candidate hypotheses, and also provides a common model and schema to be shared between components.

Application of a new concept for a compact series capacitor scheme for distribution networks

L.O. Larsson...et al. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Distribution Section, Protection, Control & Substations Session, 1995. 21 p. : *Ill. Presented at Electricity '95.*
MICROLOG 96-00166 (1 fiche)

Series compensation in distribution network systems has been used for over 50 years, but with limited application due to the undesirable phenomena

of resonance as well as high maintenance requirements for overvoltage protection. This paper describes a new concept of series capacitor package which uses a self-triggered spark gap and an anti-resonance circuit. It first reviews the basic concepts of series compensation and illustrates its benefits using a case study of a rural power line having voltage fluctuations due to motor starts at a sawmill. The case study includes description of the system design aspects of the series capacitors for this particular application, as well as details of features such as the new overvoltage protection device and the resonance damping circuit scheme. The paper ends with a report of the operation, commissioning, and field experience with the new series compensation system.

Application of arc detectors in metal enclosed switchgear

By Soren Kling. Montreal : Canadian Electrical Assn, 1995. 6 p. : *Ill. Presented at Electricity '95.*
MICROLOG 96-00155 (1 fiche)

Accidents caused by arcs in switchgear and distribution boards account for about a third of all electrical accidents occurring in industry. This paper reviews the effects of arcing accidents, including metal vaporization, explosions, material burnoff, damage to equipment, and danger to personnel. It then suggests the best means of protection against such events, involving the disconnection of the arc in the shortest possible time. The protection system described is based on an overriding and fast-acting arc monitor with a total disconnection time of 30-40 milliseconds, sufficient to limit damage to only slight levels. The monitor obtains a light signal from the arc via a fiber optic cable entering the switchgear enclosure. A current sensing unit ensures against unintentional tripping. Other features include a circuit breaker fault monitor and a fail-safe signal transmission function.

Application of computational fluid dynamics (CFD) to coal fired utility boilers

By Andrew Jones, Kevin Chen and Pavel Kratina. Montreal : Canadian Electrical Assn, Thermal & Nuclear Power Section, 1995. 9 p. : *Ill., Bibl. Presented at Electricity '95. On cover: ABB Combustion Division.*
MICROLOG 96-00095 (1 fiche)

Recent improvements in computational fluid dynamics (CFD) codes and computer power have allowed CFD to be used routinely in a variety of practical engineering applications. This paper examines the use of FLUENT, a commercial CFD software package, in the investigation of operational problems and design alternatives for a variety of boiler components. It discusses the situations where CFD modelling is useful and notes typical pitfalls encountered when modelling. The paper then illustrates the following specific cases: ducting design changes required for a low-nitrogen oxide burner conversion; placement of erosion screens in coal-fired utility boilers to modify flow patterns of gases and particulate; and investigation of operational changes to reduce hot corner/cold corner phenomena in a furnace.

The Application of expert systems technology to rotating machine condition monitoring

By B.A. Lloyd and G.C. Stone. Montreal : Canadian Electrical Assn, 1995. 11 p. : *Bibl. Presented at Electricity '95.*
MICROLOG 96-00127 (1 fiche)

This paper first reviews the basic methodology of electric motor and generator condition assessment, then details the architecture and processing performed by an expert system called MICAA to obtain condition monitoring capabilities. The expert system was developed to assist maintenance personnel diagnoses the condition of rotor and stator

windings and their cores in motors and generators rated 2,300 volts and above. The user interacts with MICAA to input machine nameplate information, operating status, and any past test data that is available. In addition, the program suggests tests which may be useful and guides maintenance personnel on what to look for in the visual inspection of the machine. The expert system stores and correlates this information, calculates the overall condition of the component in question, and identifies the most likely specific causes of any deterioration. Application of the ALARA process in the regulation of nuclear activities : a report

By the Advisory Committee on Radiological Protection and the Advisory Committee on Nuclear Safety. Ottawa : Atomic Energy Control Board, 1991. v, 29 p. : *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0387(E)) *French ed.* (*Application du processus ALARA...*) : 92-05877/1. MICROLOG 96-00639 (1 fiche)

This report reviews the historical and conceptual basis of the ALARA (as low as reasonably achievable) process used for selecting an optimal level of radiation protection. It discusses the role of justification and optimization in radiation protection, the factors associated with radiation dose estimation, the assigning of costs to health detriment and safety improvements, and the application of the ALARA process during design, operation, and decommissioning or disposal of nuclear facilities. The report includes a glossary and a table showing various estimates of costs of safety improvements. CA LA LS ND SC

An Approach to underground characterization of a disposal vault in granite

By R.A. Everitt, C.D. Martin and P.M. Thompson ; with contributions by M. Gascoyne... et al. Pinawa, MB : Whiteshell Laboratories, 1994. xi, 220 p. : *ill.*, *Bibl.* (AECL research / Atomic Energy of Canada Ltd. ; AECL-10560 ISSN 0067-0367) ISBN 0-660-16051-X CCG-P no. C2-10560E MICROLOG 96-00067 (3 fiche)

In the concept being developed for disposal of nuclear fuel waste in a disposal vault in Canadian Shield rock, engineered and natural barriers would isolate the waste from the biosphere. This report recommends an approach to underground characterization to obtain information to optimize the design of the excavation and the engineered barriers, and to provide a baseline for monitoring the performance of the facility during and following its operation. The essential elements of the recommended characterization program include the application of an iterative observational method to design and characterization, the use of appropriate laboratory and field methods to validate models and parameter values, and the implementing of a suitable quality assurance program and peer review. The proposed program is limited to the period during which underground excavations and surface drilling are used to determine whether the site meets the requirements for a disposal vault. Archaeological predictive modelling : an assessment

By Heather Moon. Victoria : Resources Inventory Committee, Earth Sciences Task Force, 1993. ii, 53 p. : *Bibl.* (RIC report / British Columbia. Resources Inventory Committee ; 016) *At head of title: Discussion document.* MICROLOG 96-00287 (1 fiche)

Archaeological predictive models identify patterns in spatial relationships between archaeological sites and their physical locations, thus indicating potential relationships between the natural or social environment and the locations of past human activities. This paper first examines existing archaeological predictive modelling studies to determine if this is an appropriate methodology to assist in regional planning and resource management of archaeological resources in British Columbia. The paper then describes the development of such models in general, the types of models most commonly used, the archaeological applications of geographic information systems, and the problems and advantages of archaeological predictive modelling. The paper ends with an outline of the necessary conditions for the development of an archaeological predictive model or models for British Columbia. BC NR PR SC

Arctic tanker risk analysis, phase 1 : final report

Prepared for Transportation Development Centre, Policy and Co-ordination, Transport Canada. Ottawa : Canarctic Shipping Company Ltd., 1993. 2 v. : *ill.*, *Maps*, *Bibl.* *Contents: Vol. 1 : Report -- vol. 2 : Appendices.* MICROLOG 96-00392 (5 fiche)

This report contains the result of a two-step process: to develop a profile of marine casualty potential of the entire route of the oil tanker MV Arctic from the Bent Hom production site on Cameron Island in the Northwest Territories to the delivery terminal in Montreal; and to summarize the overall risk within each segment, consisting of both the casualty potential and the environmental sensitivity to an oil spill. The casualty profile examines operations during the August 15 to September 30 navigation season, and identifies and quantifies hazards in four categories: natural, such as icebergs and topography; hardware hazards external to the ship, such as communications systems; hardware hazards internal to the ship; and human performance, including moving the ship through ice and restricted waters. Risk summary sheets provide a synopsis of the primary environmental concerns and operational considerations for each of the 11 segments of the tanker route. CA EV ND NO SC TR

Arrow Timber Supply Area : rationale for allowable annual cut (AAC) determination, effective October 1, 1995

By Larry Pedersen. Victoria : Ministry of Forests, 1995. 50 p. : *Bibl.* MICROLOG 96-00037 (1 fiche)

The Arrow Timber Supply Area covers over 750,000 hectares in the Nelson Forest Region of British Columbia. About half of the Area is productive forest land. This document sets out the guiding principles for determining the allowable annual cut for the Area and considers the factors used in that determination: the role of base-case timber supply forecasts, inventory information, growth and yield predictions, minimum harvestable ages, the land base contributing to the timber harvest, the harvest profile, restocked areas, regeneration delay, silvicultural systems, utilization standards, decay, waste and breakage, integrated resource management objectives, planning deferrals, harvest flow, mill requirements, local objectives, and disease and other losses. The appendices provide relevant sections of forestry legislation and a summary of public input on the Area's Timber Supply Review. BC FO PR SC

Arrowsmith Timber Supply Area : timber supply review discussion paper

Victoria : Ministry of Forests, British Columbia Forest Service, 1995. 15 p. : *ill.* MICROLOG 96-00050 (1 fiche)

This discussion paper summarizes the technical reports for the Arrowsmith Timber Supply Area on southern Vancouver Island, with the intent of fostering public comment on the findings. It outlines the background of the Timber Supply Review and the land use decisions that may influence timber supply in the Area, then describes the Area with reference to forest resources, wildlife, fisheries, the local economy, the allowable annual cut, the local timber harvesting and processing industry, and current forest management practices. The report also examines timber supply forecasts for the Area and critical factors that may increase or decrease the short-term timber supply as well as possible opportunities to offset reductions in timber supply. Finally, the report evaluates environmental and socio-economic implications of adjustments in timber supply and harvesting in the Area. BC FO PR SC

Arrowsmith TSA socio-economic analysis

Alan Fitzgibbon & Associates. Victoria : Ministry of Forests, Economics & Trade Branch, 1995. ix, 77 p. : *ill.* MICROLOG 96-00070 (1 fiche)

The Arrowsmith Timber Supply Area, located on southern Vancouver Island, covers some 125,000 hectares of productive forest land. This report profiles the Area and discusses the implications associated with certain timber harvest forecast scenarios chosen to illustrate a range of impacts. The report begins with a profile of the Area's regional background, its communities and First Nations, and its environmental and outdoor recreational resources. It then presents an overview of the local forestry sector, including the timber harvesting land base, historic harvesting levels, and the local forest industry. Further sections of the report set out the timber harvest scenarios along with some related land use issues that could affect those forecasts, and estimates their impacts on employment, employment income, government revenues, local communities, First Nations, and the environment. The appendices include the economic impact methodology employed. BC NR PR SA SC ST

Article de documentation sur les questions soulevées par les nouvelles techniques de reproduction

Artificial neural network based protection of transformers

By M.R. Zaman, M.A. Rahman and M.A. Hoque. Montreal : Canadian Electrical Assn, Power System Planning & Operation Section, Power System Protection Subsection, 1995. 21 p. : *Ill.*, *Bibl.* *Presented at Electricity '95.* MICROLOG 96-00124 (1 fiche)

This paper presents a novel technique for distinguishing between magnetizing inrush and internal fault currents of a power transformer, using an artificial neural network. The investigators acquired data experimentally for training a feedforward neural network using the well-known backpropagation algorithm. The data were for inrush current waveshapes at different switching conditions of a laboratory transformer and for four types of secondary side faults (phase to phase or phase to ground faults, with or without load). The paper includes the results of off-line tests using the neural network based algorithm in order to demonstrate its capability in distinguishing between internal fault and inrush currents irrespective of the harmonic contents of the currents.

Ask me no questions : a project evaluation

By Stephen P. Norris and M. Jane Burnham. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1991. VIII, 89 p. : *Bibl.* (Working document / Canada. Dept. of Justice. Research Section ; WD1992-25e) *French ed. (Ask me no questions : évaluation...)* ; 96-00500/1. MICROLOG 96-00499 (2 fiche)

Ask me no questions is the name of a novel about a 15-year old woman whose father had sexually abused her between the ages of 3 and 13. The novel relates how the woman deals with the revelation that her father was also abusing her 13-year-old sister and with her own abuse, which she had been hiding. The authors of the novel intended it to educate young people on the nature of sexual abuse and the role of law as protector. This report presents the findings of a study designed to assess the extent to which the novel is effective in achieving its purpose, and to provide some guidance to others who may be interested in using the novel as an approach to educate young people about the law and the justice system. The study gathered, compiled, and interpreted five types of evaluative information about the novel, including the degree of change in high school students' attitudes and knowledge of sexual abuse and the role of law in dealing with abuse.

Assessment of aged transmission lines at Ontario Hydro

M.F. Ishac... et al. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Transmission Section, 1995. 11 p. : *Bibl.* *Presented at Electricity '95.* MICROLOG 96-00141 (1 fiche)

The Ontario Hydro grid currently consists of 29,000 kilometers of 115-, 230-, and 500-kilovolt lines. Some of the oldest 115-kilovolt lines, constructed in 1906, are still in service with most of their original components. By 2000, over a third of the lines will exceed their 50-year design life. This paper describes the utility's program for assessing overhead line condition, including examination of conductors and ground wires, hardware and insulators, structures, corrosion protection measures, and foundations. The goal of the program is to refurbish or replace older lines where required to ensure a safe, reliable, and economic operation of the grid. The paper also reviews the design criteria of existing lines and presents a case study of a load-strength evaluation of an existing single circuit 230-kilovolt line, indicating which components need upgrading or reinforcement.

The Assessment of the costs and benefits of regulatory decision making

Price Waterhouse (Firm). Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. v, 43 p. : *Ill.*, *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0566) MICROLOG 96-00690 (1 fiche)

This study outlines the framework within cost-benefit analyses of regulation may be undertaken. The general framework is consistent for any cost-benefit analysis. The particular needs or individual structure of the industry to which the regulation is targeted and the particular nature of the regulation will affect the methodologies chosen to execute specific steps within that framework. The discussion also includes insight into the approach to cost-benefit analysis used in other jurisdictions in the United States, United Kingdom, and Canada. In the discussion of each phase of the cost-benefit framework, the study outlines various methodologies and their relative strengths and weaknesses in the context of regulation within the nuclear industry. The proposed framework incorporates those individual methodologies and approaches used in other jurisdictions which are best suited for assessing regulations administered by the Atomic Energy Control Board of Canada.

Assessment of the underground disposal of tailings

By Nora M. Hutt and Kevin A. Morin. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. xiii, 242 p. : *Ill.*, *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0558) MICROLOG 96-00684 (3 fiche)

This study, based on a detailed literature review and interviews with experts, examines the issue of underground disposal of uranium mine tailings. The study is structured like a catalogue of facts and information, with each paragraph presenting some concept, concern, theory, or case study involving the retrieval or placement of tailings. After introductory sections on the uranium tailings disposal problem in Canada and discussion of the advantages and drawbacks of surface and underground disposal, the report reviews the chemical and physical characteristics of uranium tailings, effects of retrieval of tailings from a surface impoundment, technical aspects of retrieval and underground placement of tailings, and effects of underground placement on existing conditions in underground mines. Costs of retrieval and placement are also assessed. Other issues discussed include biological implications, monitoring, and permafrost effects.

Automatic meter reading and POWERPLUS (TM) services : concept to implementation

By D.R. Perks. Montreal : Canadian Electrical Assn, Engineering & Operating Division, 1995. 11 p. : ill. Presented at Electricity '95.
MICROLOG 96-00172 (1 fiche)

Alberta Power, because of a large service area with small population, has unusually high meter reading costs. Accordingly, the utility initiated system-wide implementation of automatic meter reading using TWACS (Two Way Automatic Communication System), a power-frequency communications system based on modulation of the 60-Hertz voltage wave in a fashion that allows binary coding of the information to be sent to and from the meter or other device. This paper explains the characteristics of TWACS and presents the results of a pilot project conducted to test its accuracy, reliability, and cost. The core and extended options of this system have been combined under the name POWERPLUS. Core features include automatic meter reading, outage mapping, load research, and demand side management. Extended features being promoted to businesses and municipalities include water and gas meter reading, remote site monitoring, and remote control.

Automatic Water Quality Monitoring Workshop : proceedings, 1994

Edited by L.W. Pommen. Ottawa : Environment Canada ; Victoria : Ministry of Environment, Lands & Parks, 1995. 146 p. : ill., Bibl. At head of title: Canada-British Columbia Water Quality Monitoring Agreement. ISBN 0-7726-2584-0
MICROLOG 96-00275 (2 fiche)

The purpose of this workshop is to provide more information to regional offices of BC Environment on the subject of automatic monitoring. It discusses such things as the observation of transient water quality events using electronic sensors, the assessment of ecosystems from electronically acquired data, the testing of water quality instruments, communication with automated field sites, experiences using automated monitors, an integrated environmental data management system, water quality sample collection with an automated preconcentration sampler, and many other things. A list of workshop participants and a summary of workshop evaluation forms are included.

Avoided operating costs in thermal generating systems

By N. Chowdhury, R. Gupta and Roy Billinton. Montreal : Canadian Electrical Assn, Power System Planning & Operating Division, 1995. 15 p. : ill., Bibl. Presented at Electricity '95.
MICROLOG 96-00115 (1 fiche)

This paper presents a simple and straightforward technique to assess avoided system operating cost due to inclusion of a non-utility generator (NUG) in an electric power network. The technique is based on optimum loading configurations of the committed units both before and after the inclusion of NUG energy. The paper illustrates the assessment of avoided operating costs with both deterministic and probabilistic criteria. The methodology adopts a time differentiated price system in its algorithms in order to reflect the different value placed on purchased price by a utility at different times of the day. These algorithms show the utility effects of dispatchable and non-dispatchable NUG energies. The paper includes the results of numerical analysis using the IEEE Reliability Test System to test the reliability of the developed algorithms.

Backgrounder to the electricity market review

British Columbia Utilities Commission. Montreal : Canadian Electrical Assn, 1995. 29 p. : ill. Presented at the Power of Change Conference, part of Electricity '95.
MICROLOG 96-00207 (1 fiche)

This paper reviews the existing structure of British Columbia electricity markets, including the physical characteristics of the province's electric power system, the current suppliers and distributors of electricity, regulation and legislation affecting the electric power industry, electricity trade policies and institutions, power generation resources, and applications filed by BC Hydro for industrial service options. The paper then assesses three fundamental forces of change in the electricity industry (technological change, globalization of the economy, and the changing public policy environment) and the reflection of these changes in such trends as the erosion of natural monopoly conditions, emergence of new market entrants, changing customer needs and expectations, and growing concerns about the environment. The paper ends with an outline of the changes in industry structure, degree of competition, ownership, and regulation that relate to proposals for industry restructuring.

Ballooning of CANDU pressure tubes : experiments with degraded tube material

By C.F. Forrest. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. vii, 230 p. : ill., Bibl. (Report / Canada. Atomic Energy Control Board ; INFO-0556)
MICROLOG 96-00682 (3 fiche)

This report presents results of part of a study on the effect of in-service degradation on the ballooning behavior of CANDU reactor pressure tubes. Three as-received zirconium-2.5% niobium pressure tube specimens were tested in a ballooning test rig, with the temperature ramp rate controlled between 28 and 35 degrees Kelvin per second. Temperatures on the outside and inside surfaces of the specimens, and circumferential and longitudinal strains, were recorded during the transients. Post-test longitudinal, circumferential, and wall thickness strains were also measured. All as-received specimens ruptured full-length near the top, the hottest point, and all defected specimens failed at either or both upper defects. The bulk of the report consists of the appendices, containing data on specimen fabrication, material analyses, test results, and pre- and post-test inspection data.

B.C. Hydro's experience with refurbishing 500 kV series capacitor banks

G.S. Polovick...et al. Montreal : Canadian Electrical Assn, Engineering & Operating Division, 1995. 19 p. : Bibl. Presented at Electricity '95.
MICROLOG 96-00159 (1 fiche)

Ten of BC Hydro's 500-kilovolt transmission lines are equipped with series capacitors, the oldest installed in 1969. Performance of the original banks has deteriorated to the point where maintenance is excessive and system reliability is impaired. This paper describes the program undertaken to refurbish the series capacitor installations. The program's preliminary studies included the seismic evaluation of foundations and platforms, environmental assessment of soil and foundation contamination from polychlorinated biphenyls in the older capacitors, and determination of future rating requirements. Depending on the age and criticality of the capacitor bank, refurbishment activities included replacement of capacitors, adding metal oxide varistor protection, and replacing relays and bypass breakers. The paper also describes the criteria used for equipment selection and details the microprocessor-based protection and control system of the upgraded installations.

British Columbia chicken industry : pricing, production and related issues : final report

British Columbia Marketing Board. Victoria : The Board, 1995. 61 p.
MICROLOG 96-00039 (1 fiche)

This report complements and completes an initial document released in February 1995 regarding the pricing and production of broiler chicken and broiler hatching eggs in British Columbia. After an introduction reviewing the province's supply management system, related legislation, and changes in the provincial marketplace, the report outlines the background to chicken processor pricing concerns. It then mentions the numerous meetings, facilitations, mediations, and hearings with respect to chicken industry pricing issues, and comments on the consultation process subsequent to the February 1995 document. Further sections of the report cover industry agreements, marketing board goals, pricing/linkage studies, issues related to the regulation of chicks, and accusations of marketing board bias in favor of the Hatching Egg Commission. The report ends with marketing board recommendations for regulatory change.

British Columbia physical shore-zone mapping system

By Don Howes, Edward H. Owens and John R. Harper. Victoria : Resources Inventory Committee, 1994. 71 p. : ill., Maps, Bibl. *At head of title: Discussion document.*
MICROLOG 96-00276 (1 fiche)

This manual provides standards for physical shore-zone mapping in British Columbia. It opens with an overview of the mapping system and then details the mapping methodology. The procedures presented record information at three levels: project information such as project name, responsible agency, name of mapper, and scale of mapping; information pertaining to the entire shore unit such as wave exposure, alongshore length, tidal range, data sources, and location; and component information on the morphology, material (bedrock or sediment character), and width of each across-shore component. Each shore unit is characterized by a shoreline type, a summary indicator of the morphology and sediment within the unit. The standards define 34 standard shoreline types, and the rationale for shore unit classification is included. The manual includes a mapping example. Appendices contain codes and definitions, descriptions of shoreline types, and wave exposure calculations.

Brushgear diagnostics project overview

By G.A. Turner and D.E. Franklin. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Hydraulic Power Section, Rotating Machines Subsection, 1995. ii, 12 p. : ill. *Presented at Electricity '95.*
MICROLOG 96-00073 (1 fiche)

Carbon brushes are used to transfer electrical current to the rotating windings in electric generators. The brushes and their holders, collector surfaces, and power distribution and insulated suspension system are collectively called the brushgear system. To address the need for a monitoring system designed specifically for early detection of develop-

ing brushgear problems, the Canadian Electrical Association and BC Hydro have co-funded a project examining brush current dynamics and brush motion in order to determine how these parameters might be used as a measure of brushgear performance. This paper reviews work conducted to date on this project, including data gathered at several generators at different BC Hydro hydroelectric power plants to document brush current and displacement behavior while operating the units under various loading conditions. The paper also outlines the development of data acquisition and processing software for the project.

Busting bureaucracy to reclaim our schools

By Stephen B. Lawton, Heather-Jane Robertson and Joseph Freedman. Montreal : Institute for Research on Public Policy, 1995. 158 p. : *Bibl.* (Monograph series on education / Institute for Research on Public Policy ; 4)
ISBN 0-88645-161-2
MICROLOG 96-00721 (2 fiche)

In this book, the author argues that the bureaucratization of schooling has interfered with the process of education. The costs, complexity, and rigidity of the educational edifice leaves it unresponsive to parental concerns and reluctant to measure its own inadequacies such as illiteracy and high dropout rates among students. The author identifies two conceptual bases for action to address this problem: public choice theory and agency theory, discusses the issue of identity in its relation to education, and then makes the case for charter schools in Canada, stressing definitions of community, parental rights, and the need to combat bureaucratic tendencies. Two discussants respond to the author's analysis, one amplifying his call for charter schools and the other arguing that the basis for demanding reform is less clear than the author claims.

This document examines the Canada Health Act against this background of reform. It does not set out to offer a legal interpretation of the Act; rather, it seeks to take stock of its evolution and examine its future prospects. The first section reviews the justifications for government intervention in the health sector, while the second describes the respective roles of the federal government and the provinces. The third section traces the historical background of the Act, and the fourth presents an overview of the standards and criteria attached to it. In the fifth section, penalties for defaults under the Act are described, and in the sixth and final section, some options are set out for maintaining the Act or improving it.

Canada, living with radiation

Ottawa : Atomic Energy Control Board, 1995. ix, 122 p. : *Ill. French ed. (Canada, vivre avec la rayonnement) : 96-00705/2*. ISBN 0-660-16036-6 CCG-P no. CC172-7/1995E
MICROLOG 96-00706 (2 fiche)

This book provides basic information to the public about various aspects of radiation, notably those related to health and safety. Chapters of the book cover elementary concepts about ionizing radiation, sources of radiation exposure, biological effects of radiation, radiation protection principles, natural radiation, medical and industrial uses of radiation, occupational exposure, radiation in the environment, nuclear planning, emergency planning for nuclear facilities, and regulatory control of ionizing radiation. The book includes lists of information sources, symbols and units used in radiation protection, and a glossary.

Canada. Office des prix des produits de la pêche : Rapport annuel 1994-95

Ottawa : l'Office, 1995. 12, 12 p. *Bilingue*. ISBN 0-662-61999-4
MICROLOG 96-00433 (1 fiche)

L'Office a pour tâche d'enquêter sur les prix des produits de pêche et, s'il y a lieu, de recommander des mesures déjà prévues par la Loi en cas de chute des prix. Essentiellement, les mesures législatives servent à protéger les pêcheurs de baisses trop rapides de prix et des pertes de revenus qui s'ensuivent, baisses dont les causes échappent au contrôle des pêcheurs ou des producteurs. Ce rapport annuel fournit des informations sur la situation de l'industrie canadienne de la pêche, de la transformation et de la commercialisation durant l'année, ainsi que des exportations et importations. Il fait ensuite le bilan des activités de l'Office et des programmes d'achats et d'aide alimentaire. On donne aussi des données statistiques et des états financiers.

Canadian database for radionuclide transfer in the environment

By S.C. Sheppard and B.J. Corbett. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. vi, 68 p. (Report / Canada. Atomic Energy Control Board ; INFO-0542)
MICROLOG 96-00664 (1 fiche)

The transfer of radionuclides throughout the biosphere is described in models that rely on a series of transfer parameters typically based on experimental or monitoring observations. Data from Canadian settings are generally preferable for Canadian safety assessment applications, particularly for geographically unique parameters relating to specific soils and environments. This report describes a database constructed to record future radionuclide transfer parameter data systematically and completely, and to record particularly valuable existing data, with an emphasis on Canadian data. Sections of the report cover the operating system and software, vetting guidelines and characteristics of valid data, specification of information to be entered, general and parameter-specific entries, specification of conditions for each parameter, and general comments. The appendices include a user's guide, glossary, data preparation sheets, and a table showing the data structure.

Cancer mortality in British Columbia, 1988-92 : patterns of underlying cause and multiple cause data

By J.M. Macdonald, T.A. Tuk and C. Cranfield. Victoria : Ministry of Health & Ministry Responsible for Seniors, Division of Vital Statistics, 1993. 46 p. : *ill., Maps. On cover: Feature report*.
MICROLOG 96-00064 (1 fiche)

The first part of this report provides a provincial and regional overview of cancer mortality as an underlying cause of death in British Columbia, examining such issues as age, gender, and occupational differences. The second part of the report examines the potential uses of cancer-related multiple-code data from British Columbia Vital Statistics death records. Such uses include a look at where primary cancers spread, kinds of complications of a termi-

nal illness, complications of treatment, and possible evidence of relationships between cancer and other diseases. The second part also contains information on diseases noted on the death records that contributed to the death but were probably not causally related to the cancer underlying cause of death, as well as information on lifestyle and risk factors, including conditions known to be related to the development of malignancy such as smoking and toxic environments.

CEA power quality measurement protocol : a major step in Hydro-Québec power quality strategy

By Daniel Desrosiers, Gilles Allard and Roger Bergeron. Montreal : Canadian Electrical Assn, 1995. 5 p. : ill. Presented at Electricity '95. MICROLOG 96-00164 (1 fiche)

Customer expectations regarding power quality have significantly increased with the increasing penetration of electronic components and controls into commercial, institutional, and industrial markets. Short-time power interruptions and voltage fluctuations are of particular concern. This paper presents the strategy used by Hydro-Quebec to meet those expectations. In collaboration with the Canadian Electrical Association, the utility has developed a Power Quality Measurement Protocol and an accompanying guide to assist field personnel in having a clear view of the power quality phenomenon and to address power quality problems. The Protocol also provides a solid basis for explaining discrepancies arising during site measurements. The paper illustrates problems with currently used power quality measurement equipment, reviews Hydro-Quebec's development of a power quality analyzer, and outlines future developments in this field.

Celebrating flexibility : an interpretive essay on the evolution of Canadian federalism

By Thomas J. Courchene. Toronto : C.D. Howe Institute, 1995. 75 p. : ill., Bibl. At head of title: *Benefactors lecture*, 1995. MICROLOG 96-00725 (1 fiche)

This essay attempts to grapple with the implications for the future of Canadian federalism of various pervasive and irreversible changes in the global political and economic order, with the core question being whether Canadian federalism is sufficiently flexible to accommodate these challenges. A critical subtheme underlying the essay is that Canadian federalism has always been very flexible, at least until 1980. The essay addresses the implications of globalization and focuses on two factors ensuring the rise of decentralization in Canada: fiscally triggered decentralization and the shift to north-south trading patterns. The author then attempts to link the internal features of the Canadian federal economy with earlier regional literature. Finally, the essay discusses whether ongoing decentralization is reversible and the implications of increased acceptance of responsibilities by the provinces.

Census '93 : the report of the 1993 census of provincial correctional centres in British Columbia

By Robert M. Gordon and Jacquelyn Nelson. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1994. xiv, 72 p. : ill. (Working document / Canada. Dept. of Justice. Research Section ; WD1994-17e) (Document de travail / Canada. Ministère de la justice. Section de la recherche ; WD1994-17x) *Recensement 1993 : rapport concernant le recensement des centres correctionnels provinciaux en Colombie-Britannique ; résumé* (9 p.) laid in. MICROLOG 96-00538 (2 fiche)

This report presents results of a census of British Columbia prison inmates undertaken to develop an ethnocultural profile of the province's adult prison and youth detention center population, to determine problems related to ethnicity, and to identify options for addressing any problems that emerge. The investigators interviewed a sample of 519 inmates, representing 26.6% of the total population. They interviewed both inmates and prison staff regarding special issues, problems, and needs relevant to the incarceration of ethnic and aboriginal groups. The report compares prisoner characteristics

with those of the general population and with those of the federal prison population. The report concludes with recommendations to address the issues raised.

Characterizing logic grammars : a substructural logic approach

By James H. Andrews, Fred Popowich and Veronica Dahl. Burnaby, BC : Simon Fraser University, Centre for Systems Science ; Laboratory for Computer & Communications Research, 1994. 51 p. : ill., Bibl. (Technical report / Simon Fraser University. Centre for Systems Science and Laboratory for Computer & Communications Research (B.C.) ; CSS/LCCR TR94-12) MICROLOG 96-00020 (1 fiche) (Available on fiche only)

Logic grammars offer clear and logic-based ways to implement linguistic theories. Studies of the foundations of logic grammars suggest that they have a relationship to such systems as relevance logic and linear logic, both characterized by having more restricted structural inference rules than standard first-order logic and hence grouped under the rubric of substructural logics. This paper focuses on static discontinuity grammars, a logic grammar formalism, and shows exactly how this formalism is related to substructural logic. The paper provides a substructural logic event calculus proof system which is shown to be equivalent to static discontinuity grammars for parsing problems. The paper gives one calculus for each of the two major inter-

pretations of those grammars, the two differing by only a small restriction in one rule. The calculi also serve to characterize those formulations.

Child sexual abuse in Canada : a survey of national data

Julian Roberts ; with the assistance of Michelle G. Grossman. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Research & Development Directorate, 1992. iii, 32 p. : Bibl. (Technical report / Canada. Dept. of Justice. Research Section ; TR1992-13e) MICROLOG 96-00426 (1 fiche)

This document reports the findings from discussions with criminal justice personnel from the Canadian Centre for Justice Statistics to determine what kind of statistics currently exist relating to child sexual abuse at the national level. The report summarizes the nature of existing information systems and their likely utility to the Child Sexual Abuse Initiative of the federal Dept. of Justice. It reviews the kinds of data that the department would ideally want, relating to the treatment of offenses involving children from the reporting stage to the disposition. The report then reviews the major databases located at the Centre, including the Uniform Crime Reporting System, the Homicide database, the Adult Criminal Court Survey, the Youth Court Survey, and victimization surveys. A few other sources of data are noted, such as the Offender Information System of the Ministry of the Solicitor General.

Childhood leukaemia around Canadian nuclear facilities, phase II : final report

By E.A. Clarke, T.W. Anderson and J. McLaughlin. Ottawa : Atomic Energy Control Board, 1991. ix, 83 p. : ill., *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0300-2)
MICROLOG 96-00637 (2 fiche)

This report presents results from a study that aimed to investigate whether the frequency of leukemia among children born to mothers residing in the vicinity of nuclear facilities in Ontario differed from the provincial average. The investigators used the Ontario Cancer Registry to identify children aged 0-14 years who died from leukemia between 1950 and 1987, or who were diagnosed with leukemia between 1964 and 1986. They performed separate analyses for each of three general types of nuclear facilities: nuclear research and development facilities; uranium mining, milling, and refining facilities; and nuclear generating stations. They also performed analyses for two levels of geographic proximity to the facility. The results presented include relative risk estimates for each facility, mortality ratios by residence at death and birth, and confidence intervals within which the true relative risk is likely to lie.

Civil legal aid services in Canada : policy options

By Mary J. Mossman. Ottawa : Dept. of Justice, Research Section, 1990. 127 p. : *Bibl.* (Technical report / Canada. Dept. of Justice. Research Section ; TR1991-3)
MICROLOG 96-00415 (2 fiche)

This paper offers an overview of research and policy issues concerning legal aid services in Canada, with the intention to assist Dept of Justice Canada in the development of options for civil legal aid as a component of a possible comprehensive legal aid cost-sharing agreement. The paper first examines the issue of appropriate principles for civil legal aid services by focusing on the identification of needs for those services and on the development of appropriate rationales for government policy responses to such needs. The paper then examines the criteria for choosing policy objectives about legal aid services, including both broadly-defined social and political values of Canadian society as well as more specific legal obligations. In light of the principles identified, the paper explores the problems of target populations and their needs for legal aid services, examining such issues as coverage, eligibility criteria, and delivery systems.

Closed form attitude determination under spectrally varying illumination

By Mark S. Drew and Leonid L. Kontsevich. Burnaby, BC : Simon Fraser University, Centre for Systems Science ; Laboratory for Computer & Communications Research, 1994. 18 p. : ill., *Bibl.* (Technical report / Simon Fraser University. Centre for Systems Science and Laboratory for Computer & Communications Research (B.C.) ; CSS/LCCR TR94-02)
MICROLOG 96-00293 (1 fiche) (Available on fiche only)

Interreflected light, known to account for a substantial amount of total illumination content in a closed environment, is often colored. This leads to a light environment at any point on a surface which changes spectrally depending on the orientation of the surface normal at that point. While surface normals lie on the Gaussian sphere, colors lie on an ellipsoid in color space. A robust regression method can reliably find the correct ellipsoid, but such an algorithm recovers normals only up to an overall orthogonal transformation. This rotation can nevertheless be recovered by imposing an integrability condition. This paper shows how to use a smoothness criterion to solve in closed form for the correct rotation and thus automatically determine object attitude. The paper applies the method to synthetic and real images, and shows that a well-known test image was probably taken under spectrally varying illumination.

Comparison of estimated residual strength and groundline decay of replaced transmission poles with actual measurements

G.S. Bhuyan...et al. Montreal : Canadian Electrical Assn, Transmission Line Design Session, 1995. 11 p. : ill., Bibl. Presented at Electricity '95.
MICROLOG 96-00132 (1 fiche)

To solve concerns about the inaccuracy of the EDM Poletest equipment used to test power transmission poles at BC Hydro, the utility initiated a test program to evaluate the effectiveness of the instrument for testing old poles and to examine the performance of a newly marketed instrumented drill called Resistograph for groundline decay detection. This paper presents results from the test program. The investigators measured residual strengths of ten 45-55 foot western red cedar poles, removed from a line after 28-36 years of service, using destructive testing methods. Other characteristics measured were moisture content and tree growth increments. The results presented include the degree of correlation between the predicted residual strengths using the Poletest instrument and the measured strengths, and the ability of the Resistograph to detect and quantify internal decays accurately.

Competitive rate design

By Gary L. Fuqua. Montreal : Canadian Electrical Assn, 1995. 6 p. Presented at the Power of Change Conference, part of Electricity '95.
MICROLOG 96-00200 (1 fiche)

The Bonneville Power Administration, a self-financed organization in the United States Department of Energy, markets power in the Pacific Northwest. The Administration develops a broad spectrum of rates for its industrial customers, wholesale power customers, and transmission customers. This paper identifies some of the attributes necessary in pricing power and transmission products in today's competitive market environment, and then describes some of the pricing approaches that the Administration has used or is considering to address that market. Those approaches include innovative rate designs such as the variable industrial rate for aluminum smelters, the rate being tied to the price of aluminum; time-of-use pricing; tiered rates, with the higher tier reflecting costs of resources acquired to serve new loads; and transmission rates that allow recovery of capital costs through advance payment.

Composite system reliability evaluation and probabilistic planning : B.C. Hydro's practice

W. Li...et al. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operating Section, Power System Reliability Subsection, 1995. 13 p. : ill., Bibl. Presented at Electricity '95.
MICROLOG 96-00103 (1 fiche)

This paper describes the basic tools, methods, and procedures used in composite system reliability planning and data collection at BC Hydro. The reliability evaluation tool used is a computer program called MECORE (Monte Carlo simulation and Enumeration approach for Composite system Reliability Evaluation). This tool can perform such functions as least-cost probabilistic planning, independent power producer location and sizing, ranking of system component importance, and maintenance planning. The paper presents two applied examples. The first involves comparison of three basic system planning alternatives for meeting increased load demands in the Vancouver South Metro system at satisfactory reliability with the minimum investment. The second example involves identification of the best location and size of non-utility generators connected to the area transmission system, based on reliability and economic criteria.

Computers and the law : the Sentencing Database System of the LIST foundation

By Jean-Paul Brodeur. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Research & Development Directorate, 1990. vii, 141 p. : Bibl. (Technical report / Canada. Dept. of Justice. Research Section ; TR1992-10e)
MICROLOG 96-00421 (2 fiche)

The Sentencing Database System (SDS) of the Legal Information Systems and Technologies (LIST) Foundation is a sentencing database which embodies artificial intelligence features. One of its main purposes is to serve as voluntary sentencing guidelines in order to remedy sentencing disparity. This report reviews the development of the SDS project and presents a review of relevant literature, including works on sentencing disparity, sentencing guidelines, law-related applications of artificial intelligence, expert systems, and hypertexts. The report also summarizes the findings of a SDS user survey, including frequency of use, patterns of research, and perceptions of SDS usefulness. The report then describes the structure of the SDS, file contents, and user procedures, and comments on the system's strengths and weaknesses. The report concludes with a discussion of possible enhancements.

The Construction and implementation of child support guidelines

By Daniel Stripinis, Ross Finnie and Carolina Gili-berti. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1993. xii, 111 p. : *Bibl.* (Technical report / Canada. Dept. of Justice. Research Section ; TR1993-17e)
MICROLOG 96-00378 (2 fiche)

A central aspect of changes in child support laws is the replacement of the case-by-case budget-based system of determining child support awards with standardized guidelines. The intention of such guidelines includes reduction of the arbitrary variation and associated unfairness perceived as characterizing the existing system; increasing the average amount of the support awards; and reduction of the time and expense involved in arriving at the final awards. This report examines two aspects of child support guidelines, from both theoretical and empirical perspectives: determining the costs of the children and apportioning those costs between the two parents. It examines expenditure models used to determine child-raising costs, discusses methods of evaluating proposed guidelines, and presents various guidelines previously considered by the federal Dept of Justice and some alternative guidelines.

Control system retrofits to improve plant efficiency

By T. Leung and J. Peet. Montreal : Canadian Electrical Assn, Thermal & Nuclear Power Section, 1995. 11 p. : ill., Bibl. Presented at *Electricity '95*. On cover: Technical paper. At head of title: *Thermal Generating Station Construction and Commissioning Session*. MICROLOG 96-00099 (1 fiche)

The parameters affecting the capability and efficiency of power plant generation units during cycling operation are: pressure and temperature control to the turbine, extent of over- or underfiring in the boiler, and excess air and excess gas temperature leaving the boiler. This paper discusses new control techniques which address the above parameters and improve the load-cycling capability and efficiency of coal-fired thermal power plants. The control system described is conventional and does not involve the use of advanced control concepts such as artificial intelligence. Design of the system takes advantage of the availability of dynamic, first-principles models for microcomputer-based hardware. The paper focuses on application of such a system to pulverized coal-fired drum-type boilers connected to single reheat type turbine generators.

Convention sur la diversité biologique : Projet de stratégie de mise en œuvre au Québec

Comité interministériel sur la diversité biologique (Québec). Québec : Gouvernement du Québec, Ministère de l'environnement et de la faune, 1995. ii, 193 p. : ill., Bibl. ISBN 2-550-24557-1 MICROLOG 96-00581 (3 fiche)

La convention sur la diversité biologique constitue une réponse tangible des gouvernements et des institutions au questionnement planétaire soulevé par la Commission Brundtland en 1987. Il s'agit de l'atteinte du développement durable. Dans ce document de stratégie de mise en œuvre de la Convention, il est question de conservation des organ-

ismes vivants et de leurs milieux de vie au Québec ainsi que de l'utilisation durable des ressources vivantes par l'ensemble des utilisateurs (chasseur, pêcheur, forestier, agriculteur, industriel et citadin). On trouve un portrait de la diversité biologique à l'échelle du Québec, un sommaire des valeurs économiques, et on examine l'influence sur la diversité biologique des tendances démographiques et climatiques. On expose une analyse de la situation relative à la conservation et à l'utilisation durable des ressources biologiques. Cette analyse permet de dégager des caractéristiques et des objectifs généraux des secteurs suivants: ressources naturelles, fauniques, forestières, agricoles, et industrielles (biotechnologies), milieu urbanisé, ressources minières, énergétiques, milieu nordique, urgences environnementales, et éducation. Ensuite, on dresse une liste des mesures gouvernementales à réaliser, et on propose un plan de mise en œuvre au Québec.

The Cost of mediation versus court disposition in criminal cases : feasibility study

By Mark S. Umbreit. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1993. ii, 25 p. (Technical report / Canada. Dept. of Justice. Research Section ; TR1993-15e) MICROLOG 96-00399 (1 fiche)

The victim-offender mediation process is used in Canada, the United States, and Europe as an alternative to court disposition of criminal cases. In examining the public policy implications of increasing the availability of mediation, there is a need to eval-

uate the costs of that alternative. This paper describes a study undertaken to determine the feasibility of comparing the cost of mediation services versus court disposition in Winnipeg, where Mediation Services represents the largest mediation program in Canada. The paper then presents a proposal for a full-cost study, in which the unit cost of court disposition of criminal cases in Winnipeg would be determined by a bottom-up approach and the unit cost of mediation would be calculated from Mediation Services financial data. Appendices include a cost analysis interview schedule, a Crown attorney time tracking form, and a cost analysis model.

Coupe de jardinage dans six régions écologiques du Québec : accroissement quinquennal en surface terrière

Par Zoran Majcen et Yvon Richard ; avec la collaboration de Laurier Groleau et Jocelyn Hamel. Sainte-Foy, PQ : Gouvernement du Québec, Ministère des ressources naturelles, Direction de la recherche forestière, 1995. xiv, 21 p. : ill., Bibl. (Mémoire de recherche forestière / Québec (Province). Direction de la recherche forestière ; no 120 ISSN 1183-3912) ISBN 2-550-24922-4 MICROLOG 96-00486 (1 fiche)

Dans le but d'étudier les effets des coupes de jardinage sur l'accroissement en surface terrière des peuplements résiduels, nous avons établi sept dispositifs expérimentaux dans six régions écologiques du Québec. Les coupes ont été réalisées en 1987 dans deux dispositifs et en 1988 dans les cinq autres; le mesurage a été effectué 5 ans après la coupe. Les points abordés sont les suivants : matériel et méthodes; données avant et après la coupe; et, accroissement quinquennal en surface terrière.

Creating a new future : the job-loss workbook

Victoria : Ministry of Skills, Training & Labour, 1994. 52 p. : Bibl.
MICROLOG 96-00257 (1 fiche)

This workbook was developed to help laid-off workers cope with job loss and to help them to prepare for new employment. It provides information on issues that commonly arise such as evaluating severance packages, applying for unemployment insurance, and dealing with the physical and emotional changes that occur for the laid-off worker. The workbook outlines activities and followup information for the readers to assess their personal situations, make effective decisions, set goals, and develop action plans. It assumes that a job search is only one of many options available to the laid-off worker, and notes other options such as occupational change, return to school, semi-retirement, and entrepreneurship. Descriptions of the personal experiences in dealing with layoffs are included throughout the workbook.

Credit, Interest Rate Spreads and the Monetary Policy Transmission Mechanism : proceedings of a conference

Credit, Interest Rate Spreads and the Monetary Policy Transmission Mechanism. Conference (1994 : Ottawa, Ont.). Ottawa : Bank of Canada, 1995. xi, 305 p. : ill., Bibl. French ed. (Le Crédit, les écarts entre Taux...). : 96-00251/4. ISBN 0-660-16171-0 MICROLOG 96-00288 (4 fiche)

This volume contains seven papers and summaries of discussions from a conference on the transmission of monetary policy. Subjects of the papers include a survey of the literature on the monetary policy transmission mechanism, financial intermediation, and interest rate differentials; Intermediated finance, inventory investment, and the monetary policy transmission mechanism; business cycles and the credit allocation process; the importance of business size in relation to the response to economy-wide developments that affect aggregate demand or to changes in monetary conditions; capital markets, financing, and monetary policy; credit as a transmission mechanism for monetary policy; and endogenous buffer-stock money.

Créer des liens familiaux de convivialité : une réflexion conjointe sur les familles, l'immigration et les communautés culturelles à l'occasion de l'Année internationale de la famille

Québec : Gouvernement du Québec, Conseil de la famille ; Montréal : Conseil des communautés culturelles et de l'immigration, 1995. 87 p. : Bibl. ISBN 2-550-24492-3 MICROLOG 96-00014 (1 fiche)

Cette réflexion scrute la littérature théorique et empirique touchant la diversité ethnoculturelle des familles du Québec afin de décrire la dynamique de l'intégration des familles des communautés culturelles à la société d'accueil. Il s'agit notamment de : présenter les principes et les orientations avancés dans les politiques québécoises en ma-

tière familiale et en matière d'immigration et d'intégration des immigrants et des Québécois des communautés culturelles; relever et décrire, sur la base des principales données disponibles, les caractéristiques essentielles des familles immigrantes et de celles des communautés culturelles établies au Québec, en les comparant, dans la mesure du possible, aux autres familles de la société d'accueil; décrire la dynamique de l'intégration des membres de la famille à la québécoise, qu'ils soient nés au Québec, ailleurs au Canada ou dans une autre société; et, identifier des orientations pour favoriser et soutenir l'intégration des familles immigrantes.

Criteria for managing contaminated sites in British Columbia

Victoria : BC Environment, 1995. 14 p.
MICROLOG 96-00055 (1 fiche)

This document presents criteria which are to be used to develop site-specific management goals for contaminated sites in British Columbia and to develop limits for contaminants in soil and water, where chemicals from spills and industrial releases have caused contamination and pose risks to human health, to the environment, and to the safety of infrastructure such as underground services. The document defines two general types of criteria: numerical, or concentrations of substances providing a basis for defining when a site is a contaminated site and for establishing site-specific remediation goals; and risk-based, with levels set to protect the public from unacceptable health impacts. The two types of criteria are set out in tables for contaminants in soils and in water.

Culture and capture of fish in Chinese reservoirs

By Sifa Li and Senlin Xu. Ottawa : International Development Research Centre ; Penang, Malaysia : Southbound, 1995. xii, 128 p. : ill., Maps, Bibl.
MICROLOG 96-00477 (2 fiche) (Available on fiche only)

Reservoir fisheries involves the management of fish resources, fish culture, and fish capture. Reservoir fisheries is a relatively new industry in China, which has reached an unprecedented stage of development over the past decade. This book is a translation of a Chinese text on reservoir fisheries, originally published in 1989, excluding those portions of the Chinese text already available in English. Topics covered by the text include the hydrological and physicochemical characteristics of reservoirs; natural food organisms such as plankton, aquatic macrophytes, and benthos; development of fish resources such as carp and catfish; assessment of fish productivity in reservoirs; culture of large-size fingerlings; fish stocking; management of natural fish resources, including control of predators and low-value species, enhancement, and protection; barrier fences, nets, and screens; and harvesting pelagic, demersal, and predatory fish species.

De l'aide sociale à la sécurité du revenu : rapport statistique, 1992-93

Pierre Gagné...et al. Québec : Gouvernement du Québec, Ministère de la sécurité du revenu, 1994. iii, 235 p. : ill. ISBN 2-550-29529-3
MICROLOG 96-00373 (3 fiche)

Ce rapport statistique fait état de l'évolution mensuelle et présentent les caractéristiques de la clientèle globale qui participe au programme de soutien financier accordé par le Québec. Ce rapport statistique comporte 10 sections qui s'articulent autour de 3 grands axes. Le 1er axe consiste en une présentation des statistiques sur les

clientèles des programmes Soutien financier et APTE (clientèle des ménages ou adulte, selon âge, sexe, scolarité, lieu de naissance, etc.). On y retrouve également une mise en parallèle de la situation du Québec avec celle de l'Ontario. Le 2e axe introduit certains concepts tels que: clientèle annuelle, entrées et sorties annuelles, taux de participation annuels. On applique ces concepts à l'aide de dernier recours, à la participation aux mesures de développement de l'employabilité et d'aide à l'intégration à l'emploi (programme PAIE). Le 3e axe aborde la clientèle du programme APPORT. Finalement, un lexique vient compléter ces sections.

A Deadly affair : smoking-attributable deaths, British Columbia, 1985 and 1989

By R.M. Strohmaier and W. Hu. Victoria : BC Ministry of Health & Ministry Responsible for Seniors, Vital Statistics, 1993. 19 p. : ill., Bibl.
MICROLOG 96-00424 (1 fiche)

This paper examines the extent and general nature of cigarette smoking-attributable deaths in British Columbia. It begins with a discussion of cigarette smoking and cessation effects on mortality, with reference to published studies, and then reviews results of surveys of smoking in Canada. The paper describes a number of methodologies used for determining smoking-attributable deaths and applies a preferred methodology to estimate the number of adult smoking deaths and potential years of life lost in British Columbia for 19 diseases for the years 1985 and 1989. Tables present the smoking-attributable deaths and mortality rates by diagnostic category. The paper ends with a discussion of risk factors and of trends in smoking-related mortality.

Decision support system for generation scheduling

By Richard Allen, Trygvi Olason and Stuart Bridgeman. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operation Section, Power Resource Planning & Operation Subsection, 1995. 20 p. : ill. Presented at Electricity '95.
MICROLOG 96-00114 (1 fiche)

Short-term generation scheduling can be defined as the task of establishing a feasible generation unit commitment and dispatch schedule for each available resource in a power system over a prescribed scheduling horizon at minimum cost, subject to such constraints as specified load forecasts, operating costs, and reserve requirements. This paper describes the background studies and development work conducted to derive a framework for a general decision support system to be used by Canadian utilities for unit commitment and short-term generation scheduling. The framework has four components: a graphical user interface, application modules, and two data base management system components. The paper details the decomposition of the scheduling problem into a unit commitment problem and an economic dispatch problem in which thermal and hydroelectric generation, transmission, and capacity reserves are formulated.

Decommissioning of a coal fired generating station with reference to the environmental codes of practice for steam electric power generation, decommissioning phase

By John K. Underwood and Terrence P. Toner. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Thermal & Nuclear Power Section, Environmental Requirements Subsection, 1995. 19 p. : *Bibl. Presented at Electricity '95*. MICROLOG 96-00176 (1 fiche)

Nova Scotia Power initiated the decommissioning of the 15-megawatt Maccan coal-fired generating station in early 1992. The strategy adopted for decommissioning was designed to meet provincial regulatory requirements, to minimize liabilities for the company, and to leave the station site in a condition acceptable for future industrial use. This paper discusses the staged environmental site assessment process followed, from decommissioning planning to post-remediation monitoring. The paper also evaluates the usefulness of the recently developed Codes of Practice for Steam Electric Power Generation, Decommissioning Phase, in the Maccan decommissioning process. CA EN EV PW SC

Defensible methods for pre- and post-development assessment of fish habitat in the Great Lakes, I : a prototype methodology for headlands and offshore structures

C.K. Minns...et al. Burlington, ON : Dept. of Fisheries & Oceans, Great Lakes Laboratory for Fisheries & Aquatic Sciences, 1995. xiii, 65 p. : *ill., Maps, Bibl.* (Canadian manuscript report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2328 ISSN 0706-6473) CCG-P no. Fs 97-4/2328 MICROLOG 96-00252 (1 fiche)

This report presents a prototype methodology for use in the Great Lakes for pre- and post-development assessment of inshore fish habitat, focusing on shoreline development projects that involve construction of headlands or offshore structures such as islands. The purpose of the methodology is to provide a quantitative, defensible assessment protocol which project proponents and fish managers can use to assess compliance of projects with the federal policy of no net loss of fish habitat in development. The protocol combines published habitat requirements of three thermal guilds of Great Lakes fishes with areal estimation of lost or modified inshore habitat. The method also attempts to estimate adjacent habitat indirectly affected by the structures. A case study of a marina in Hamilton Harbour illustrates use of the protocol in assessing such matters as the effect of the development on fish habitat suitability and fish productivity. A Design basis tornado loading for transmission lines in Ontario

By M.F. Ishac, K.Y. Kong and A.P. Goel. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Transmission Section, 1995. 9 p. : *Bibl. Presented at Electricity '95*. MICROLOG 96-00134 (1 fiche)

Southwestern Ontario has experienced the greatest tornado incidence in Canada, with about one or two tornadoes per 10,000 square kilometers to be expected annually. Tornadoes are the most common cause of weather related transmission tower failures in the province. Although the probability of a transmission line being crossed by a tornado is significant, the fact that the width of the tornado path is very narrow provides the possibility for improving transmission line resistance to tornadoes at reasonable cost. This paper investigates the effect of tornado loads on transmission lines and proposes a design basis tornado loading for transmission towers. The paper evaluates the practical implications of applying this design basis tornado loading on an Ontario Hydro standard double-circuit 500-kilovolt tower. CA EN ON SC

Design, installation and maintenance of stator wedging systems for hydrogenerators

By Jim Bernard and Jim Ferguson. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Hydraulic Power Section, 1995. 24 p. : *ill. Presented at Electricity '95*. MICROLOG 96-00072 (1 fiche)

Wedges are used to secure the conductors in the stator slots on hydrogenerators. Problems with loose wedges became nearly universal with the introduction of thermosetting materials in the insulation of the stator conductors in the late sixties. This paper reviews aspects of the design of stator wedging, including calculation of thermal expansion, electromagnetic forces, and thermal stresses, the application of installation preload, the need for flexibility or springs in the wedge system, wedge configurations, wedge materials, and materials testing. It then describes proper installation and inspection procedures, maintenance, and operating experi-

ence with different types of stator wedging systems.

Detection and monitoring of fault gases in oil-filled transformers applied to a Reliability Centered Maintenance (RCM) program

By Jean-Pierre Gibeault and Brian D. Sparling.
Montreal : Canadian Electrical Assn, 1995. 13 p. : *ill.*, *Bibl.* Presented at *Electricity '95*.
MICROLOG 96-00161 (1 fiche)

The early detection of incipient faults in transformers, critical and costly elements of an electric power system, results in significant benefits such as reduction of unplanned outages and facilitating planned maintenance. This paper reviews the process of transformer fault detection based on analysis of gases produced in the transformer insulating oil as a result of fault-induced degradation of the oil and of cellulosic insulation. It describes the Hydran technology used for continuous monitoring of those gases (primarily hydrogen and carbon monoxide, common indicators of transformer faults) and the application of incipient fault detection and monitoring to transformers as part of a reliability centered maintenance program. Five cases from Canadian electric utilities are documented to demonstrate the advantages of such an application.

Development of an all ceramic composite glow plug : final report

By S. Das Gupta...et al. Montreal : Transportation Canada, Policy & Coordination, Transportation Development Centre, 1994. xiv, 70 p. : *ill.*
MICROLOG 96-00436 (2 fiche)

Glow plugs are needed as an aid to compression ignition in indirect ignition diesel engines, and are also required for alcohol-fuelled direct injection diesels and for cold-starting conventionally fuelled diesels. To overcome problems such as slow response time, corrosion, and low operating temperatures associated with traditional metal or metal/ceramic glow plugs, Electrofuel Manufacturing has developed an all-ceramic glow plug in which the ceramic itself is the heating element. The Electrofuel glow plug features very fast response time, high resistance to corrosion, and excellent thermal shock properties. This report presents results of diesel engine tests using the Electrofuel glow plug, including thermal shock tests, durability and corrosion/erosion tests, and engine tests using high-sulfur fuel.

Development of phase-to-phase spacer for 275-kV transmission lines in Hokkaido Electric Power Co., Inc.

Hisayuki Oura...et al. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operating Section, Electrical Performance of Insulators Committee, 1995. 15 p. : *ill.*, *Bibl.* Presented at *Electricity '95*.
MICROLOG 96-00107 (1 fiche)

The Hokkaido Electric Power Company service area is in the northernmost part of Japan, with very severe environmental conditions in winter for transmission lines. Given the importance of preventing flashover faults between phase conductors due to snow/ice effects and line galloping, the company designed and developed phase-to-phase spacers for use on 275-kilovolt transmission lines. This paper describes the design, development, and testing of porcelain-type and polymer-type insulator/spacers. The paper includes design specifications and results from laboratory electrical and mechanical tests, an artificial sleet jump test, field tests on a test line, and operational tests on actual transmission lines in Japan.

Diagnostic testing and repair of Hollingsworth Generating Station's unit one

Authors: Rick Atkins...et al. Montreal : Canadian Electrical Assn, Hydraulic Power Section, Equipment Rehabilitation Subsection, 1995. 9 p. : *ill.* Presented at *Electricity '95*.
MICROLOG 96-00087 (1 fiche)

This paper presents a case history of the diagnosis of a hydroelectric generator problem and the corrections implemented. The problem involved an excessive rotor imbalance coupled with a static air gap imbalance that cause severe load-sensitive vibrations. The problem constrained the plant from operating the generator unit throughout the range of its nameplate rating and caused periodic failure of the generator guide and thrust bearing. The paper describes the vibration survey and mechanical survey of the generator rotor, the pre-overhaul diagnosis, the repairs undertaken to the rotor, and the generator performance after the repair, with comparison to the pre-repair condition. The paper concludes with a discussion of the economic, operational, and logistic issues involved in the overhaul.

The Dietary Intake, excretion and dosimetry of carbon-14

By R.M. Brown and L.A. Chant. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. vi, 28 p. : *ill.*, *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0510)
MICROLOG 96-00659 (1 fiche)

This report reviews the current status of models for estimating carbon-14 doses to the general population and to radiation workers. The review involved an extensive literature survey performed to check, whenever possible, the origin and validity of parameters in a metabolic model developed by Whillans and Johnson (to be used as a sub-module of GENMOD, a program for internal dosimetry of various radionuclides). The review also includes an assessment of the International Commission on Radiological Protection Retention Model. The report concludes with suggestions for future work that would improve the state of carbon-14 dose estimation.

Directions for change : a consultation paper on the Senior High School Program, education reform curriculum

St. John's : Dept. of Education & Training, Royal Commission Implementation Secretariat, 1995. vi,

192 p. : ill. Summary report (II, 28 p.) laid in. On cover: *Our children, our future*. MICROLOG 96-00636 (3 fiche)

This report presents results of a review of the Newfoundland senior high school program which examined the program structure, scheduling, program and delivery issues, curriculum and instruction, specific disciplines within the program, guidance and career education, and student assessment and certification. The review compares the program in Newfoundland with that in other Canadian provinces and in other countries with respect to philosophy and goals, number and sequence of courses, degree of rigor within discipline areas, provisions made for students of differing academic ability, and organizational structures to facilitate program delivery. The review also proposes a structure and program for the senior high school, recommends an operational structure, and makes recommendations regarding levels of guidance and procedures for student evaluation and certification. A Discussion of the potential cost-effectiveness and efficiency of alternative dispute resolution

By Jade C. Cole. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Law Reform, Research & Development Directorate, 1993. 36 p. : *Bibl.* (Technical report / Canada. Dept. of Justice. Research Section ; TR1993-5e) MICROLOG 96-00425 (1 fiche)

Alternative dispute resolution (ADR) refers to relatively informal techniques designed to settle disputes without the costs and delays associated with the traditional adversarial process. ADR incorporates the use of a number of different processes, such as mediation, arbitration, conciliation, negotiation, mini-trials, and private judging programs. This paper discusses the potential cost savings and benefits to be derived from the use of ADR as compared with the adversarial process. The discussion considers both monetary costs (for lawyers, legal aid, courtroom operating expenses, and time devoted to the process by the parties, witnesses, jurors, court staff, and judges) and non-monetary costs resulting from lost time, emotional burden, non-compliance with court decisions, and the fact that courts just treat the legal aspect of the dispute and not its underlying cause. CA CI JU ND SS

A Discussion paper on contaminated site liability

Regina : Saskatchewan Environment & Resource Management, 1994. 61 p. MICROLOG 96-00492 (1 fiche)

This paper has been prepared to facilitate discussion on possible resolution of the major policy issues respecting contaminated site liability in Saskatchewan. The paper examines the province's current legislative base and reviews a process that Saskatchewan Environment & Resource Management proposes as one means of addressing the issue of contaminated site liability. The paper also notes the approaches to contaminated site liability in other provinces. The proposed approach for Saskatchewan is based on satisfying the five underlying principles set out by the Canadian Council of Ministers of the Environment, as well as eight specific principles recommended by the Council. The approach follows a model that deals with major policy issues connected in a sequential basis: site identification, identification of potentially responsible persons, exemptions, allocation of liability, dispute resolution, remediation, and delisting of a contaminated site. EV MS PR SC

La Disponibilité des armes à feu et les suicides commis au moyen d'une arme à feu

Par Sharon Moyer et Peter J. Carrington. Ottawa : Ministère de la Justice Canada, Secteur de la gestion, politiques et programmes ministériels, Direction générale de la recherche et de la statistique, 1992. xi, 109 p. : ill., *Bibl.* (Document de travail / Canada. Ministère de la Justice. Section de la recherche ; WD1993-3f) *L'éd. anglaise (Gun availability and firearms suicide) : 96-00452/2*. MICROLOG 96-00443 (2 fiche)

Le public et les médias s'intéressent surtout au contrôle des armes à feu à cause de leur utilisation pour commettre des crimes graves, particulièrement des homicides, mais les homicides ne constituent, en fait, qu'une faible proportion des décès causés par l'utilisation d'une arme à feu au Canada. Ce document se penche précisément sur la disponibilité des armes à feu et les suicides commis au moyen d'une arme à feu. Les points qui y sont abordés sont : les méthodes de recherche utilisées; les publications spécialisées; les facteurs liés aux modes de suicide; les différences dans les modes de suicide choisis, selon la province; et, les variations dans les taux de suicide au Canada, entre 1965 et 1989. Documentation of computerised safety systems of nuclear power stations

By D.L. Parnas. Ottawa : Atomic Energy Control Board, 1995. viii, 99 p. : ill., Bibl. (Research report / Canada. Atomic Energy Control Board ; INFO-0505)
MICROLOG 96-00654 (2 fiche)

The hardware and software of safety-critical computer systems must be subjected to a systematic and detailed review. Careful review of such complex systems requires documentation that is complete, precise, and systematically organized. This guideline provides requirements for documentation at each stage of computer system design. The principles applied in developing these requirements include best available practice including the use of formal (mathematical) techniques; top-down design and documentation methods; modularity; verification of each set of design decisions; and auditable documentation using tabular representations of mathematical functions. The guideline uses basic mathematics to define the content of each document rather than its format, and the contents of each document are defined in terms of mathematical equations. Examples of the documents mentioned are included in the appendices.

Domestic homicides involving the use of firearms

Dansys Consultants Inc. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Research & Development Directorate, 1992. xiii, 58 p. : Bibl. (Working document / Canada. Dept. of Justice. Research Section ; WD1992-20e) French ed. (*Les Homicides familiaux...*) : 96-00527/1.
MICROLOG 96-00503 (1 fiche)

This report contains the results of a detailed study of domestic homicides involving firearms, conducted with two primary objectives: to identify the common factors that exist in such incidents, and to address various means for applying this information and ultimately preventing those incidents. The main components of the study included a literature review, an examination of historical trends since 1975, and a survey of police officers involved in the investigation of each domestic homicide involving a firearm that occurred during 1989 and 1990. The case study sample included 93 incidents involving 103 victims and 98 accused. Correlating variables examined included the previous involvement of victim and accused in violent disputes, use of alcohol at time of incident, criminal record of accused, and the employment status of the accused.

Duty counsel systems : summary report

Prairie Research Associates. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1993. 44 p. (Technical report / Canada. Dept. of Justice. Research Section ; TR1993-12e)
MICROLOG 96-00490 (1 fiche)

This report summarizes the main findings and observations from a detailed technical report (fiche

96-00468) on legal aid duty counsel. The research for that report proceeded in two ways: an extensive and comprehensive review of duty counsel in all Canadian jurisdictions, undertaken to allow a degree of comparison among provincial systems; and an intensive examination of duty counsel systems in Ontario, New Brunswick, British Columbia, and Manitoba. This summary report outlines the general role of duty counsel, the legislative context, and the types of duty counsel services provided. The summary then discusses implications of the review findings for legal aid services and notes the strengths and weaknesses of the duty counsel systems. Issues discussed include counsel qualifications, access to services, counsel quality and performance, services for special groups, and the impact of court decisions on duty counsel services.

Duty counsel systems : technical report

Prairie Research Associates. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1993. ii, 209 p. (Technical report / Canada. Dept. of Justice. Research Section ; TR1993-12e)
MICROLOG 96-00468 (3 fiche)

Duty counsel is legal assistance rendered without charge to accused making court appearances. This service is provided under a variety of legal aid plans in Canada. This report provides a comprehensive and detailed overview of the duty counsel services in Canada where there are permanent courts, and reviews the rationales and philosophical bases for duty counsel in each Canadian jurisdiction and among the various segments of the justice system. The report also discusses alternative ways in which the duty counsel is provided and the implications of these approaches on the rights of the individual and on court costs. The report includes case studies of duty counsel services in Ontario, British Columbia, Manitoba, and New Brunswick, and presents results of a large-scale mail survey of duty counsel lawyers. Issues surveyed include services provided, quality of counsel, training, and the impact of Supreme Court decisions.

L'Écart persistant : étude de la différence dans les gains des hommes et des femmes qui ont récemment reçu un diplôme d'études postsecondaires

Par Ted Wannell. Ottawa : Statistique Canada, Direction des études analytiques, 1989. 63 p. (Documents de recherche / Statistique Canada. Direction des études analytiques ; no 26) L'éd. anglaise (*The Persistent gap...*) : 96-00249/1.
MICROLOG 96-00244 (1 fiche)

Ce rapport se concentre sur la différence entre les gains des hommes et ceux des femmes pour un groupe très fermé, les diplômés de 1982 des universités et des collèges communautaires qui travaillaient à plein temps en 1984 ou en 1987. Deux enquêtes, l'enquête nationale auprès des diplômés (1984) et l'enquête de suivi auprès des diplômés (1987), fournissent des renseignements sur les expériences sur le marché du travail au cours des cinq premières années qui ont suivi l'obtention du diplôme et donc un regard unique sur l'écart entre les gains des hommes et ceux des femmes. La discussion qui termine le document porte sur trois sujets. Premièrement, on offre quelques explications de l'écart plus considérable entre les gains au niveau des diplômés des collèges communautaires. Deuxièmement, on discute d'améliorations qui pourraient être apportées au modèle multidimensionnel. Finalement, on traite de la difficulté de "prouver", à partir de données d'enquête, qu'il y a discrimination.

Economic assessment of HVDC links

By M.H. Baker. Montreal : Canadian Electrical Assn, Electrical Apparatus, Station Equipment Session, 1995. 14 p. : ill. At head of title: *Paper #73. Presented at Electricity '95*.
MICROLOG 96-00160 (1 fiche)

There are two fundamental uses of high voltage direct current (HVDC) transmission: to interconnect systems where alternating current (AC) is either impractical or more expensive; or to supplement or replace AC transmission within an existing system. This paper presents some examples of successful applications of HVDC transmission and discusses methods of economic assessment of HVDC links. These include a simple comparison of alternative equipment which achieves the intended purpose, and evaluation of the payback period. The paper indicates how benefits of HVDC such as enhancement of system stability can be taken into account in the economic evaluation.

An Economic evaluation of forest improvement opportunities and impacts from a biomass fuel market at an energy co-generation facility in southwestern Nova Scotia

By Alexander L. Manley. Fredericton : Natural Resources Canada, Canadian Forest Service, Maritimes Region, 1994. v, 62 p. : ill., Bibl. On cover: *ENFOR, Energy from the Forest*.
MICROLOG 96-00247 (1 fiche)

A significant market for forest biomass for energy purposes exists in southwestern Nova Scotia. The supply area of 416,000 hectares produces a million cubic meters of wood products annually, which will supply an additional 400,000 tonnes to produce 25 megawatts of energy. The presence of this market creates an opportunity to examine options for integrating planning, harvesting, and silviculture more closely to enhance end-use allocation and overall economic efficiency. This report develops a framework, methodology, and analytical techniques to evaluate those options and assess their potential impact on forest management. The methodology included collection of details on the area's forest management and market situation, calculation of growth and yield of a mix of products, quantification of silviculture and harvest costs, and development of a forest-based analytical model. The report also makes recommendations on the further use of the model.

Economic impact at the stand level of changes in growth and yield, and stand establishment following removal of biomass for energy, with and without compensatory fertilization

By Pierre Zundel. Fredericton : Natural Resources Canada, Canadian Forest Service, Maritimes Re-

gion, 1994. viii, 46 p. : ill., *Bibl.* On cover: ENFOR, *Energy from the Forest*.
MICROLOG 96-00238 (1 fiche)

This report begins with presentation of a literature search on the impacts of full-tree and stem-only harvesting on future productivity of forest sites, with or without compensatory fertilization using wood ash. The report then describes a hypothetical case study, based on a spruce-fir stand in northwestern New Brunswick, which is intended to illustrate an analysis of the net effect on forest site productivity from full-tree harvesting with or without fertilization. The study estimated the costs of artificial regeneration of the site, revenues from energy biomass sales, cumulative loss of tree volume over a rotation due to removal of nutrients, and the addition of wood ash. The study includes sensitivity analyses to assess the impact on the results of biomass price, ash application cost, discount rate, and cumulative growth loss under full-tree harvesting.

Elder mistreatment : towards the development of a standardized definition

By Alexander Abdennur. Ottawa : Dept. of Justice, Research Section, 1990. v, 23 p. : *Bibl.* (Technical report / Canada. Dept. of Justice. Research Section ; TR1991-4)
MICROLOG 96-00417 (1 fiche)

The purpose of this paper is to support the development of a clear and standard definition of elder abuse, a major focal point in Canada's family violence initiative. The paper begins with a discussion of the complexities involved in the subject of elder abuse, noting the wide range of behaviors that have been included in definitions of the term and the consequences of responding differently to these complexities with diverse definitions. The paper then presents four basic concepts of elder abuse (physical abuse, psychological abuse, neglect, and financial abuse) and other conceptualizations and measures. Finally, it develops a framework from which a uniform and viable definition could be established, and introduces and explains a new concept that the author believes should be incorporated into a definition of elder abuse. The paper concludes with a recommendation regarding the process that should be followed in establishing a standard definition.

An Empirical study of sentencing practices and trends : assault with a weapon or assault causing bodily harm, 1985-92

By Sherilyn A. Palmer. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1993. 133 p. : ill., *Bibl.* (Technical report / Canada. Dept. of Justice. Research Section ; TR1993-14e)
MICROLOG 96-00397 (2 fiche)

This is the first quantitative/qualitative study to analyze unreported oral judgments and reported caselaw in order to provide baseline information about national sentencing trends and practices for the offense of assault with a weapon or assault causing bodily harm. The purpose of the study was to obtain an understanding of the nature and length of sentences handed down to the accused and to learn more about the victims of the offenses. Research methodology included searches of major and supplementary databases covering all court levels. Four questions guided the data analysis: the nature and frequency of sentences for the offenses studied; the specific factors attributed by the courts to differentiate offenders and offenses when determining length of sentence; who the victims are and what is their relationship to the accused; and which principles of sentencing are enunciated by the courts.

Endogenous innovation and growth : implications for Canada

By Pierre Fortin and Elhanan Helpman. Ottawa : Industry Canada, 1995. iii, 60, iii, 66 p. : *Bibl.* (Occasional paper / Canada. Industry Canada ; 10) *Bilingual (Innovation endogène etc...)*.
MICROLOG 96-00483 (2 fiche)

The standard of living of a population is closely related to real national income per capita, an indicator of the quantity of goods and services the average member of society can purchase with his or her income in a given year. This paper looks at endogenous innovation and growth. It is divided in four parts. Chapter 1 reviews the evidence of Canada's growth. Chapter 2 discusses various factors that contribute to labour productivity such as capital accumulation, exogenous technological progress, human capital accumulation and learning by doing. Chapter 3 is devoted to a detailed discussion of endogenous innovations. Chapter 4 gives a description of the links between international economic transactions and endogenous innovation and growth.

Enhancement of insulation systems with extended use of corona resistant materials

By R.E. Draper and R.H. Rehder. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Hydraulic Power Section, Hydraulic & Rotating Electrical Equipment Subsection, 1995. 5 p. : ill. Presented at Electricity '95. On cover: GE Canada, Power Systems & Services, Engineering Laboratory.
MICROLOG 96-00074 (1 fiche)

By developing new, thinner insulation systems which can provide high reliability in service, motors and generators can be designed to be more economical due to smaller size and/or higher efficiency. This paper reviews insulation failure modes in high-voltage coils used in rotating machines, notably the corona-induced failure of polyethylene terephthalate materials commonly used in insulation. The paper then outlines aspects of the design of insulation systems to operate at high operating stresses up to 4.72 kilovolts per millimeter. It also notes the development of an insulating enamel with corona resistant characteristics which enables reduction of groundwall insulation thickness without decreasing the insulation system performance.

L'Enquête préliminaire : est-elle toujours nécessaire? Propositions de modification au Code criminel : document de consultation

Ottawa : Ministère de la Justice Canada, 1995. 26, 22 p. : Bibl. Bilingue (Do we still need preliminary...).
MICROLOG 96-00484 (1 fiche)

Le ministère de la Justice du Canada entreprend actuellement une consultation très vaste afin de connaître toutes les perspectives concernant les propositions variées de réforme de l'enquête préliminaire. Ce document se penche sur les modifications que l'on propose d'apporter. Plus précisément, on y aborde les points suivants : les principes qui sous-tendent notre système de justice pénale; l'objet de l'enquête préliminaire; la compétence du juge de paix président l'enquête préliminaire; le choix de subir une enquête préliminaire; l'utilité de l'enquête préliminaire; la jurisprudence récente; les critiques de l'enquête préliminaire; les avantages de l'enquête préliminaire; les demandes visant la modification du processus d'enquête préliminaire; et, le cadre d'une réforme du droit.

The Environmental approvals process in Alberta

By J.M. Hackett. Montreal : Canadian Electrical Assn, Thermal & Nuclear Power Section, 1995. 15 p. : Bibl. Presented at Electricity '95. On cover: Utility Thermal Plant Operators Session.
MICROLOG 96-00101 (1 fiche)

New environmental legislation in Alberta introduced an approval process to replace the permitting and licensing provisions of the Clean Air and Clean Water Acts. The new supporting regulations increased the amount of information necessary in a power plant approval application and required public involvement in the approval process. The new approvals consolidate all aspects of environmental management into one regulatory document, creating new requirements and restrictions but also offering opportunities and flexibility in regulating an industrial facility. This paper describes Alberta Power's experience with the new approval process in obtaining workable approvals for operation of the Sheerness and Battle River generating stations. It identifies modifications made to existing approvals and makes recommendations on facilitating the approval process.

Environmental assessment procedure for Hydro-Quebec's distribution system projects

By Robert Brisebois and André Boisvert. Montreal : Canadian Electrical Assn, 1995. 10 p. Presented at Electricity '95. At head of title: Field: rights of way, landownership and environment.
MICROLOG 96-00146 (1 fiche)

The widespread impact of the Hydro-Quebec distribution system on the environment, combined with public concerns about system installations, have prompted the utility to implement internal environmental assessments for distribution systems in order to comply with internal environmental policy. These assessments are an innovative and proactive approach to managing environmental impacts that allow consideration of the different environmental elements of the host environments and integration of distribution systems into these environments while minimizing potential impacts. This document describes the Hydro-Quebec internal environmental assessment process and a pilot project conducted to evaluate the process in the Milles-Iles sector north of Montreal. This will be followed by province-wide implementation, in cooperation with telephone companies.

Environmental assessment requirements and process for hydroelectric rehabilitation in Ontario Hydro

By M.S. Yu. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Hydraulic Power Section, 1994. 9 p. : ill. Presented at Dealing with Hydraulic Power Plant Rehabilitation, part of Electricity '95.
MICROLOG 96-00178 (1 fiche)

Ontario Hydro owns and operates 69 hydroelectric stations, the average age of which is nearly 60 years. To ensure the continued reliable and safe operation of these facilities, the utility has initiated renewal programs to rehabilitate and modify them. Depending on the nature of the modification or rehabilitation activities, Ontario Hydro must meet environmental assessment requirements and obtain the appropriate approvals. This paper describes the special approval mechanism developed for modification projects and the environmental assessment planning process used by Ontario Hydro. This process has three phases, including identification of the problem or opportunity and selection of the preferred alternative, environmental screening and reporting, and implementation of the project and its mitigation measures. The paper concludes with an outline of efforts to harmonize the federal and provincial environmental approval processes.

Environmental dispatch using Hopfield neural networks

By T. Denise King, M.E. El-Hawary and Ferial El-Hawary. Montreal : Canadian Electrical Assn, 1995. 25 p. : ill. Bibl. Presented at Electricity '95.
MICROLOG 96-00119 (1 fiche)

Methods used by thermal power plants to comply with environmental emission standards include burning higher-quality fuel, replacing or upgrading older plants, and using alternate, emission-free forms of energy. Some of these methods are costly and require time to implement. In the interim, emission levels can be reduced through economic/environmental dispatching of thermal generating units. This paper presents an improved Hopfield neural network simulator developed for the optimal economic/environmental dispatching of thermal generating units in an electric power system. The paper describes the criteria used for selecting the simulator parameters in order to obtain the optimum dispatch in the minimum number of iterations. Particular emphasis is given to the study of the effects of variations in the selection of Hopfield network parameters, both with respect to the final

result and the number of iterations required to reach a final solution.

Estimation of wind-on-ice loads from historical extreme wind and ice data

By Samy G. Krishnasamy and S. Kulendran. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Transmission Section, 1995. 7 p. : Bibl. Presented at *Electricity '95*.
MICROLOG 96-00128 (1 fiche)

None of several current approaches to calculate combined wind and ice (wind-on-ice) loads from meteorological data utilize the available extreme ice and wind data. The most probable reason for the lack of effort in this area may be the considerable amount of time and cost involved. This paper outlines a comprehensive procedure being developed to determine the appropriate combination of annual extreme wind and ice values for calculating wind-on-ice loads on conductors. The procedure uses meteorological and derived data such as annual extreme wind speed, annual extreme ice thickness and wind-on-ice load for 30 weather stations in Ontario. A typical set of data generated for the Toronto airport weather station is shown, and these preliminary results are discussed.

Une Étude de l'efficacité de la disposition relative au Get contenue dans la Loi sur le divorce

Par Giti Mizrahi. Ottawa : Ministère de la justice Canada, Secteur des politiques et programmes ministériels, Sous-direction de la recherche et du développement, 1992. vi, 25 p. : *Bibl.* (Document de travail / Canada. Ministère de la justice. Section de la recherche ; WD1992-24f) *L'éd. anglaise* (A Review of the effectiveness...) sur la même fiche.

MICROLOG 96-00528 (1 fiche)

Selon la loi juive, lorsqu'un homme et une femme veulent divorcer, ils doivent obtenir un divorce religieux, que l'on appelle un Get. Le Get est un document habituellement rédigé par un scribe à la demande de l'époux. On y inscrit les noms des deux conjoints concernés, la date et le lieu de la rédaction du Get, et on y déclare que les présentes constituent un jugement de divorce effectuant la dissolution du mariage. Cette étude tente de déterminer dans quelle mesure les modifications à l'article 21.1 de la Loi sur le divorce ont réussi à diminuer l'utilisation du Get comme moyen de négociation ou de chantage. On y compare en particulier l'emploi actuel du Get comme instrument de négociation avec l'emploi qu'on en faisait avant l'adoption des modifications, grâce à une analyse comparative des résultats de l'étude antérieure de B'nai Brith.

An Evaluation of phase III of the Child Advocacy Project

WMC Research Associates (Man.) Ltd. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Research & Development Directorate, 1992. xii, 119 p. : *Bibl.* (Technical report / Canada. Dept. of Justice. Research Section ; TR1992-5e) MICROLOG 96-00410 (2 fiche)

Phase III of the Child Advocacy Project was designed specifically to monitor cases of child sexual abuse originating on Indian reserves in Manitoba. The specific objective of the project was to ensure that Native victims of child sexual abuse are protected and are provided appropriate service. This report presents an evaluation of the Project. It provides an overview of the Project, discusses the underlying issues of the evaluation, and describes the evaluation approach and methods, which included examination of case summaries and files, structured interviews, and attendance at Project meetings. The findings are reported under the following categories: project organization and infrastructure, support to victims and families, development of new perspectives on child sexual abuse, relationship to Native development issues, the justice and legal system, government departments and the social services community, educational programs, and the multidisciplinary team approach.

Evaluation of self-lubricating bushing materials

By R.A. Palytyk, D.E. Franklin and K. Hawthorne. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Hydraulic Power Section, Rotating Machines Subsection, 1995. 17 p. : *ill.*, *Bibl.* Presented at *Electricity '95*. MICROLOG 96-00084 (1 fiche)

This paper describes results of tests conducted to evaluate the performance of various types of self-lubricating bushings used in wicket gate applications for hydroelectric turbines. The test program involved accelerated aging in about 100 hours of controlled environment that simulated normal, two-year hydroelectric turbine wicket gate operation. The tests evaluated eleven commercially available self-lubricating bushings under both wet and dry operating conditions for fitness for service in hydroelectric generating stations. Bushing materials included lead-bronze graphite composites, epoxy resins, fabric composites with resin matrix, and polyurethane composites. The paper concludes with recommendations regarding the products to be used at BC Hydro installations.

Evaluation of the capacity value of a windfarm including the correlation between wind and demand

By Roger Lambert and Jocelyn Marcotte. Montreal : Canadian Electrical Assn, System Planning & Operation Section, Power Resource Planning & Operation Subsection, 1995. 20 p. : *ill.* Presented at *Electricity '95*. MICROLOG 96-00118 (1 fiche)

This paper presents a study of the capacity value of wind turbines, taking into account the combined random behavior of demand and wind, as well as the correlation between wind and power demand that exists in certain power systems such as the one operated by Hydro-Québec. The analysis is based on a 32-year history of hourly measurements of wind speeds at Mont-Joli, Québec, a statistical correlation study of the output of a 360-kilowatt wind turbine and an artificially generated history of hourly demand, and measurement of the peak capacity value of a 108-megawatt windfarm (300 wind turbines of 360 kilowatts each) using FEP (Generation Equipment Reliability) software. Results presented include load-shedding expectation in hours per year, variation in the capacity value as a function of load characteristics, and the sensitivity of the results to climatic conditions and to the wind correction factor used.

Evaluation of the Women's Advocacy Program, Winnipeg

Focus Consultants, C/S RESORS Consulting. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Research & Development Directorate, 1990. xix, 105 p. (Working document / Canada. Dept. of Justice. Research Section ; WD1991-16e) *French ed.* (*Évaluation du programme...*) : 96-00669/2. MICROLOG 96-00670 (2 fiche)

The Women's Advocacy Program was founded in 1986 as part of the Family Dispute Services Branch of Manitoba Community Services. Its overall goals are to assist spousal assault victims within the court process and to generally reduce the incidence and consequences of spousal violence. The Program provides four types of services: legal support and information; general counselling, support, information, and referrals; liaison with the criminal justice system on behalf of the victim; and training and education to the criminal justice and social service sectors. This report presents the results of an evaluation conducted to describe, document, and critically analyze the Program, and to assess the Program's impact on victims, on spousal assault cases, and on the social service and criminal justice

systems. The evaluation also addressed whether charging assailants is the most effective way of handling spousal violence.

Evaluation of Westinghouse Fast Gen II Robotics Inspection

By Frayne Donaldson. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Thermal & Nuclear Power Section, 1994. 13 p. : *ill.*, *Bibl.* Presented at *Utility Thermal Plant Life Management Conference, part of Electricity '95*. MICROLOG 96-00191 (1 fiche)

A Westinghouse FAST GEN II inspection consists of visually and electrically examining the stator of a generator without removing the rotor from the stator bore. FAST GEN inspection techniques are employed to conduct the examinations robotically or microelectronically to minimize disassembly. This paper describes the FAST GEN II inspection on the Unit 2 generator at the Sheerness power plant in Alberta. The purpose of the inspection was to check the generator stator wedges and to establish a baseline profile for future inspections. The inspection process included pre-planning, a limited degree of disassembly, inspection scheduling, video inspection of bore surfaces, wedge tightness testing using the impact/response technique and a robotic magnetic probe, and an electromagnetic core imperfection detector test. The paper concludes with a discussion of the savings and other advantages of the FAST GEN II inspection.

An Examination of Canadians' attitudes on the state of national unity

By Shirley Riopelle Ouellet. Ottawa : Dept. of Justice, Research Section, 1992. iii, 39 p. : *Bibl.* (Technical report / Canada. Dept. of Justice. Research Section ; TR1992-1a) MICROLOG 96-00400 (1 fiche)

This paper examines Canadians' attitudes towards national unity through a systematic review of public opinion data. The paper reviews general perceptions on the importance of keeping the country together, as well as data relating to the proposed federal constitutional package. Such data includes attitudes towards Senate reform, federal spending and opting-out provisions, a social charter, aboriginal self-government, recognition of Quebec as a distinct society, the decision-making process, and provincial versus federal jurisdiction over selected areas. Other issues considered include constitutional options for Quebec, the responsiveness of political institutions, federal-provincial relations, and the future of the constitution. BS CA CI ND PA SS

Expenditures on children by two parent families in Canada, phase II

By Martin Browning. Ottawa : Dept. of Justice, Research Section, 1991. 30 p. (Technical report / Canada. Dept. of Justice. Research Section ; TR1991-9a) MICROLOG 96-00405 (1 fiche)

A major component in determining the appropriate level of child support from a non-custodial parent is how much the parents spend on children before their divorce. This report presents one method for estimating such expenditures, based on comparing how much families with and without children spend. The method, called the consumption method, is grounded in the modern theoretical approach to the analysis of savings called the life-cycle hypothesis. The report discusses three problems with the consumption method and estimates expenditures on children from the data presented in Statistics Canada FAMEX surveys. Tables of ex-

penditures for various defined types of families are included, by province and gross family income. CA CO ND SA SS

Experiences with Department of Fisheries and Oceans' no net loss guiding principle at hydroelectric developments in Newfoundland

By E.L. Hill, L.J. LeDrew and D.J. Kiell. Montreal : Canadian Electrical Assn. Engineering & Operating Division, Hydraulic Power Section, Environmental Subsection, 1995. 14 p. : *Bibl.* Presented at *Electricity '95*. MICROLOG 96-00077 (1 fiche)

In 1986, the Department of Fisheries and Oceans introduced its Policy for the Management of Fish Habitat, which provides a framework for the conservation, restoration, and development of fish habitats as well as strategies for the implementation of its various components. A guiding principle of habitat conservation is the balancing of unavoidable habitat losses, such as from hydropower development, with habitat replacement according to a specified hierarchy of preferences. This paper describes the experience in applying that policy at the Long Pond Reservoir, part of the Bay d'Espoir hydropower system. The paper concludes with recommendations regarding implementation of the no-habitat-loss guiding principle. AP CA EN FI SC

An Exploratory study on the use of firearms in criminal incidents in Toronto

By Lee Axon and Sharon Moyer. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1994. xiv, 45 p. : *Bibl.* (Working document / Canada. Dept. of Justice. Research Section ; WD1994-19e) *French ed. (Etude exploratoire de l'utilisation d'armes...)* : 96-00562/1. MICROLOG 96-00561 (1 fiche)

This is a descriptive study that focuses on two major forms of crime in Metro Toronto: homicide and robbery with firearms. It also examines other incidents that led to the seizure of guns by police. The investigators conducted a detailed examination of the investigative files of police and collecting, to the extent possible, information on the circumstances surrounding these incidents, including the types of guns involved, the legal status of gun possession, the background of the offenders, and the charges laid. The final component of the study specifically addressed the nature of handguns that come into Toronto police possession. This was intended to provide further information on the types of handguns in circulation, the legal status of handguns, and the degree to which handguns may have been smuggled into Canada. Exploring the human dimension : research in the social sciences and humanities

Ottawa : Social Sciences & Humanities Research Council of Canada, 1994. 52 p. : *ill.*, *Bibl.* *French ed. (À la recherche du facteur...)* : 96-00545/1. ISBN 0-662-22866-9 CCG-P no. CR22-31/1994E MICROLOG 96-00546 (1 fiche) (Available on fiche only)

The Social Sciences and Humanities Research Council is an independent Crown corporation with a mandate for promoting and assisting research and scholarship in the human sciences. To achieve such goals as supporting research and advanced training, the Council has developed a variety of granting programs for basic and strategic research, international exchanges, scholarly publishing, and related activities. This publication outlines the overall function of the Council and highlights selected Council-funded research projects in the following areas: family issues, health care and its socio-economic and psychological challenges, socio-political issues related to the environment, and the Canadian cultural heritage (including archaeology, mu-

sic, history, lexicography, and publishing). The publication ends with an outline of Council facts and of how the Council awards its grants. CA CU ND SA SS

Extending logic grammars with ID-LP specifications

By Harvey Abramson and Veronica Dahl. Burnaby, BC : Simon Fraser University, Centre for Systems Science ; Laboratory for Computer & Communications Research, 1994. 17 p. : *Bibl.* (Technical report / Simon Fraser University. Centre for Systems Science and Laboratory for Computer & Communications Research (B.C.) ; CSS/LCCR TR94-15) MICROLOG 96-00021 (1 fiche) (Available on fiche only)

Immediate dominance/linear precedence (ID/LP) rules are a linguistic formalism devised to represent some phenomena such as free word order which had previously been described by linguistic metarules. Each ID/LP rule represents a set of simple rules which differ only in the order of their constituents. This paper shows how such rules can be embedded in logic grammar formalisms. It presents two logic grammar methods for the handling of ID/LP rules and free word order rules with discontinuous constituents. The first method is a simple extension that can be incorporated into any logic grammar, while the second uses static discontinuity grammars to achieve more expressiveness. Both approaches are concise in the sense that the underlying logic grammar rules with ordered constituents are not generated. These methods do not affect the processing of order dependent rules or parts of rules. The methods allow treatment of scrambling and ellipsis in languages such as Japanese. BC PR PS SC

Extensive use of computational fluid dynamics in the upgrading of hydraulic turbines

By Michel Sabourin, Raphael Eremeev and Vincent De Hénau. Montreal : Canadian Electrical Assn. Engineering & Operating Division, Hydraulic Power Section, Hydraulic & Rotating Electrical Equipment Subsection, 1995. 8 p. : *ill.*, *Bibl.* Presented at *Electricity '95*. At head of title: *Equipment Rehabilitation Session*. MICROLOG 96-00088 (1 fiche)

Computational fluid dynamics codes, based on turbulent Navier-Stokes equations, allow evaluation of the hydraulic losses of each turbine component with precision. Using those codes with the new generation of computers enables a wide variety of component geometries to be modelled and compared to the original designs under flow conditions obtained from testing, at a reasonable cost and in a relatively short time. This paper reviews the actual method used in the design of a solution to a turbine rehabilitation project involving runner replacement, redesign of upstream components (stay vanes and wicket gates), and downstream components (draft tubes and runner outlets). The paper shows how computational fluid dynamics can help hydraulic engineers to obtain valuable information not only on performance enhancement but also on the phenomena that produce the enhancement, and to reduce the variety of modifications to be tested. Extra high voltage cable sheath protection system using "elbow type surge arresters" developed by Hydro-Québec

Ray Awad...et al. Montreal : Canadian Electrical Assn, High Voltage Cables Session, 1995. 14 p. : ill., Bibl. Presented at Electricity '95. On cover: Paper #25.
MICROLOG 96-00138 (1 fiche)

This report describes the recent development of an extra high voltage cable sheath protection system using plug-in elbow-type surge arresters. It first reviews the Hydro-Quebec underground extra high voltage network, the experience with sheath protection systems using porcelain surge arresters, and the criteria for a new sheath protection system that would eliminate the problems associated with porcelain arresters. It then outlines the selection and development of system components including the 3-kilovolt nonlinear zinc oxide arrester, fiberglass mounting bracket, rubber-insulated 3-way copper bars, and waterproofing rubber sleeves. Results are presented of the tests conducted on the prototype version of the new surge arresters, including their ability to handle 60-Hertz temporary sheath over-voltages, the energy the new arresters could absorb during transients, and the arrester failure mode.

Family violence handbook for the dental community

By Donna Denham and Joan Gillespie. Ottawa : Health Canada, Health Services Directorate, Mental Health Division ; Health Service Systems Division, 1994. ii, 50 p. *French ed. (Guide sur la violence familiale...dentisterie)* : 96-00246/1. ISBN 0-662-23474-X CCG-P no. H72-21/136-1995E
MICROLOG 96-00243 (1 fiche)

This guide is intended to help members of the dental team develop an enhanced awareness of the family violence issue and greater sensitivity in responding to people affected. The introduction comments on the common misconceptions about family violence. The second section provides guidelines on recognizing abuse in patients, reporting suspected abuse, and aspects of dental treatment of abuse victims. Abuse of children, women, and older adults are considered separately. The third section outlines actions that can be taken by the dental team and by professional associations to address the family violence problem. The fourth section is a resource guide for further information. The appendices include lists of indicators of abuse, a list of types of abuse, and an outline of implementation steps for getting involved in ending family violence.

Feasibility assessment to establish a crumb rubber recycling facility in Nova Scotia

Prepared for: Resource Recovery Fund and Steve Benison, Atlantic Rubber Recycling, Upper Musquodoboit ; submitted by: J. Hap Wright, Ken Lee. Halifax : Coopers and Lybrand Consulting Group, 1994. 84 p.
MICROLOG 96-00280 (1 fiche)

This report begins with an overview of the recycled rubber industry in North America and a review of government programs and emerging policies regarding scrap tire disposal and recycling. It then examines the feasibility of establishing a facility in Nova Scotia to process scrap tires into crumb rubber, which would be used in recycled rubber products such as flooring and highway safety devices. The report presents location considerations for a Nova Scotia facility including distance from sources of raw materials, distance to markets, and issues related to scrap tire collection and transportation of products. The report also analyzes crumb rubber market supply and demand, with data presented on crumb rubber producers and suppliers in Canada and the United States, market prices, potential crumb rubber markets in Atlantic Canada, and market trends. The report concludes with recommendations for supporting crumb rubber production.

Federal-provincial relations -- Rev.

By Jack Stilborn. Ottawa : Library of Parliament, Research Branch, 1995. 16 p. : *Bibl.* (Current issue review / Canada. Library of Parliament. Research Branch ; 93-10E) *French ed. (Les Relations fédérales-provinciales) on the same fiche.* Revised 28 April 1995. ISBN 0-660-16153-2 CCG-P no. YM32-1/93-10-1995-05E MICROLOG 96-00696 (1 fiche)

Federal-provincial relations impact upon most of the major activities of government in Canada, and are in a state of virtually continuous evolution. Important sources of change are: the election of new governments with new political priorities and conceptions of the federal-provincial process; the social and political environment, which continuously generates new problems and issues; and accumulated experience with ever more complex intergovernmental relationships, which propels both political and institutional adjustment. This paper reviews major developments on the federal-provincial scene, and relates them to ongoing issues and trends. On this basis, it attempts to anticipate probable directions in federal-provincial relations and in evolving institutions.

Feeding and growth rate tables for rainbow trout, *Oncorhynchus mykiss*, derived from fitting the Ursin-Sparre growth model

By A.N. Arnason, G.E. Hopky and M.H. Papst. Winnipeg : Dept. of Fisheries & Oceans, Central & Arctic Region, 1995. iv, 33 p. : *ill.*, *Bibl.* (Canadian technical report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2038 ISSN 0706-6457) *This is the 69th technical report from the Central and Arctic Region, Winnipeg.* CCG-P no. Fs-92-6/2038E MICROLOG 96-00394 (1 fiche)

Tables presented in this paper give the maximum ratio required by rainbow trout of a given mean weight and at a specified rearing temperature, and the growth rate that should result from feeding under those conditions. The paper explains the method of deriving the tables, which used a model-based approach and fitted the model to two data sets representative of Canadian and Scandinavian conditions. The paper describes the growth trials conducted for the two data sets and demonstrates how the model reflects both the ration and the growth rates. The fitted model is used to tabulate feeding rates for a number of aquaculture management protocols besides maximum ration. Examples are given of how to use the tables to predict food requirements and the growth resulting from a management strategy. A computer program listing for generating the tables is included.

Field key to the freshwater fishes of British Columbia : draft for 1994 field testing

By J.D. McPhail and R. Carveth. Victoria : Resources Inventory Committee, Aquatic Inventory Task Force, 1994. ii, 233 p. : *ill.*, *Maps*, *Bibl.* At head of title: *Discussion document.* MICROLOG 96-00254 (3 fiche)

With growing public concern about biodiversity and conservation, inaccurate identification of wild species is becoming more important. This set of keys to British Columbia fishes is an attempt to provide rapid and dependable field identifications of freshwater fish by those who are not taxonomists, unlike traditional keys which are designed for use with preserved specimens and are filled with obscure jargon and complicated directions. Information is included in this guide that is rarely incorporated in traditional keys, such as where a fish was caught (geographic locality and site-specific habitat) and what it looks like when alive. To simplify the keys, the guide divides the province into eight zoogeographic regions, generally corresponding to major drainage basins. The appendix contains a conventional key for use on preserved material and includes all the species known to occur in British Columbia.

Field testing : modeling of speed governing systems for hydraulic turbines

By Cuong Tran. Montreal : Canadian Electrical Assn, Power System Planning & Operation Section, Power Resource, Transmission & Stations Planning, Operation & Reliability Subsection, 1995. 8 p. : *ill.* Presented at *Electricity '95*. MICROLOG 96-00106 (1 fiche)

Systematic testing at several Hydro-Quebec hydroelectric power plants led to a number of corrections being made to conventional models of hydraulic turbine speed governors. As a result, by using powerful computer systems and sophisticated software, much more accurate models have been established, enabling easier and more accurate optimization of speed governor settings for the purpose of obtaining operational stability. This paper describes several models of speed governors as well as the different techniques and instrumentation used to measure the transfer functions of the elements of these models. The paper then presents new approaches for improved definition of these models, such as the use of variable water inertia time and variable servomotor response time according to operating conditions. Simulations using the new models are compared to operational measurements.

Field testing of SAFE foundations

By F. Barry Newman, Anthony M. DiGiola and Gary J. Rehnert. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Transmission Section, Line Design Subsection, 1995. 22 p. : *ill.* Presented at *Electricity '95*. MICROLOG 96-00133 (1 fiche)

A SAFE (Secure Anchoring and Foundation Equipment Co.) foundation consists of a vertical galvanized steel pipe with 3-4 steel fins. These foundations offer particular advantages where speed of construction is important and the primary loading is the overturning moment. This paper describes full-scale load tests on five SAFE foundations and one pipe-only foundation. The tests involved installing the foundations in an engineered test fill whose as-constructed engineering characteristics were determined. Two sizes of foundations were tested, a smaller size used for street signs and lights and a larger size used for power transmission lines. The larger size was tested to geotechnical failure overturning moment. The test results demonstrated the degree of soundness of SAFE foundations, their ability to support substantial loads in a variety of loading conditions, and their predictability of performance.

Final report from the Vegetation Inventory Working Group on a proposed new inventory

British Columbia. Resources Inventory Committee. Vegetation Inventory Working Group. Victoria : The Group, 1995. 101 p. : *ill.*, *Bibl.* MICROLOG 96-00069 (2 fiche)

The proposed vegetation inventory for British Columbia has two major objectives: to determine how much of a given vegetation characteristic (e.g. tree volume, land coverage of a certain shrub) is within the province, and where such vegetation is located. This report reviews the design of the inventory, summarizes the major recommendations proposed for the inventory, outlines the work of the Vegetation Inventory Working Group, and illustrates a proposed inventory process using flowcharts. The report then lists specific procedures for polygon delineation and map base preparation, photo estimation, ground sampling, data processing, data storage and documentation, quality control, reporting systems, integration with other inventories, localization of the data, inventory updating, augmentation of particular types of data, and inventory implementation. Appendices include background papers on forest inventories.

Fire fighting capability assessment program, Bruce B NGS

Fire Cross Consultants. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. x, 48 p. : *ill.* (Report / Canada. At-

omic Energy Control Board ; INFO-0552)
MICROLOG 96-00678 (1 fiche)

This report reviews work assessing the capability of the Bruce B nuclear power plant to cope with a large fire incident. This work included an evaluation of an exercise scenario simulating a fire large enough to overtax the initial response force and having the potential to extend to fuel not involved initially, to pose a threat to personnel, and to be of sufficient severity to require the assistance of off-site fire fighting resources. The report describes the fire scenario, emergency plans, communications for emergency incidents at the plant, and the performance of the plant team during the exercise. Recommendations are made regarding elimination of deficiencies observed. The appendix contains the actual exercise scenario and a review of the plant's fire response plans.

Fire fighting capability assessment program, Darlington NGS

Fire Cross Consultants. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. viii, 36 p. (Report / Canada. Atomic Energy Control Board ; INFO-0553)
MICROLOG 96-00679 (1 fiche)

This report describes and presents the results of an assessment of the fire plans at the Darlington nuclear power plant and observations of an exercise involving a simulated large fire, defined as a fire of sufficient magnitude as to overtax the initial response force and having the potential to extend to fuel not involved initially, to pose a threat to personnel, and to require the assistance of off-site fire fighting resources. The exercise was conducted to gauge the probable effectiveness of the on-site and off-site responders to handle such an emergency. The report provides a step-by-step description of how the exercise turned out and makes recommendations to address the observed deficiencies. The appendices contain the actual exercise scenario and a review of the plant's fire safety plan and emergency response team standard operating guidelines.

Fish habitat protection guidelines, overhead powerlines

Winnipeg : Dept. of Fisheries & Oceans, Central & Arctic Region, Fisheries & Habitat Management Branch ; Regina : Saskatchewan Environment & Resource Management, Fisheries Branch, 1995. 21 p. : ill., Bibl.
MICROLOG 96-00532 (1 fiche)

Improperly designed and constructed overhead powerlines and associated activities have the potential to cause environmental impacts such as soil erosion and sedimentation, substrate disturbance, and deposition of deleterious substances in water. Any of these may result in the loss of fish habitat. These guidelines are intended to eliminate or reduce the impact of construction and maintenance of overhead powerlines on Saskatchewan fish habitat, and are based on the federal policy of no net loss of productive capacity of fish habitats. The guidelines give advice on preventing soil erosion and sedimentation, preventing water pollution, preventing physical alteration of fish habitat, and incorporating protective measures in every appropriate phase of a powerline development. Specific topics covered include route planning, stream crossings, right-of-way clearing, powerline construction, maintenance, and decommissioning. Includes glossary.

Fossil plant life management : metallurgical considerations

By R.L. McQueen. Montreal : Canadian Electrical Assn, Engineering & Operating Branch, Thermal & Nuclear Power Section, 1994. 20 p. : *ill.*
Presented at Utility Thermal Plant Life Management Conference, part of Electricity '95.
MICROLOG 96-00192 (1 fiche)

Life management is an ongoing program to optimize useful life of plant components, based on monitoring and assessment of equipment condition such that the unit's in-service performance expectations are met economically. In fossil-fuel power plants, where many critical components suffer from some form of in-service metallurgical degradation, activities that assess the condition and integrity of these components based on optimum assessment/inspection plans and analysis techniques are fundamental to an effective life management approach. This paper describes the methodology used at Ontario Hydro to assess component condition and integrity. The overall approach has the main tasks of defining components for assessment and prioritizing them, defining inputs for assessment, obtaining the necessary data and information, performing the assessment, and preparing the life management plan. The paper concludes with an outline of issues raised during development of the methodology.

Generation of an aircraft ice sensor data base and evaluation of de/anti-icing fluids

Prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada. St. John's : INSTRUMAR Ltd., 1993. xii, 88 p. : ill.
MICROLOG 96-00451 (2 fiche)

The Clean Wing Detection System (CWDS) is a sensor system capable of assessing the condition of an aircraft's surface by identifying the presence of ice, snow, water, freezing point depressant (FPD) fluids, and other substances common in aircraft environments. The purpose of this study was to assess the ability of the CWDS sensor to identify the state of FPD fluids under freezing precipitation conditions and to examine the decaying of the fluid protective qualities under conditions of fluid thinning, dilution, and the accumulation of ice or slush coatings. The investigation included generation of the sensor data base by recording sensor response to a set of substances having determined electrical properties, and confirming the capabilities of the sensor in a series of controlled experiments, including monitoring the physical phenomena within the FPD fluid during continuous exposure to environmental conditions that lead to its eventual deterioration.

GPS positioning guide

Ottawa : Natural Resources Canada, Geomatics Canada, Geodetic Survey Division, 1993. xi, 110 p. : ill., Bibl. On cover: A user's guide to the Global Positioning System. ISBN 0-660-15917-1 CCG-P no. M52-74/1995E
MICROLOG 96-00478 (2 fiche)

The Global Positioning System is a satellite-based radio-navigation system established for military uses, which as a byproduct has been made available to the civilian community. The system can be

used to achieve position accuracies ranging from 100 meters down to a few millimeters, depending on the equipment used and procedures followed. It is thus important for system users to understand what techniques are required to achieve desired accuracies with minimal cost and complexity. These guidelines contain four main parts geared toward achieving that objectives. They explain the fundamentals of global positioning, describe positioning techniques, and discuss procedures for application of the system. General considerations and procedures common to almost any positioning project are presented, along with special considerations which must be made when determining elevations. The appendices include a glossary and a guide to information sources.

Grand Rapids : turbine upgrading and repair of unit 1

By Claude Lambert and Paul Jarriand. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Hydraulic Power Section, Hydraulic & Rotating Electrical Equipment Subsection, 1995. 20 p. : ill. Presented at Electricity '95. At head of title: Equipment Rehabilitation Session.
MICROLOG 96-00086 (1 fiche)

The Grand Rapids hydroelectric power plant at the northern end of Lake Winnipeg was designed primarily as a daily peaking plant. The plant's turbines operate on load frequency control with frequent on/off cycling to respond to frequent and important load variations. After many years of operation, three of the plant's turbine units were found to need a major overhaul, including changing of the runner blades and repair of major components of Unit 1 damaged in a headcover bolt failure. This paper describes the innovative approach used by the contractor to upgrade the turbine runners and the studies and work required to repair the Unit 1 components. The upgrading and repairs included using a smaller hub diameter to reduce hub cavitation, modifying some existing turbine components, developing and testing a new six-blade runner, finite element analyses of the headcover elements, and re-machining the Unit 1 turbine shaft.

A Greedy (g, f) factor algorithm for complete and complete bipartite graphs

By Pavol Hell and David G. Kirkpatrick. Burnaby, BC : Simon Fraser University, Centre for Systems Science ; Laboratory for Computer & Communications Research, 1994. 5 p. : Bibl. (Technical report / Simon Fraser University, Centre for Systems Science and Laboratory for Computer & Communications Research (B.C.) ; CSS/LCCR TR94-09)
MICROLOG 96-00291 (1 fiche) (Available on fiche only)

A (g,f)-factor of a graph G (with f and g being integer mappings on V(G)) is a spanning subgraph F of G. This paper presents a greedy algorithm for finding a (g,f)-factor of complete and complete bipartite graphs. The algorithm generalizes the method of Hakimi and Havel (1962, 1955) and of Gale and Ryser (1957, 1960). The developed algorithms are

easily implemented by employing standard priority queues of vertices. Further improvements can be made by exploiting the fact that priorities are integer.

Growth and survival of two strains of rainbow trout, Tagwerker and Nisqually, in a winterkill lake and four experimental ponds

By J. Gibson. Winnipeg : Dept. of Fisheries & Oceans, Central & Arctic Region, 1995. iv, 9 p. : Bibl. (Canadian technical report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2022 ISSN 0706-6457) *This is the 68th technical report from the Central and Arctic Region.* CCG-P no. Fs 97-6/2022E

MICROLOG 96-00395 (1 fiche)

This report presents results from a study comparing the performance of Tagwerker trout to that of other traditional strains in extensive culture in prairie pothole environments. A test stock of certified Tagwerker strain spawned in Ontario was matched-planted with a Nisqually strain spawned in Manitoba. After rearing both strains to fingerlings, they were stocked in a 30-hectare lake at Erickson, Manitoba, and in four 0.05-hectare ponds in Manitoba for comparing the growth and survival rate between the strains. A strain of trout commonly used by the Manitoba Rainbow Trout Farmers Association was also stocked into the Erickson lake. The results after 151 growing days in the lake (130 days in the ponds) include recoveries, mean weight at harvest, specific growth rate, and dressing loss.

Growth intercept method for silviculture surveys

British Columbia. Silviculture Practices Branch. Victoria : The Branch, 1995. v, 36 p. : ill., Bibl. On cover: *Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II.* ISBN 0-7726-2627-8

MICROLOG 96-00047 (1 fiche)

The growth intercept method predicts site index (which measures the capacity of an area of land to grow trees of a given species) from height and age measurements taken on carefully selected sample trees. This guide describes a new growth intercept method that requires the surveyor to measure total tree height and age at breast height. It presents the four steps used for estimating site index in a silviculture survey in British Columbia, and includes a section on advanced options for using the growth intercept method. An example is provided to illustrate the use of the new method. The guide includes tables for estimating site index from growth intercept for three British Columbia species: interior lodgepole pine, interior spruce, and coastal western hemlock.

Guide to amalgamation and affiliation for health care societies

Victoria : Ministry of Health & Ministry Responsible for Seniors, New Directions Development Division, 1995. 56 p.

MICROLOG 96-00036 (1 fiche)

This guide has been prepared for service providers to explain the new relationships between service provider agencies and the Regional Health Boards and Community Health Councils in British Columbia. The new relationships arise from the requirement that existing Boards and Councils integrate services to promote a more accessible and client-centered health system, to streamline administration, and to increase the efficiency of service delivery. Many existing non-profit health agencies will also be expected to amalgamate with those bodies. The guide contains Ministry of Health policy, instructions on how to prepare for amalgamation, and guidelines on incorporating a new society with a new mandate (for example, fundraising). The guide addresses several issues raised by service providers, such as the liability of directors and officers, charitable status, mortgage subsidy agreements, and exemption from certain taxes.

Gun availability and firearms suicide

By Sharon Moyer and Peter J. Carrington. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1992. xi, 91 p. : *ill.*, *Bibl.* (Working document / Canada. Dept. of Justice. Research Section ; WD1993-3e) *French ed. (La Disponibilité des armes...)* : 96-00443/2. MICROLOG 96-00452 (2 fiche)

The use of firearms for suicide represents a social problem whose dimensions have varied in Canada both over time and among jurisdictions. The main question examined by this report is whether changes in the availability of firearms affect the number of firearms deaths through suicide. The report addresses three questions: the factors associated with firearms suicides and suicides using other methods; the nature of the relationship between gun ownership and firearms suicide rates in each Canadian jurisdiction; and the apparent effects of the 1977 amendments to Canadian gun control laws on suicide rates. The report first outlines the research methodology used, reviews literature on the gun ownership/firearm suicide relationship, and presents the results of the research. The last chapter summarizes the findings for each of the three questions addressed. The appendices include supporting statistics on firearms and suicides.

Harmonization of sales taxes -- Rev.

By Richard Domingue. Ottawa : Library of Parliament, Research Branch, 1995. 17 p. : *Bibl.* (Current issue review / Canada. Library of Parliament. Research Branch ; 94-1E) *French ed. (L'Harmonisation des taxes de vente) on the same fiche. Revised 28 February 1995.* ISBN 0-660-16154-0 CCG-P no. YM32-1/94-1-1995-03E MICROLOG 96-00697 (1 fiche)

Before the Goods and Services Tax came into effect on January 1, 1991, the provinces vigorously opposed its introduction and the idea of harmonizing it with their own respective retail sales taxes. They accused the federal government of encroaching on the area of consumption taxes, which they considered to come within exclusively provincial jurisdiction. Moreover, it made sense for the provinces to avoid associating themselves with the federal government on the GST, given the political price that would have to be paid at election time for introducing such a very unpopular tax. This document attempts to assess the likelihood of such harmonization in the near future.

Helping victims through fine surcharges

By Lee Axon. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1994. xv, 162 p. : *Bibl.* (Working document / Canada. Dept. of Justice. Research Section ; WD1994-11e) *French ed. (L'Aide aux victimes...)* : 96-00514/2. MICROLOG 96-00536 (2 fiche)

In July 1989, federal legislation regarding a victim fine surcharge came into effect. This legislation was mainly intended to generate revenue for victim services and programs and to provide a means for offenders to make some reparation towards crime victims. This study examines Ontario's experience with the surcharge and also reviews the surcharge-related practices in other Canadian jurisdictions. The specific goals of the study included investigation of the impact of the surcharge on revenue, documentation of perceptions of the key players associated with the surcharge program, examination of collection practices of Ontario courts for fines payable to the province, and assessment of the appropriateness of current methods and practices. Issues examined in the study included ad-

ministration and enforcement, judicial practices related to surcharge imposition, and disbursement of surcharge funds.

High speed phase segregated line differential relay

By H. Pettersson. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operation Section, Power System Protection Subsection, 1995. 10 p. : ill., Bibl. Presented at Electricity '95. At head of title: Paper #102.

MICROLOG 96-00116 (1 fiche)

This paper describes a new-generation intelligent terminal which can be used to improve power system performance and efficiency. The terminal incorporates relay or protection functions as well as other functions including monitoring, local control, and remote communications. The terminal hardware is modular, with multiprocessor technology and multiple input-output boards. The software platform is structured in different levels including operating system, software library for the different functions, programmable logic, and product specific configuration. The various functions are arranged as individual blocks which can be combined as predetermined schemes or custom designed, and the system architecture accommodates adaptive algorithms for enhanced performance and flexibility. The paper also details the operation of the line differential protection function, including its demands on communication and on current transformers.

Hydro-Québec's experience with anti-galloping pendulums

Pierre Van Dyke...et al. Montreal : Canadian Electrical Assn, Transmission Section, Conductor & Hardware Session, 1995. 10 p. : *ill.*, *Bibl.* *Presented at Electricity '95.*
MICROLOG 96-00139 (1 fiche)

In 1992, Hydro-Quebec installed detuning pendulums on a few lines to reduce galloping problems that were causing flashovers and repetitive circuit breaker operation. The pendulums were found to have reduced galloping during winter 1992-93. However, in December 1993, three conductors broke at the pendulum attachment points, and subsequent examination revealed that the failures occurred from cracks initiated by fatigue fretting. Hydro-Quebec decided to conduct tests at its Varannes test line to verify whether the fatigue was due to aeolian vibrations and to develop a new pendulum attachment that would not damage the conductor. This report describes the test methodology, the results of comparison of four different pen-

dulum attachments, the bending amplitudes reached when the pendulums were used, and the causes of the conductor breakages.

Icelandic-Canadian popular verse

By Magnús Einarsson. Hull, PQ : Canadian Museum of Civilization, 1994. 676 p. : *ill.*, *Bibl.* (Mercury series / Canadian Museum of Civilization ISSN 0316-1854) (Paper / Canadian Centre for Folk Culture Studies ; no. 65 ISSN 0316-1897) ISBN 0-660-14029-2
MICROLOG 96-00535 (7 fiche)

This selection of 174 items of Icelandic-Canadian popular poetry consists largely of occasional verses, mostly traditional quatrain, and longer poems about group and locality. Most of them are in Icelandic, but a few are in English; translations are provided. They are arranged by topic, such as animals, automobiles, children, death, food and drink, gossip, Iceland, farm life, nature, personalities, places, poets, politics, and the weather; and by function, including advice, malediction, notification, well-wishing, and wordplay. The verses were composed between the 1880s and 1969 by at least 70 different versifiers and were recorded from oral sources throughout western Canada between 1966 and 1969. Includes lists of informants and versifiers, list of loanwords and phrases, index to photographs, and index of first lines.

Îlots boisés et jardins d'oiseaux

Sainte-Foy, PQ : Ressources naturelles Canada, Service canadien des forêts, Région du Québec ; Environnement Canada, Service canadien de la faune, 1994. 15 p. : *ill.*, *Bibl.* *L'éd. anglaise (Wooded areas and bird gardens) sur la même fiche. En tête du titre: Mon milieu, mes arbres.* ISBN 0-662-99431-0 GCE-E no F042-230/1994F
MICROLOG 96-00255 (1 fiche)

Les espaces boisés fourmillent de vie, animés par une diversité végétale et animale souvent insoupçonnée. Cette brochure s'adresse à tous ceux et celles qui désirent créer des îlots boisés et des jardins d'oiseaux. Elle aide à planifier et à concrétiser les projets de plantation. Les points qui y sont abordés sont les suivants : l'aménagement d'espaces boisés pour la faune; la création d'îlots boisés d'espèces indigènes; et, les conseils pratiques sur la plantation, l'entretien et la protection.

The impact of whole-tree and conventional harvesting on white birch sites in central Newfoundland : an ENFOR establishment report

By B.A. Roberts and B.D. Titus. St. John's : Natural Resources Canada, Canadian Forest Service, Newfoundland & Labrador Region, 1994. v, 23 p. : *ill.*, *Bibl.* (Information report / Canadian Forest Service. Newfoundland & Labrador Region ; N-X-293 ISSN 0704-7657) ISBN 0-662-22919-3 CCG-P no. F046-15/293E
MICROLOG 96-00710 (1 fiche)

White birch makes up about 12% of the total tree volume on the island of Newfoundland and is a major component in all balsam fir stands. This report describes a project involving the establishment of five major field studies conducted to assess the impact of whole-tree and conventional harvesting of white birch on future site productivity in central Newfoundland. The five studies include site selection, experimental layout, and biomass inventory; determination of the impact of harvesting on nutrient leaching rates; inventory of understorey vegetation and description of disturbance plots and soils; determination of litter and slash decomposition rates; and quantification of litter production in white birch stands. The work is being conducted on three harvesting treatment plots established in each of three stands of five hectares or greater.

Impacts of soil disturbance on root systems of Douglas-fir and lodgepole pine seedlings

By Ed F. Wass and Richard B. Smith. Victoria : Natural Resources Canada, Canadian Forest Service, Pacific & Yukon Region, Pacific Forestry Centre, 1994. vi, 22 p. : *ill.*, *Bibl.* (Information report / Pacific Forestry Centre ; BC-X-348 ISSN 0830-0453) ISBN 0-662-22478-7 CCG-P no. F046-17/348E
MICROLOG 96-00531 (1 fiche)

This report presents results of a study which investigated root development and form of Douglas-fir and lodgepole pine seedlings growing on skidroads and on areas where stumps had been uprooted to control root rot. The study also examined the relationship of root morphology to tree growth. The investigators excavated 162 fir and 162 pine seedlings in a clearcut, with equal numbers excavated from five disturbance categories in skidroad plots (berm, inner track, outer track, sidecast, and undisturbed) and three disturbance categories in stump uprooting plots (deposit, undisturbed, and track). Aspects of root size and morphology examined included root depth, stem/root ratios, root system orientation, root area, first large lateral root, and root spin. The report ends with an outline of the implications of the findings for forest management.

Impaired Drivers Program : evaluation summary and charts and graphs

Alcoholism Foundation of Manitoba. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Research & Development Directorate, 1990. vii, 115 p. : *ill.* (Technical report / Canada. Dept. of Justice. Research Section ; TR1992-9e)
MICROLOG 96-00413 (2 fiche)

The Manitoba Impaired Drivers Program (IDP) is for those applying for reinstatement of a license following a second or subsequent conviction for impaired driving. The IDP consists of three main components: an assessment, an educational workshop, and a treatment program. This report presents the results of an evaluation of the IDP and includes a profile of program clients, a comparison of program clients with a control group, and a comparison of IDP clients before their program assessment and after their attendance at the program. Major items studied to assess the effectiveness of the IDP included employment, leisure activities, alcohol consumption behavior, drinking and driving behavior, punitiveness toward driving while impaired, quality of life, and differential impacts of the program. Separate sections of the report examine the problem of those who did not keep appointments for their assessments and evaluate the effectiveness of the educational workshop of the IDP.

The Implementation of the 1985 amendments to the drinking and driving sections of the Criminal Code

By Sharon Moyer. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Law Reform, Research & Development Directorate, 1990. ix, 81 p. : *ill.*, *Bibl.* (Working document / Canada. Dept. of Justice. Research Section ; WD1992-4e) *French ed. (Mise en oeuvre des modifications...)* : 96-00496/2.
MICROLOG 96-00522 (1 fiche)

Amendments to the impaired driving laws of Bill C-18 (1985) included expansion of the scope of criminal liability, more stringent sentences, and a statutory authorization for taking blood samples in certain circumstances. This report describes the process of implementation of those amendments and explores the effects of the amendments on police and court processing of drinking and driving offenses. It notes the enforcement resources available, procedures used in apprehending the drinking driver, the characteristics of apprehended drink-

ling drivers, and types of charges laid. The research methodology included interviews with those involved in the criminal justice system, reviews of impaired driving case files, and analyses of statistics on the changes over time in drinking and driving offenses.

In transit, people moving people : a ten-year development plan for BC Transit

Surrey, BC : B.C. Transit, 1995. 18 p. : ill., *Maps* MICROLOG 96-00242 (1 fiche)

This booklet summarizes the ten-year development plan which is intended to provide a framework for the future of public transit in British Columbia. The plan is based on three main goals: to increase transit ridership, to shape urban growth and help reduce sprawl, and to ensure people are well served by transit. The five key components of the plan are improving customer service, expanding bus services throughout the province, implementing innovative transit priority measures such as bus lanes in urban centers, introducing West Coast Express (Mission-Coquitlam-Vancouver) and new rapid bus services in Greater Vancouver in the short term, and developing light rail transit for Greater Vancouver in the medium to long term. The booklet ends with an outline of how the transit plan will be financed.

Incorporating fixed and repeat sets in the stratified random survey for groundfish in the southern Gulf of St. Lawrence

By G.A. Nielsen. Moncton, NB : Dept. of Fisheries & Oceans, Maritimes Region, Science Branch, 1995. iii, 30 p. : ill., *Bibl.* (Canadian technical report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2068 ISSN 0706-6457) CCG-P no. FS 97-6/2317E MICROLOG 96-00601 (1 fiche)

This report analyzes research vessel data collected in the southern Gulf of St. Lawrence 1971-88 to assess the effect of including non-randomly allocated fishing stations in abundance indices for Atlantic cod, American plaice, and white hake. The investigators used five methods for calculating the stratified mean number of fish caught per standard tow, which is assumed to be directly proportional to abundance and is used as an abundance index. The report presents the calculation results and compares trends in fish abundance for the three species using the different indices. The report concludes with recommendations for calculation of research vessel abundance indices.

Independent schools policy manual

Regina : Saskatchewan Education, 1991. xi, 273 p.

MICROLOG 96-00239 (4 fiche)

The new legal framework represented by the policies in this manual establishes four categories of independent schools in Saskatchewan: registered independent schools, accredited independent schools, historical high schools, and alternative independent schools. The manual presents the

school policies in seven sections: registration of an independent school; administration; staff and qualifications; curriculum, instruction, and evaluation; inspection and supervision; accreditation; and the Independent Schools Review Board. Each policy statement follows a similar format, including the legal authority for the statement, rationale or justification for the policy, the policy itself, guidelines regarding the policy and its interpretation, and procedures related to the policy. The appendices include relevant sections of the Education Act and sample forms.

Induced current switching development work for the application of ground interrupter switches on the Hydro-Quebec H.V. system

Roger Beauchemin...et al. Montreal : Canadian Electrical Assn, Electrical Apparatus Section, Station Equipment Subsection ; Switchgear Subsection, 1995. 13 p. : ill., *Bibl.* *Presented at Electricity '95.* MICROLOG 96-00157 (1 fiche)

This paper describes the phenomena associated with induced currents and voltages on high-voltage transmission lines. After a review of the basic principles of induction phenomena in cases where two or more lines run parallel, the paper focuses on describing actions taken by Hydro-Quebec to fully assess the importance of these phenomena on its grid. The paper tabulates the findings and compares them to recommendations made by the international standard IEC 1129. It then reviews a research and development project conducted in cooperation with the equipment manufacturer GEC Alsthom to assess the performance of existing interrupters associated with ground switches and to develop, if necessary, new models appropriate to Hydro-Quebec's needs. Values standardized by the utility for induced-current interrupting ratings are listed. The paper ends with an outline of the application domain of ground switches in the Hydro-Quebec system.

An Industrial customer's view of changes in electricity purchasing

By Rolands Muiznieks. Montreal : Canadian Electrical Assn, 1995. 22 p. *Presented at the Power of Change Conference, part of Electricity '95.* MICROLOG 96-00208 (1 fiche)

This paper on electricity purchasing presents the views of a chemical company for which electricity costs account for over half of total production costs. The company has plants across Canada whose operational characteristics give them the capability to purchase lower priced electric power such as surplus and non-firm energy. The paper outlines a vision for electricity purchasing with en-

tails the choice of a variety of power products and services available from a group of alternative suppliers. It also reviews the company's experiences with electricity purchasing in British Columbia, Alberta, Manitoba, and Ontario, and its views on emerging issues affecting industrial purchasers of electric power.

The Influence of biofeedback and autogenic training on motion sickness tolerance

By E.E. Jozsvai and R.A. Pigeau. North York, ON : Defence & Civil Institute of Environmental Medicine, 1994. iv, 19 p. : ill., Bibl. (DCIEM publication / Defence & Civil Institute of Environmental Medicine (Canada) ; 94-59)
MICROLOG 96-00716 (1 fiche)

The objectives of the experiment reported in this document were to evaluate whether increased control of autonomic nervous system (ANS) responses is gained through the specific effect of biofeedback, to assess the effects of learned control of ANS responses upon motion tolerance, and to ascertain the relationship between ANS self-control and coping with motion stress. Three groups of six subjects were exposed to six weeks to weekly sessions of Coriolis stimulation to induce motion sickness. Between the first and second session, subjects in the experimental groups received five episodes of biofeedback training with either true or false feedback on their heart rate and skin temperature. A control group received no treatment. The results compare the true-feedback group's motion sickness performance to that of the other groups, and the performance of subjects with high baseline motion tolerance to those with low tolerance.

Installation of 138kV low pressure nitrogen-filled XLPE-insulated cable in a steel pipe

By C. Doench. Montreal : Canadian Electrical Assn, Transmission Section, 1995. 18 p. : ill. Presented at Electricity '95. On cover: Paper #24. MICROLOG 96-00136 (1 fiche)

This paper describes the design, testing, and installation of the first 138-kilovolt crosslinked polyethylene (XLPE) insulated cable system installed in an eight-inch carrier pipe. The 28,000-foot cable was installed between the Consolidated Edison System in New York and Kennedy International Airport Cogen to export surplus power from that cogeneration project. The carrier pipe was also installed and tested as a high-pressure oil-filled pipe-type system so that the XLPE cables could be replaced with conventional cables if necessary. The cable was pulled through the pipe using a suitable silicone oil as a pulling lubricant, and the sections spliced. Once the pipe system was evacuated, the pipe was filled with dry nitrogen. The system was commissioned in summer 1994, and the load at present is about 100 megawatts.

Interactive proof systems and polynomial algorithms

By R. Back and S. Mahajan. Burnaby, BC : Simon Fraser University, Laboratory for Computer & Communications Research ; Simon Fraser University, Centre for Systems Science, 1994. 11 p. : *Bibl.* (Technical report / Simon Fraser University, Centre for Systems Science and Laboratory for Computer & Communications Research (B.C.) ; CSS/LCCR TR94-05) MICROLOG 96-00268 (1 fiche) (Available on fiche only)

This paper is inspired by a paper of Feige and Lovasz (1992) in which a general polynomial heuristic for any problem in NP is given. Feige and Lovasz also ask for applications where this heuristic is effective. The present paper builds on their theory and shows that some classes of instances of general NP-problems can be decided in polynomial time. The theory can be viewed as describing a unified setting in which a wide variety of seemingly disparate polynomial time problems such as 2-colorability, perfect matching, and certain directed graph homomorphism problems can be decided. The theory explains why such problems have polynomial time algorithms.

An international survey of industrial applications of formal methods, vol. 1 : purpose, approach, analysis and conclusions

By D. Craigen, S.L. Gerhart and T. Ralston. Ottawa : Atomic Energy Control Board, 1995. xlii, 117 p. : *Bibl.* (Research report / Canada. Atomic Energy Control Board ; INFO-0474-1) MICROLOG 96-00642 (2 fiche)

Formal methods are mathematically based techniques, often supported by reasoning tools, that can offer a rigorous and effective way to model, design, and analyze computer systems. The purpose of this study is to evaluate international industrial experience in using formal methods. The cases selected are believed to be representative of industrial grade projects and span a variety of application domains. This volume, the first of a two-volume final report, includes a discussion on formal methods

and a brief characterization of the formal and related methods used in the cases. It also contains a summary of the twelve cases, a description of the methodology used in the international survey of experience with formal methods, a cluster-by-cluster analysis of the data, a discussion of the key events and timing associated with each case, and an analysis of the formal methods research and development summary.

Formal methods are mathematically based techniques, often supported by reasoning tools, that can offer a rigorous and effective way to model, design, and analyze computer systems. The purpose of this study is to evaluate international industrial experience in using formal methods. This is the second volume of a two-volume final report which provides the details of twelve case studies believed to be representative of industrial-grade projects spanning a variety of application domains. For each case study, the report provides a case description, summarizes the information obtained (from interviews and literature), evaluates the case, and highlights research and development issues pertaining to formal methods. The cases include a customer information control system, a multinet gateway, cleanroom software, a railway signalling system, an access control system, a traffic alert and collision avoidance system, and a transputer.

International Symposium on Wastewater Treatment, Workshop on Drinking Water, Regional Eastern Canada Conference of the CAWQ, Workshop on Regional Estimation of Flood (GREHYS-NSERC) : proceedings 1994

Delisle, C.E. et Bouchard, M.A., eds. Ottawa : Environment Canada, Quebec Region, 1994. 730 p. : *Ill.*, *Bibl.* (Collection environnement / Université de Montréal ; vol. 2 hors série) Papers are in the language of presentation, English or French (*Symposium international sur le...*). ISBN 0-662-61459-3 CCG-P no. En 44-14/1994 MICROLOG 96-00326 (8 fiche)

The wastewater treatment symposium is a special event for those who are interested in domestic and industrial wastewater treatment from research, design, construction, training, operation and management points of views. The objective of the symposium is the enhancement of technology transfer among specialists involved in wastewater treatment. The objective of the drinking water workshop is to bring together drinking water specialists to discuss the latest technologies. It emphasizes the following topics: the quality of drinking water, ozonation, biological filtration, chlorine demand, disinfection by products or membranes. It should be of interest to practitioners, engineers, researchers, trainers and quality control personnel involved in drinking water production and management. The workshop on regional flood estimation presents the results of research performed on the Quebec-Ontario flood estimation and theoretical model development. The research group in statistical hydrology is known as the GREHYS. Finally, the regional eastern Canada conference of the CAWQ aims at promoting scientific and technical information exchange on all aspects of water quality.

L'Internationalisation dans les universités canadiennes : le nouveau paysage

Par Jane Knight ; en collaboration avec l'Association des universités et collèges du Canada. Ottawa : l'Assn, 1995. v, 71, v, 65 p. : ill., *Bibl. Bilingue (Internationalization at Canadian universities...)*. ISBN 0-8876-162-7
MICROLOG 96-00347 (2 fiche)

On trouvera dans ce document les conclusions de l'enquête de 1993 et l'examen d'une partie des questions et enjeux qui en ressortent. Les résultats du sondage sont présentés selon les thèmes directeurs de l'étude. L'objet de l'étude est de déterminer et décrire la signification, la raison d'être et le rang de priorité que les cadres supérieurs des universités canadiennes attribuent à l'internationalisation; déterminer les facteurs organisationnels qui influent sur l'intégration d'une dimension internationale au cœur des principales fonctions de l'université, soit l'enseignement, la recherche et le service à la collectivité; et, repérer les changements que le temps a apportés à une sélection d'initiatives et d'efforts en matière d'internationalisation.

Internationalization at Canadian universities : the changing landscape

By Jane Knight ; In collaboration with Association of Universities and Colleges of Canada. Ottawa : The Assn, 1995. v, 65, v, 71 p. : ill., *Bibl. Bilingual (L'Internationalisation dans les universités...)*. ISBN 0-8876-162-7
MICROLOG 96-00347 (2 fiche)

The importance of internationalization as a force changing the landscape of Canadian universities is quite undeniable. This document presents a study designed to identify and describe the meaning, rationale and priority attributed to internationalization by senior administrators in Canadian universities; determine the organizational factors which affect the process of integrating the international dimension into the mainstream of the university's major functions of teaching, research and service; and determine changes over time in the selection of internationalization initiatives and efforts.

Inventaire des recherches effectuées au Canada sur les connaissances du public en matière de criminalité et de justice

Par Julian V. Roberts. Ottawa : Ministère de la justice Canada, Secteur de la gestion, politiques et programmes ministériels, Direction générale de la recherche, de la statistique et de l'évaluation, 1994. vii, 79 p. (Rapport technique / Canada. Ministère de la justice. Section de la recherche ; TR1994-15F) *L'éd. anglaise (Public knowledge of crime...)* : 95-04042/1.
MICROLOG 96-00284 (1 fiche)

Ce rapport présente un bilan des recherches effectuées au Canada sur les connaissances du public en matière de criminalité et de justice. Des publications antérieures portent sur les attitudes du public au sujet du phénomène de la criminalité et du rôle du système de justice pénale. Le document vise à faire le point sur les connaissances qui sous-tendent ces attitudes. Plus particulièrement, il se penche sur les catégories d'infractions et le taux de criminalité; les perceptions générales concernant les délinquants et la nature de la criminalité; les crimes de violence familiale; le système de justice pénale; les questions liées à la criminalité chez les jeunes; et, les connaissances du public au sujet des initiatives de réforme du droit.

Inventory of public legal education and information materials and programs related to crime prevention and victims

By Richard M. Gill and Gina A. Alderson. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1994. viii, 57 p. : *Bibl.* (Technical report / Canada. Dept. of Justice. Research Section ; TR1994-10e)
MICROLOG 96-00382 (1 fiche)

This inventory includes items and programs meeting the following two criteria: they have as a central purpose to inform or educate the public about the law or the justice system; and they provide information that will enable people to better equip themselves to avoid being victimized in the future, to better pursue or defend their interests as victims under the law, or to better understand the consequences of committing a crime and their responsibilities as a citizen under the law. The inventory is organized into five groups of items: crime deterrence, crime avoidance, education about law and the justice system, general crime prevention, and public legal education and information for victims. For each item, the inventory gives full bibliographic information, an annotation, and the target audience. The concluding chapter analyzes the inventory entries and identifies gaps in the currently available public legal education and information on crime prevention and victims.

James Bay and Northern Quebec Agreement and Northeastern Quebec Agreement, Cree-Inuit-Naskapi : Annual report 1994

Ottawa : Indian & Northern Affairs Canada, 1995. 30, 30 p. : ill. *Bilingual*. ISBN 0-662-61595-6
CCG-P no. R71-38/1994
MICROLOG 96-00320 (1 fiche)

The James Bay and Northern Quebec Agreement was signed by the Cree and Inuit in 1975 and the Naskapi Band signed a similar agreement known as the Northeastern Quebec Agreement in 1978. The Agreements have two fundamental objectives: to improve living conditions of the Native beneficiaries through the construction of houses, schools, hospitals, infirmaries and other facilities, and, to encourage self-government among the Cree, Inuit and Naskapi. This report describes the principal provisions of the agreements and implementation status and then provides a summary of expenditures. It then describes in more detail, expenditures by Indian Affairs and Northern Development according to area of expenditure and expenditures by other federal departments.

Jurisdictional variations in youth court dispositions : a preliminary analysis of quantitative data

By Sharon Moyer. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Research & Development Directorate, 1991. xviii, 258 p. : ill., *Bibl.* (Technical report / Canada. Dept. of Justice. Research Section ; TR1992-15e)
MICROLOG 96-00396 (3 fiche)

This report analyzes empirical data on youth court dispositions in order to determine the similarities and differences in the dispositional processing of young offenders. The specific objectives of the report are to describe the characteristics of youth court caseloads in terms of available social and legal factors relating to the young offender's case; to document the extent to which jurisdictions differ in their use of open and secure custody, and any

changes over 1986-90 in their use of incarceration; to compare jurisdictions in terms of the profiles of young offenders sentenced to non-custodial dispositions and to open and secure custody in terms of socio-legal factors; to explore the same factors' relationships to dispositions; and to describe these factors' relationships to the length of open and secure custody sentences in each jurisdiction. The main source of data is the Youth Court Survey of the Canadian Centre for Justice Statistics.

Kalum Timber Supply Area, formerly Kalum South area of Kalum Timber Supply Area : rationale for allowable annual cut determination, effective January 1, 1996

By Larry Pedersen. Victoria : Ministry of Forests, 1995. 52 p. : *Bibl.*
MICROLOG 96-00042 (1 fiche)

The Kalum Timber Supply Area covers nearly 550,000 hectares in the Prince Rupert Forest Region of British Columbia. Productive forest occupies about 36% of the Area's land base. This report outlines the guiding principles for determining the allowable annual cut (AAC) for the Area and then considers the factors used in the AAC determination, including the role of the base-case timber supply forecast, forest inventory information, the land base contributing to the timber harvest, the timber supply profile, regeneration delay, restocking, alternatives to clearcutting, decay and waste, spacing and pruning, the partitioned component of the harvest, the community dependence on the forest industry, timber processing facilities, integrated resource management objectives, and losses. The appendices contain relevant sections of the provincial forestry legislation and a summary of public input into the Area's Timber Supply Review.
BC FO PR SC

Kingcome Timber Supply Area socio-economic analysis

Alan Fitzgibbon & Associates. Victoria : Ministry of Forests, Economics & Trade Branch, 1995. xl, 110 p. : *ill.*, *Bibl.*
MICROLOG 96-00065 (2 fiche)

The Kingcome Timber Supply Area covers over 1.1 million hectares on northern Vancouver Island and the adjacent mainland. This study assesses the economic, social, and environmental impacts of changing timber harvest levels in the Area, using three timber supply scenarios. The scenarios were chosen to illustrate a range of impacts, but all scenarios involve a decline in the allowable annual cut. The report begins with a socio-economic profile of the Area, a profile of the Area's eleven First Nations, the Area's environmental setting, and its wildlife, fisheries, tourism, and outdoor recreation resources. The report then describes the local forestry sector and presents the timber supply forecasts. The impacts of the three harvest scenarios are grouped into sections treating the economy and government revenues, communities, First Nations, and the environment. The appendices include a description of the impact assessment methodology used.

Kingcome Timber Supply Area : timber supply review discussion paper

Victoria : Ministry of Forests, British Columbia Forest Service, 1995. 16 p. : *ill.*
MICROLOG 96-00059 (1 fiche)

The Kingcome Timber Supply Area covers over 1.1 million hectares on northern Vancouver Island and part of the adjacent mainland. This discussion paper summarizes the technical reports for the Area to foster public comment on their findings. It outlines the background to the Area's Timber Supply Review and the land use issues that may affect timber supply in the Area. It then describes the Area in terms of timber, wildlife, fisheries, and tourism/recreation resources, the current allowable annual cut,

socio-economic conditions, the timber harvesting and processing sector, and current forest management practices. The paper also examines timber supply forecasts for the Area, the factors that may affect timber supply, and potential opportunities to offset reductions in short-term timber supply. Finally, the paper assesses the environmental and socio-economic implications of adjustments to future timber supply in the Area.

Laboratory testing and assessment of the Pickering PRD supporting frame

By A. Ghobarah. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. xli, 85 p. : *ill.*, *Bibl.* (Report / Canada. Atomic Energy Control Board. : INFO-0551)
MICROLOG 96-00677 (2 fiche)

The objective of this study was to design and test reinforced concrete beam-column subassemblages representing the beam, column, and joint of the center pier support of the pressure relief duct at the Pickering nuclear power plant. The investigators designed a one-third scale specimen of the subassemblage and tested it to failure under simulated seismic loads. A second specimen, tested in the same manner, contained shear reinforcement detailed according to provisions of the CAN3-N2187.3-M82 code. From the experimental data and failure mode of the tested specimens, the investigators conducted evaluations to determine the inelastic nonlinear behavior of the center pier structural system when subjected to various levels of ground motion.

Lake Robertson Hydroelectric Project : construction of a roller compacted concrete dam

By Michael Labelle and François Robitaille. Montreal : Canadian Electrical Assn, Hydraulic Power, Hydraulic Structures, Operations & Design, 1995. 12 p. *Presented at Electricity '95.*
MICROLOG 96-00082 (1 fiche)

The Lake Robertson Hydroelectric Project consists of a 21-megawatt power plant, concrete gravity dam, spillway, and associated transmission lines and substations. The project is located in an isolated area on the north shore of the St Lawrence about 1,200 kilometers northeast of Montreal. This paper describes the logistics of constructing the dam and transmission lines in an area accessible only by aircraft or boat. The focus of the paper is on the construction of the dam using roller compacted concrete, which enabled the dam to be made more compact than the originally-proposed earthfill dam and which consequently was more economical to build.

Laser-ablation ICP-MS micro-analysis of calcite cement from a Mississippi-Valley-type Zn-Pb deposit, Nova Scotia : dramatic variability in REE content on macro- and micro-scales

By Daniel J. Kontak and Simon Jackson. Halifax : Dept. of Natural Resources, 1995. 23 p. : *ill.*, *Bibl.* *In Canadian Mineralogist* : vol. 33, 1995.
MICROLOG 96-00550 (1 fiche)

Trace-element chemistry of hydrothermal minerals, particularly their rare earth element (REE) content, enables making inferences with respect to source reservoirs in equilibrium with the mineralizing fluids. This paper presents results of laser ablation inductively coupled plasma (ICP)-mass spectrometry (MS) analysis of calcite cement in the Gays River deposit, a Mississippi Valley type zinc-lead deposit hosted by Visean-age dolomitized carbonates. The investigators determined the proportion of REE of five different types of syn- to post-mineralization calcite cement. The laser ablation-ICP-MS method permits analysis on a 40-micron scale and determination of zoning profiles by either vertical ablation or lateral traverses. The authors explain the data by a combination of changing fluid/rock ratio and closed-system fractionation of the REEs.

Legal aid duty counsel systems in Canada : summary report

Prairie Research Associates. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1994. iv, 45 p. (Working document / Canada. Dept. of Justice. Research Section ; WD1994-14e) *French ed. (Les Différents systèmes canadiens d'aide...)* : 96-00540/1.
MICROLOG 96-00555 (1 fiche)

This report summarizes the main findings and observations from a detailed technical report (fiche 96-00468) on legal aid duty counsel. The research for that report proceeded in two ways: an extensive and comprehensive review of duty counsel in all Canadian jurisdictions, undertaken to allow a degree of comparison among provincial systems; and an intensive examination of duty counsel systems in Ontario, New Brunswick, British Columbia, and Manitoba. This summary report outlines the general role of duty counsel, the legislative context, and the types of duty counsel services provided. The summary then discusses implications of the review findings for legal aid services and notes the strengths and weaknesses of the duty counsel systems. Issues discussed include counsel qualifications, access to services, counsel quality and performance, services for special groups, and the impact of court decisions on duty counsel services.

Legal information and wife abuse in immigrant families

By San San Sy and Sudha Choldin. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1994. v, 66 p. : *Bibl.* (Technical report / Canada. Dept. of Justice. Research Section ; TR1994-3e)
MICROLOG 96-00374 (1 fiche)

This report reflects the perceptions and experiences of the women who work with wife abuse in the immigrant community. The findings are based on semi-structured interviews with service providers from immigrant service agencies. The report begins with discussion of key concepts of wife abuse in general and in immigrant communities, then explains the process used to develop the interview schedule and to identify the role of service provid-

ers who participated in the study. The third section of the report synthesizes the information provided by the key informants and describes themes that recurred throughout the research. These themes include isolation, disenfranchisement, distrust of political and legal institutions, cultural constraints, racism, language and cross-cultural training, and violence. The report ends with recommendations regarding the role of legal services and legal information for abused immigrant women.

The Lesotho Highlands Water Project : an example of complex international cooperation

By R.G. Witherell. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Hydraulic Power Section, 1995. 14 p. : *Maps Presented at Electricity '95*.
MICROLOG 96-00075 (1 fiche)

Unlike other countries in central southern Africa, Lesotho has ample water supplies. However, it depends on imports from South Africa for its electric power supply. Combining Lesotho's desire for independent power supply with South Africa's need for new water supply made the Lesotho Highlands Water Project politically and economically attractive. The Project comprises five major dams, 225 kilometers of tunnels, three pumping stations, and hydropower plants of 72 and 110 megawatt capacity. This paper describes the international agreements, financing arrangements, contracting process, and implementation methodology for the Project. It also reviews the engineering and construction progress on the Project to date.

Life assessment process

By Stone & Webster, R.W. Lukas. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Thermal & Nuclear Power Section, 1994. 15 p. : *Bibl. Presented at Utility Thermal Plant Life*

Management Conference, part of Electricity '95.
MICROLOG 96-00185 (1 fiche)

The main objective initiating the life assessment process at a power plant is the extension of the operating life of the plant or an individual unit. A significant number of secondary objectives, such as reduced emissions and added cycling capability, may also arise. This paper discusses the life assessment processes utilized by Stone & Webster, based on experience to date. The process begins with identifying the objectives of the assessment, establishing the planned future use of the plant, and selecting the components, systems, and structures to be included in the assessment. The actual evaluation is done using a three-level approach, starting with a review of available plant-related data, and extending to detailed materials/parts testing for certain components. The process requires well-structured data management to allow updating. The paper also describes the station life management process, an ongoing method of life cycle management.

Life assessment study : essential in charting future operational plans at Battle River 1 and 2

By Mak Ibrahim. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Thermal & Nuclear Power Section, 1994. 14 p. : *Bibl. Presented at Utility Thermal Plant Life Management Conference, part of Electricity '95*.
MICROLOG 96-00184 (1 fiche)

Units BR-1 and BR-2 at the Battle River Generating Station in Alberta have nameplate ratings of 30 megawatts each and were commissioned in 1956 and 1964 respectively. This paper describes a study undertaken to establish the current condition of each unit, to estimate their remaining service life, to make recommendations that would assure their safe and reliable future operation, and to estimate refurbishment costs to achieve varying degrees of extension of their operating life. The study was limited to the units' boilers and associated equipment, turbines, generators, and high-energy piping, and considered five retirement scenarios. Each scenario covered three programs: life extension, life assessment, and safety and improvement. Results presented include cost estimates for each program under each scenario, as well as estimates of remaining service life.

Life cycle management, Nova Scotia Power Inc.

By James A. Taylor. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Thermal & Nuclear Power Section, 1994. 11 p. : *Bibl. Presented at Utility Thermal Plant Life Management Conference, part of Electricity '95*.
MICROLOG 96-00183 (1 fiche)

Nova Scotia Power is faced with the problem of maintaining the operation of older coal-fired power plants. After an introduction reviewing the characteristics of the company's thermal units, staffing philosophy, and maintenance philosophy, this paper describes the approach used to maintain or enhance unit heat rates, forced outage rates, and environmental performance of the thermal units as they age. The approach is called life cycle management and it addresses the whole power plant on a system basis, with each system (such as steam generator, coal handling, turbine/generator, and water handling systems) broken down into components. For each component, data are collected to identify such matters as the seriousness of the consequences of its failure, the probable failure mechanism, inspection techniques and frequency. The information is then used for long-term planning and analyses of possible performance.

Lightning, a guide for power line maintenance staff

By Abdul M. Mousa. Montreal : Canadian Electrical Assn, 1995. 16 p. : *Ill., Bibl. Presented at Electricity '95. On cover: Paper no. 69*.
MICROLOG 96-00140 (1 fiche)

Lightning concerns power line maintenance staff in three ways: they have to repair damage caused by it, guard against its hazards, and have some knowledge of its underlying physics to improve their effectiveness in maintenance work. This paper reviews background information on lightning physics that would be of interest to power line maintenance, including the nature of cloud discharges. It then notes the incidence and frequency of lightning strikes, evaluates the ability of a power line to attract lightning, and summarizes the various types of lightning damage to power lines and structures, with special attention to insulator puncturing. Finally, the paper reviews the methods used to protect power lines from lightning damage and the safety precautions to be taken when working on de-energized lines and on live lines.

Linking land titles/registry systems in Canada to land-related environmental information

By J. Anthony Cassils. Ottawa : National Round Table on the Environment & the Economy, 1995. 14 p. (Working paper / National Round Table on the Environment & the Economy (Canada) ; no. 20)
MICROLOG 96-00031 (1 fiche)

This paper reviews the need and opportunities to provide comprehensive, land-related environmental information by linking geographic databases with land title/registry systems. Such linkage is seen as increasingly necessary, given the demand for integration of the environment and the economy and management for sustainable development. For example, many landowners or prospective purchasers of land would be interested in knowing more about the environmental condition of the land in question. The paper presents some examples of potential linkages between land-related and environmental databases of intergovernmental bodies, the federal government, provincial governments, companies (including Crown corporations), and the United States government. The paper outlines criteria for database integration and offers some specific suggestions on database linking.

Little cherry disease in British Columbia

Victoria : Ministry of Agriculture, Fisheries & Food, 1995. 8 p. : *Ill.*

MICROLOG 96-00428 (1 fiche)

Little cherry disease is a serious virus disease of sweet and sour cherry in British Columbia. The virus is spread from tree to tree by the apple mealybug (*Phenacoccus aceris*). Affected trees produce fruit that is smaller than normal, with poor color and poor flavor. Provincial regulations make removal of infected trees mandatory. This booklet describes the history of little cherry disease infection in British Columbia, the mealybug life cycle, symptoms of the disease by cherry variety, other disorders giving similar symptoms, and methods of controlling the disease.

Load factors used in the design of CANDU concrete containment structures

By M.A. Nessim and H.P. Hong. Ottawa : Atomic Energy Control Board, 1994. viii, 72 p. : *Ill., Bibl.* (Research report / Canada. Atomic Energy Control Board ; INFO-0485)

MICROLOG 96-00644 (1 fiche)

This report describes a reliability-based approach used to assess the design loads and load factors employed in the CAN/CSA-N287.3 standard for de-

sign of CANDU containment structures. Reliability implied by the standard was estimated for selected design cases representing the main containment structural members and the key load combinations specified in the standard. For each design case, the investigators calculated the reliability associated with the relevant limit state by using the probability distributions of the contributing loads and resistance parameters in a probabilistic model. The study assessed the calculated levels against a set of selected target values. The study results show the soundness of the approach taken in the standard for specifications of load combinations and load combination factors. The approach developed forms a basis for further verification and calibration of design requirements given in the standard.

Local integrated resource planning of a large load supply system

R.F. Chow...et al. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operating Section, Power System Reliability Subsection ; Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operating Section, Transmission & Station Planning & Operations, 1995. 19 p. : *Ill., Bibl.* *Presented at Electricity '95.*

MICROLOG 96-00104 (1 fiche)

This paper discusses the basic concepts of an Ontario Hydro study which investigated various alternatives to meet expected future electrical load growth in the City of Toronto. The study evaluated the technical and economic effectiveness of a number of demand-side management options, local generation options, and the traditional transmission and distribution options in the context of local integrated resource planning. The objective of the study was to sequence the available options in the most cost-effective manner, considering different cost perspectives and including costs for estimated impacts on customers in terms of supply reliability. These goals were achieved by building on approaches developed in other local integrated resource planning studies to incorporate the benefits of unbundled area and time-specific avoided costs in a dynamic simulation. The study also utilized a new methodology developed for incorporating the worth of reliability into the evaluation process.

no YM32-1/94-4-1995-05F

MICROLOG 96-00700 (1 fiche)

Dans ce document, nous visons à faire le point sur la Loi canadienne sur la santé dans ce contexte de réforme. Nous ne proposons aucune interprétation juridique de la Loi; nous cherchons plutôt à rendre compte de l'évolution de celle-ci et à examiner ses perspectives d'avenir. Dans la première partie, nous rappelons sommairement les raisons qui justifient l'intervention gouvernementale dans le secteur de la santé, tandis que dans la deuxième nous

décrivons les rôles respectifs du gouvernement fédéral et des provinces dans ce domaine. Dans la troisième partie, nous retraçons brièvement l'histoire de la Loi, et dans la quatrième, nous présentons un aperçu des normes et conditions qui se rattachent à celle-ci et les décrivons succinctement. Dans la cinquième partie, nous traitons des sanctions prévues dans le cas des manquements à la Loi, et dans la sixième et dernière, nous énumérons un certain nombre d'options visant à maintenir ou à améliorer la Loi.

Making sense of the Canadian Charter of Rights and Freedoms : a handbook for administrators and teachers

By Jonathan L. Black-Branch. Toronto : Canadian Education Assn, 1995. v. 74 p. : *Bibl. French ed. (Comprendre la Charte canadienne...)* : 96-00312/1. ISBN 0-920315-78-X
MICROLOG 96-00305 (1 fiche) (Available on fiche only)

The purpose of this guide is to provide a user-friendly handbook to inform school administrators and teachers about the Canadian Charter of Rights and Freedoms, highlighting some of its more prevalent implications for educational practice. The guide begins with a brief introduction to the Charter, followed by a synopsis of the pertinent rights and freedoms. The text then focuses on ten main concerns under the Charter and how they relate to both denominational and non-denominational schools and school systems throughout Canada. The sections of the guide cover legal, religious, equality, and minority language rights, plus rights relating to special education and school attendance. Where applicable, each section presents true-to-life case scenarios which highlight suggestions for dealing with those and similar situations.

The Management of carbon-14 in Canadian nuclear facilities

Canada. Advisory Committee on Radiological Protection. Ottawa : Atomic Energy Control Board of Canada, 1995. iii, 42 p. : *ill., Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0569(E))
MICROLOG 96-00693 (1 fiche)

In Canada, derived emission limits for the release of radionuclides from nuclear facilities are set to ensure that the dose to a member of a critical group from one year's release does not exceed the limit on annual dose to a member of the public set by the Atomic Energy Control Regulations. Concern has been expressed as to whether this procedure provides adequate protection to the public for certain radionuclides such as carbon-14 which can accumulate in and be dispersed through the environment. This report reviews sources and quantities of carbon-14, environmental levels of carbon-14 from nuclear power reactors in Canada, current waste management practices for carbon-14, dose estimates for carbon-14, and current approaches to regulation pertaining to carbon-14. The report concludes with recommendations regarding dose limits, emissions, waste management, and other aspects of carbon-14 produced in the Canadian nuclear industry.

Margins for uncertainties in Hydro-Quebec's short-term operations planning

By M. Beaumont and M.P. Raymond. Montreal : Canadian Electrical Assn. Engineering & Operating Division, Power System Planning & Operation Section, Power Resource Planning & Operation Subsection, 1990. 13 p. : ill., Bibl. *Presented at Electricity '95.*
MICROLOG 96-00117 (1 fiche)

To meet its load requirements during the winter period, Hydro-Quebec may occasionally have to resort to resources such as thermal generation and capacity imports, which are more costly than the base load generation of hydroelectric and nuclear plants, and which are subject to time delay constraints that require planners to make decisions up to 24 hours in advance. This paper describes how Hydro-Quebec has designed a short-term margin policy to be used by operators and short-term planners that will address winter load requirements while minimizing costs and maintaining reliability standards. The utility's approach takes into account uncertainties on internal load forecasts and unit forced outages, risks of not meeting firm load and reserve requirements, and the costs, time delays, and operating constraints of non-hydraulic resources.

The Measurement of tritium in Canadian food items

By R.M. Brown. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. v. 32 p. : ill., Bibl. (Report / Canada. Atomic Energy Control Board ; INFO-0499)
MICROLOG 96-00649 (1 fiche)

This report presents results of analyses of free water tritium (HTO) and organically bound tritium (OBT) found in food items locally grown near Perth, Ontario and in grocery store produce and locally grown items from the vicinity of the Pickering nuclear power plant. The investigative technique used was the measurement of helium-3 ingrowth in samples by mass spectrometry, because of its sensitivity and freedom from opportunity for contamination during processing and measurement. The results reported include the HTO and OBT concentrations at each site, with comparisons to the concentrations expected on the basis of known levels of tritium in the local atmosphere and precipitation; HTO and OBT concentrations by product type; and influence of atmospheric HTO emitted by the power plant on the concentrations observed.

Measuring the costs of children in Canada : a practical guide, phase I

Ottawa : Dept. of Justice, Research Section, 1991. 87 p. : ill. (Technical report / Canada. Dept. of Justice, Research Section ; TR1991-13a)
MICROLOG 96-00498 (1 fiche)

This report begins with a discussion of some of the reasons for measuring the costs of children and some of the questions related to how these costs are measured. The report then reviews existing national household surveys in Canada and their usefulness for determining the costs of children. The bulk of the report is a critical review of methods for measuring the costs of children, with illustration of their implementation on Canadian data to elucidate their performance and shortcomings. The methods reviewed include expert and direct methods, subjective methods, Engel (or iso-prop) methods, Rothbarth (or adult good) methods, utility methods, the Barten method, the Prais-Houthakker method, the constant scale method, consumption methods, and within-family allocation methods. Finally, the report makes recommendations based on a subjective assessment of which method is likely to be the least misleading.

The Mentally ill and the criminal justice system : innovative community-based programs

By Carol Milstone. Ottawa : Health Canada, Health Programs & Services Branch, Health Services Directorate, Mental Health Division, 1995. 40 p. : Bibl. ISBN 0-662-21715-2 CCG-P no. H39-320/1995E
MICROLOG 96-00034 (1 fiche)

As mental health services have been deinstitutionalized down to the community level over the past few decades, the affected individuals often have difficulty in accessing community mental health services and may find themselves in the criminal justice system, primarily for minor offenses, where treatment needs are often unrecognized. This report first discusses the delivery of mental health services in an era of deinstitutionalization and reviews service delivery systems and the criminalization of the mentally ill. The report then provides a sampling of innovative community-based services, programs, and policies that seek alternatives to the

incarceration of persons with serious mental illnesses who become involved in the criminal justice system for committing minor offenses. For each service or program, the report describes its title, format, application, services provided, and contact names, addresses, and phone/fax numbers.

Mercury mitigative measures related to hydroelectric reservoirs : the La Grande Complex experience

By Julie Sbeghen and Roger Schetagne. Montreal : Canadian Electrical Assn, Hydraulic Power Section, Environmental Subsection, 1995. 12 p. : Bibl. Presented at *Electricity '95*. At head of title: *Environmental mitigation session*.
MICROLOG 96-00079 (1 fiche)

The LaGrande hydroelectric complex in the James Bay region of Quebec comprises nine generating stations and requires the impounding of eight reservoirs, involving flooding of over 4,000 square miles of land surface. Flooding of land which contains large quantities of organic material leads to transformation by bacteria of sedimentary inorganic mercury into methylmercury, which in turn bioaccumulates in fish. This paper notes the increase in mercury levels in major fish species in the LaGrande 2 Reservoir and discusses the implications for local Cree populations, who rely on fish as an important food source. The paper evaluates a number of at-source remedial measures aimed at reducing mercury levels in reservoir fish, and describes compensation measures adopted to reduce Cree exposure to mercury while ensuring their traditional way of life. The paper concludes with a case study of the Eastmain-1 project and the compensation measures proposed.

Metallographic methods for creep life assessment of plant components

By H.J. Westwood and M.A. Clark. Montreal : Canadian Electrical Assn, Engineering & Operating Branch, Thermal & Nuclear Power Section, 1994. 18 p. : ill., Bibl. Presented at *Utility Thermal Plant Life Management Conference, part of Electricity '95*.
MICROLOG 96-00194 (1 fiche)

This paper summarizes methods developed within Ontario Hydro to assist in life assessment of steam tubing, headers, piping, and associated weldments. The methods are all based on measurable parameters, either in terms of component dimensions or, more generally, on microscopic examination of the microstructure of the material. An important aspect of the methods is that they can be essentially non-destructive. For superheater and reheater tubing, the utility has developed a life prediction model and refined, in which the creep rupture life can be predicted from the measured wall thinning rate. For headers, piping, and associated welds, surface replication has been adopted for the detection and assessment of creep cavitation damage. The scope of replication was recently broadened significantly to include metal temperature estimation and detection of creep strain concentration. Other methods include grain shape analysis and quantitative metallographic assessment of creep life.

Methods of low NOx retrofit of utility boilers and impact on boiler performance

By J. Zhou and M. MacKenzie. Montreal : Canadian Electrical Assn, Thermal & Nuclear Power, Station Construction & Commissioning, 1995. 12 p. : ill. Presented at *Electricity '95*. On cover: *Technical paper*.
MICROLOG 96-00092 (1 fiche)

The combustion means available to achieve nitrogen oxide (NOx) reductions on existing power plant boilers include the retrofit of low-NOx burners, two-stage combustion, flue gas recirculation, and reburning that adopts both air staging and fuel stag-

ing to control the NOx. This paper outlines the circumstances under which the various approaches are practical and discusses the impacts of low-NOx retrofit on boiler performance, including the impact of staging combustion on boiler efficiency, potential concerns over slagging, high temperature corrosion concerns, and the demand for additional auxiliary power. Finally, the paper notes the utility of increasing the fineness of pulverized coal to compensate for side effects due to air staging and mixing delays in low-NOx burners, and outlines the experience with low-NOx retrofit projects at five power plants.

MinD Ur Ps & Qs : four powers, computed from voltages and currents under IEEE Std-100, meet rational metering requirements

By Donald F. Bullock and David D. Elmore. Montreal : Canadian Electrical Assn, 1995. 10 p. : *ill.* Presented at *Electricity '95. Appendices, Definitions of power and related quantities, and Measurement of polyphase reactive power* (11, 4 p.) laid in.

MICROLOG 96-00170 (1 fiche)

This paper begins with a history of the definition and measurement of various electrical quantities under conditions of periodic but non-sinusoidal current and voltage. It then presents the standard definitions for four of these quantities: active power (P), reactive power (Q), apparent power (U), and distortion power (D). Some desirable attributes for a rational and practical definition of U are listed and some unusual measurement examples are used to illustrate the points raised. The authors discuss why they believe the existing definitions are not only adequate but well-suited to revenue metering applications. They note that advances in digital technology now enable correct calculation of power in accordance with standard definitions. The attachments include a 1935 article by Curtis and Silsbee on definitions of power and related quantities, and a procedure for measurement of polyphase reactive power by the General Electric Meter Department.

Minimum standards for the establishment and remeasurement of permanent sample plots in British Columbia

Victoria : Ministry of Forests, Inventory Branch, Forest Productivity Council of British Columbia, Secretariat, 1995. viii, 22 p. : *ill.* ISBN 0-7726-2651-0
MICROLOG 96-00278 (1 fiche)

The standards provided in this document set out the minimum criteria for establishing and measuring permanent sample plots used for assessment of forest growth. The standards are intended for use by forestry personnel and agencies in British Columbia that cooperate with the Coastal and Interior Forest Productivity Councils to establish and maintain a data base of forest productivity measures for the province's productive forest lands. The standards cover plot measures, tree measures, allowable non-sampling measurement errors for permanent samples, and definitions. Appendices include standard symbols and computer codes for growth and yield, names and recommended symbols for British Columbia tree species, damage incidence and condition codes, and damage severity and mortality condition standards for individual trees.

Modelling of induction motors in the EMTF using existing synchronous machine models

By R. Hung and H.W. Dommel. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operating Section, Insulation Coordination Subsection, 1995. 13 p. : *ill.*, *Bibl.* Presented at *Electricity '95*. MICROLOG 96-00109 (1 fiche)

Analysis of induction motor performance is of considerable interest given the extensive use of such motors in conventional applications and in variable-speed drives. This paper presents a method of using the electromagnetic transients program EMTF in which the existing synchronous machine model is slightly modified to perform as an induction machine. This approach offers the advantage of using essentially only one code for modelling both induction and synchronous machines. The paper discusses the similarities between the synchronous and induction machine models, with reference to equivalent circuits, and describes the code modifications needed to enable a synchronous machine model to perform induction motor simulations. The paper concludes with a case study of the modelling of the start-up of a large induction motor.

Modelling of single conductor and damper vibration

By J. Vecchiarelli, D.G. Havard and E.G. Currie. Montreal : Canadian Electrical Assn, Transmission Section, Conductor & Hardware Subsection, 1995. 21 p. : *ill.*, *Bibl.* Presented at *Electricity '95*. MICROLOG 96-00174 (1 fiche)

This paper presents a mathematical model of aeolian conductor vibration and a detailed description of the forced response method for the testing of Stockbridge-type dampers. The mathematical model is based on the fundamentals of conductor vibration and is more comprehensive than the popular energy balance method. For example, it is able to account for the effects of travelling waves and non-linear damping of the conductor and dampers. The paper includes experimental data to emphasize the importance of phase shifting and nonlinearities in the forced response method. An inclusive guide on this method is included in order to assist both new and experienced investigators of Stockbridge-type dampers.

A Monte Carlo based method for establishing reserve margin criteria

By W.K. Marshall... et al. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operating Section, Power System Reliability Subsection ; Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operating Section, Transmission & Station Planning & Operations, 1995. 9 p. : *ill.*, *Bibl.* Presented at *Electricity '95*. MICROLOG 96-00105 (1 fiche)

This paper examines the use of reserve margin as a reliability measure in an electrical power system, and attempts to establish the optimal numerical value of the reserve margin for an operating power system. The methodology makes use of both probabilistics and Hierarchical Level II system conditions in the determination of outage costs. The software tool used in the study is the CREAM Monte Carlo based probabilistic composite power system reliability package. The paper presents results for both an isolated and interconnected power system in New Brunswick, and for a range of values of outage cost rates.

Multi-media monitoring of trace metals and pesticides in the Battle River, 1989-90

Prepared by Anne-Marie Anderson...et al. Edmonton : Alberta Environmental Centre ; Alberta Environmental Protection ; Regina : Saskatchewan Environment & Resource Management ; Ottawa : Environment Canada, 1994. xlii, 264 p. : ill., Bibl.
MICROLOG 96-00024 (3 fiche)

This report describes a pilot program undertaken to assess and compare the suitability of water and other media such as bottom sediments, suspended sediments, and biota for monitoring heavy metals and pesticides in the Battle River. The report details the development of methods for analysis of field samples, such as atomic absorption spectroscopy and their evaluation in terms of quality control samples analyzed in conjunction with field samples. The investigators used standard protocols of Environment Canada to determine phenoxy acid herbicides, neutral herbicides, organochlorine pesticides, and non-pesticide total polychlorinated biphenyls. The report presents results of trace metal and pesticide analyses, including longitudinal and seasonal trends, relationships of detected levels among different media, the relationship between metal levels and organic content and particle size in sediments, and factors affecting those levels.

Nass Timber Supply Area, formerly Kalum-North area of Kalum TSA : rationale for allowable annual cut (AAC) determination, effective January 1, 1996

By Larry Pedersen. Victoria : Ministry of Forests, 1995. 62 p. : Bibl.
MICROLOG 96-00041 (1 fiche)

The Nass Timber Supply Area covers 1.66 million hectares in the Prince Rupert Forest Region in northwestern British Columbia. About 16% of the total Area's land base is available for timber harvesting. This document outlines the history of the allowable annual cut (AAC) for the Area and reviews the guiding principles used to determine the AAC. The report then considers the factors required for that determination, including the role of the base-case timber supply forecast, inventory information, the land base contributing to the timber harvest, the timber supply profile, regeneration delay, silvicultural systems, decay and waste, utilization, integrated resource management objectives, harvest flow, local objectives, and processing facilities. The appendices include appropriate sections of provincial forestry legislation and a summary of public input into the Area's Timber Supply Review.

Naturescape British Columbia : the provincial guide

Co-writers, Susan Campbell & Sylvia Pincott ; editor, Larry Grainger. Ottawa : Canada ; Victoria : The Province, 1995. 52 p. : ill., Bibl. (Stewardship series / British Columbia and Canada) On cover: *Caring for wildlife habitat at home.*
ISBN 0-7726-2633-2
MICROLOG 96-00573 (2 fiche)

The Naturescape British Columbia program has the objective of restoring, preserving, and enhancing wildlife habitat in urban and rural landscapes throughout the province. This guide explains how people can apply the program to their home areas. It begins with an introduction on the importance of biodiversity, the context of the Naturescape program, and the principles of wildlife habitat. It then describes the components of wildlife habitat, including native plants, wildlife shelter and food, water sources for wildlife, and long-term nurturing of habitat. Guidelines are provided regarding various types of wildlife shelters such as brush and rock piles, nest boxes, feeders, gardens that attract wildlife, pools and ponds, xeriscaping, composting, and designing a Naturescape habitat. Finally, the

guide offers suggestions for coexisting with wildlife in an urban setting, such as avoidance of bird collisions with windows and minimizing wildlife access to houses.

A national network approach to estimating trailer axle load

By Yves Breault ; for Transportation Development Centre, Policy & Coordination, Transport Canada and Transports Québec. Montreal : Centre de recherche industrielle du Québec, 1992. xi, 23 p. : ill., Bibl.
MICROLOG 96-00455 (1 fiche)

New regulations governing maximum truck loads specify maximum allowable load by axle rather than by total payload. This has increased interest in on-board systems for estimating mass borne by individual truck axles, mostly by using strain gauges or fibre optics. This report describes an alternative approach based on measurement of a structure's natural frequencies using a combination of neural network and statistical identification methods. This approach consists of two phases: mass-frequency relationships are first learned by the neural network, and initial mass estimates are generated from measured frequencies by interpolation and then refined using iterative statistical techniques.

A New generation of electronically controlled pumping plants for HPLF cables

S.M. Foty...et al. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Transmission Section, Overhead Line Electrical & Underground Cables Subsection, 1995. 12 p.
Presented at Electricity '95.
MICROLOG 96-00135 (1 fiche)

Ontario Hydro operates a system of underground transmission cables, including 160 kilometers of high pressure liquid-filled (HPLF) cables which are pressurized using an insulating medium. Pumping plants are used to adjust pressure automatically to the cable's varying operating conditions. These plants have used electromechanical devices for pressure control and status annunciation, but in the 1980s it became apparent that certain components would not be available much longer. In addition, recent advances in electronic data systems were seen to provide an opportunity to improve pumping plant operation. This paper describes the rationale for introducing a new generation of programmable logic controlled pumping plant at the Hamilton Newton Transmission Station. It also describes the plant controls, system configuration, control logic, fluid leak detection system, operator interface, alarm and data logging system, and remote access capability.

NOx optimization on Alberta Power's and TransAlta Utilities's Sheerness Unit no. 2

By Dilip P. Deshpande. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Thermal & Nuclear Power Section, Environmental Requirements Subsection, 1995. 33 p. : *ill.*
Presented at Electricity '95. On cover: *Alberta Power Ltd.*
MICROLOG 96-00090 (1 fiche)

Sheerness Unit 2 is a 381-megawatt coal-fired boiler at a power plant located near Hanna, Alberta. The boiler is of a conventional tangential fired design, without offset air or low-nitrogen oxide (low-NOx) burners. Although NOx emissions meet provincial environmental guidelines, the operators decided to determine what NOx reductions could be achieved with the present unit, without undue operational or maintenance problems. This paper describes the technical program conducted at Sheerness 2 to acquire a good understanding of the unit's operating parameters and to optimize the pulverizer operation, air and coal flow distribution, boiler controls, and nozzle tilts and separation angles. It also reviews the subsequent test program in which various operating parameters were varied to determine their effect on NOx reduction. The paper concludes with recommendations regarding boiler operation.

NUG reliability implications in a composite generation and transmission system

By Roy Billinton and Steve Adzanu. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operation Section, 1995. 19 p. : *ill.*, *Bibl.* *Presented at Electricity '95*.
MICROLOG 96-00102 (1 fiche)

This paper illustrates the utilization of reliability worth concepts involving non-utility generation (NUG) in composite generation and transmission systems. To capture the effects of injection of electrical energy from NUG development at locations in the grid which would not normally be considered by the utility as conventional sites for generation development, the reliability evaluation techniques used to assess those impacts require a Hierarchical

Level II assessment. The paper evaluates the impact of NUG on the expected cost of customer interruptions or unserved energy of a composite generation and transmission system using two hypothetical systems as test cases. The investigators conducted the analysis using the COMREL (COMposite system RELiability evaluation) program, based on the contingency enumeration technique. The paper presents base-case results and compares them to results for composite systems modified by NUG.

L'Obligation de fiduciaire du Canada envers les peuples autochtones dans le contexte de l'accès au Québec à la souveraineté, vol. 1 : dimension internationale

Par S. James Anaya, Richard Falk et Donat Pharand. Ottawa : Commission royale sur les peuples autochtones, 1995. iv, 188 p. : *Bibl.* *L'éd. anglaise* (Canada's fiduciary obligation to Aboriginal...): 96-00704/2. ISBN 0-660-95105-3 GCE-E no Z1-1991/1-41-6-1F
MICROLOG 96-00703 (3 fiche)

Pour le projet présenté dans ce document, les obligations de fiduciaire envers les peuples autochtones ont été analysées, d'une part en vertu du droit canadien, et d'autre part en vertu du droit international. Même si elles reposent sur des sources distinctes et sur des justifications juridiques légèrement différentes, ces analyses ont abouti à des conclusions très semblables, qui se renforcent mutuellement, à savoir que le gouvernement a une obligation de fiduciaire envers les peuples autochtones du Québec à toutes les étapes de

tout processus par lequel le Québec pourrait accéder à la souveraineté en tant qu'État distinct du Canada. Ce document se penche précisément sur l'obligation de fiduciaire du Canada envers les peuples autochtones dans le contexte de l'accès du Québec à la souveraineté.

On the design of finite impulse response filters for precision quadrature demodulation

By Robert J. Inkol and Ronald H. Saper. Ottawa : Defence Research Establishment Ottawa, 1995. x, 40 p. : *ill., Bibl.* (Report / Defence Research Establishment Ottawa ; no. 1264)
MICROLOG 96-00485 (1 fiche)

The accuracy of a digital quadrature demodulator depends on the matching of the frequency responses and relative phase shifts of the in-phase and quadrature filters. Finite impulse response (FIR) filters are attractive since well-known design methods exist which avoid undesired phase mismatches or nonlinearity. This paper presents a filter design approach that considers the relative matching of the frequency responses of the in-phase and quadrature filters. The results indicate whether the design concept can be realized for filters having a relatively small number of coefficients over the full quadrature demodulator bandwidth. The paper also compares the performance of filters designed using the proposed approach with those designed with other plausible filter design methods, such as the Hamming window design method.

Ontario beyond tomorrow : ideas for building a sustainable society

Prepared by the Premier's Council and the Ontario Round Table on Environment and Economy. Toronto : The Round Table ; The Council, 1995. 78 p. : *ill. French ed. (L'Ontario de demain...)* : 96-00568/2. ISBN 0-7778-4530-X
MICROLOG 96-00567 (2 fiche)

This publication argues for the integration of social, economic, and environmental concerns to produce a sustainable future for the province of Ontario. It notes the guiding values that should be considered in shaping actions that affect the future and reviews the changes that have occurred in Ontario since the late 1980s which affect the economy, the environment, and quality of life in the province. The publication then proposes targets to be achieved in creating a sustainable Ontario and outlines some key indicators of a sustainable society. Further sections of the publication outline the necessary changes in the way we think, and the challenges to society, the economy, and the environment which should be addressed.

Optimal parallel algorithm for the maximum clique problem in a family of proper circular arcs

By Selim G. Akl, Binay K. Bhattacharya and Damon M. Kallier. Burnaby, BC : Simon Fraser University, Centre for Systems Science ; Laboratory for Computer & Communications Research, 1994. 33 p. : *Bibl.* (Technical report / Simon Fraser University. Centre for Systems Science and Laboratory for Computer & Communications Research (B.C.) ; CSS/LCCR TR94-10)
MICROLOG 96-00292 (1 fiche) (Available on fiche only)

Proper circular arcs have applications in traffic control, cyclic scheduling, and compiler design. Given

a family of simple and proper circular arcs, it is required to identify a largest cardinality subset, all of whose members intersect. This paper describes a parallel algorithm to solve this problem on the Concurrent Read Exclusive Write Parallel Random Access Machine (CREW PRAM) model of computation. The algorithm uses $O(n/\log n)$ processors and requires $O(\log n)$ time. The paper provides the theoretical background to the algorithm and includes example problems.

Overcurrent protection co-ordination : a modern approach for modern devices

By P.J. Hindle and J.V. Sanderson. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operation Section, Protection Subsection, 1995. 11 p. : ill., *Bibl.* Presented at *Electricity '95*.
MICROLOG 96-00121 (1 fiche)

The increasing densities and reduced geographical spans of urban and industrial power systems call for the coordination of more stages of overcurrent protection up to increasingly high fault levels. Applying existing rules of relay coordination, especially for industrial power systems, may make achieving satisfactory coordination difficult. This paper proposes a modern approach to coordination which is able to take advantage of the improved performance of modern protective relays and circuit breakers. The proposed method can handle a mix of new and old equipment and is made most useful when implemented with commonly available spreadsheet software. The suggested approach justifies reduced time margins for relay coordination in many difficult applications. Example calculations are included to illustrate typical considerations for coordinating two digital protection relays where a vacuum circuit breaker is used to clear a downstream fault.

Parsons Power Generation Systems approach to life extension of steam turbines

By D.J. Gass. Montreal : Canadian Electrical Assn, Engineering & Operating Division, 1994. 18 p. : ill., *Bibl.* Presented at *Utility Thermal Plant Life Management Conference, part of Electricity '95*. On cover: *Rolls-Royce Industrial Power Group*.
MICROLOG 96-00186 (1 fiche)

Parsons Power Generation uses a turbine life prediction and extension methodology involving a phased approach in four stages, described in this paper. The first stage is analytical assessment, which revalidates the original design using modern computational techniques, identifies those components most at risk, their life-limiting mechanisms, and the locations at which maximum damage can be expected. The second stage is nondestructive evaluation of the extent of any materials degradation, using a combination of surface crack detection, ultrasonic inspection, dimensional checks, and specialized metallurgical examinations. If necessary, a third stage may include taking samples of materials from critical components for testing. The final stage is the rehabilitation of the turbine plant using such methods as re-profiling, weld repair, and retrofitting of components.

Performance of insulation coatings under contamination and icing conditions

By W.A. Chisholm and J. Kuffel. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operation Section, Electrical Performance of Insulators Committee, 1995. 11 p. : ill., *Bibl.* Presented at *Electricity '95*.
MICROLOG 96-00126 (1 fiche)

Ontario Hydro has found that winter fog conditions are particularly severe for contamination-related insulator flashovers. Most winter-fog problems are caused by a combination of contamination, ice, fog, and a melting temperature. Contamination migrates onto a thin layer of surface ice, stabilizes, and is converted to surface wetting when the ice melts. This paper describes tests conducted using a specialized chamber constructed to simulate winter fog flashover conditions for high voltage insulators. It reviews the parameters in tests where contamination, fog, and melting temperature conditions are imposed, outlines the method developed for dry-spraying contamination onto the test insulators, and presents results of tests conducted on porcelain insulators, improved insulators, and silicone coatings engineered for application on outdoor porcelain insulators. The tests indicate which insulators offer the best performance in winter fog

conditions.

The Persistent gap : exploring the earnings differential between recent male and female postsecondary graduates

By Ted Wannell. Ottawa : Statistics Canada, Analytical Studies Branch, 1989. 58 p. : *Bibl.* (Research paper series / Statistics Canada. Analytical Studies Branch ; no. 26) French ed. (*L'Écart persistant...*) : 96-00244/1.
MICROLOG 96-00249 (1 fiche)

While the participation rate of women in postsecondary education and full-time jobs in Canada increased dramatically in recent years, the earnings gap between men and women has narrowed more slowly. The 1984 National Graduates Survey and its followup survey of 1987 provide a unique window on the earnings gap in a very specific cohort of well-educated individuals: 1982 graduates of Canadian universities and community colleges. This paper analyzes the earnings differential between male and female graduates in this cohort through both descriptive and multivariate techniques. Results presented include the extent of the gap within subgroups of the graduates; the magnitude of the gap over time; and the degree to which the gap was accounted for by differences in the wage-generating characteristics of men and women. The concluding discussion centers on the earnings gap among community college graduates, the multivariate model, and the use of survey data to prove existence of discrimination.

Physiological evaluation of the Improved Environmental Clothing System (IECS), the new Canadian Forces cold weather clothing system

By John Frim. North York, ON : Defence & Civil Institute of Environmental Medicine, 1995. *Ill.*, 44 p. : *Ill.*, *Bibl.* (DCIEM publication / Defence & Civil Institute of Environmental Medicine (Canada) ; 95-18)
MICROLOG 96-00715 (1 fiche)

A new cold-weather clothing system for the Canadian Forces is known as the Improved Environmental Clothing System. The unique feature of this system is a novel approach to the layering principle in which the outer layer of clothing is added or removed as required to adjust the level of insulation during a change of activity level, in contrast to other concepts in which the underlayers are added or removed to vary insulation. This report presents results of a study undertaken to compare the physiological responses of human test subjects wearing the new clothing system to those when wearing the Forces' currently used cold-weather clothing systems in a laboratory setting under carefully controlled conditions of temperature, wind, and activity. Measurements included physiological data (deep body temperature, skin temperatures, heart rate, sweat loss), body heat exchange, and subjective thermal comfort.

Police responses to domestic violence : a study of the use of Criminal Code provisions relating to firearms

By Colin Meredith and Chantal Paquette. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Law Reform, Research & Development Directorate, 1991. *iv*, 49 p. (Working document / Canada. Dept. of Justice, Research Section ; WD1993-2e) French ed. (*Réponse policières à la...*) : 96-00445/1.
MICROLOG 96-00444 (1 fiche)

This report presents the findings of an exploratory study of the use by police of certain sections of the Criminal Code of Canada pertaining to firearms in the context of domestic violence. The study methodology included site visits to nine police jurisdictions across Canada to interview police officers who routinely deal with domestic calls and to interview individuals who process applications for firearms acquisition certificates. The sections of the Code relevant to this study concern the prohibition of firearm/explosive substance ownership, search and seizure of firearms/explosive substances, and denial of firearms acquisition certificates to those convicted of violent offenses or those with a history of violent behavior. The issues discussed in the interviews included possession of requisite knowledge by police, use of prohibition orders or

search/seizure powers, and refusals of firearms certificate applications.

Policing options available to First Nations in Canada

By Yves Dubé. Ottawa : Solicitor General Canada, Ministry Secretariat, 1995. *ii*, 35, *ii*, 37 p. : *Bibl.* (Aboriginal policing series / Canada. Solicitor General Canada) (User report / Canada. Solicitor General Canada ; 1995-06) *Bilingual* (*Modèles de rechange...*). ISBN 0-662-61955-2 CCG-P no. JS4-1/1995-6
MICROLOG 96-00224 (1 fiche)

The purpose of this document is to outline the policing options available to First Nations in Canada and other parts of the world. The exercise aim is to present various new policing alternatives for aboriginal communities in Canada. The document presents five auxiliary policing models and approaches to serve aboriginal communities in Canada. Each option is described and analyzed on the basis of various essential criteria in order to understand these policing (or public safety) models or approaches.

La Politique agricole -- Rév.

Par Sonya Dakers. Ottawa : Bibliothèque du Parlement, Service de recherche, 1995. 21 p. : *Bibl.* (Bulletin d'actualité / Canada. Bibliothèque du Parlement. Service de recherche ; 93-9F) *L'éd. anglaise* (*Agriculture : the policy...*) sur la même fiche. Révisé le 17 février 1995. ISBN 0-660-95063-4 GCC-E no YM32-1/93-9-1995-03F
MICROLOG 96-00695 (1 fiche)

En 1989, à l'aube de la dernière décennie du siècle, le gouvernement du Canada a entrepris un examen d'envergure du secteur agricole afin de déterminer quelles politiques permettraient à l'industrie de mieux relever les défis qui l'attendent sur les plans de la concurrence, de la santé et de l'environnement en cette période marquée par des changements rapides. Dans ce document, on vise à examiner l'évolution de la politique agricole fédérale, dont l'objectif premier est de donner au secteur agricole les outils dont il a besoin pour demeurer viable dans un monde nouveau caractérisé par la libéralisation des échanges.

Portable wireless metering

By Leo DiPaola. Montreal : Canadian Electrical Assn, Metering Section, Customer Value Through Metering Innovations Session, 1995. 15 p. *Presented at Electricity '95.*
MICROLOG 96-00171 (1 fiche)

Electric utilities often face situations where conventional distribution station billing meters have been removed from service. This paper presents an innovative alternative to traditional solutions to the temporary billing situation such as the use of clamp-on devices called electronic recording ammeters. It examines how Ontario Hydro is measuring current, voltage, and power factor at a distribution station to calculate kilowatts and kVAR using an easy-to-install product that communicates its live readings directly to an existing billing system. The devices used for the measurements can be easily attached to a power line with a hotstick and contain a special core which senses current flow and powers appropriate electronics, which digitizes voltage and current data and transmits it via low-power FM radio for subsequent data storage and processing. The paper includes results of field trials and outlines the advantages of using the device.

Power electronics applications using the EMTP

By H.W. Dommel. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operating Section, Insulation Coordination Subsection, 1995. 9 p. : ill., *Bibl. Presented at Electricity '95*.
MICROLOG 96-00111 (1 fiche)

The electromagnetics transients program EMTP was mainly written for the analysis of transients in electric power systems. It has since been used for the simulation of other types of power electronics circuits. Using EMTP in simulations for which it was not originally designed can lead to certain kinds of problems described in this paper. These problems are the numerical oscillations caused by the trapezoidal rule of integration, the adding of high impedances or stray capacitances in the modelling of floating sub-networks, the handling of instantaneous commutation of the current into a diode in circuits with gate turn-off thyristors, and the acceptance of negative values for currents in diodes or thyristors. For each problem, the paper suggests at least one solution.

The Power of Change, for a panel discussion on "the power of competition"

Presentation to the Canadian Electrical Association, Corporate Resources and Customer Services conference ; [John Elliott, Gary L. Fuqua]. Montreal : Canadian Electrical Assn, 1995. 9 p. At head of title: *Industra*.
MICROLOG 96-00197 (1 fiche)

This paper contains two presentations relating to competition in the electric power industry. The first discusses the situation in British Columbia, where opportunities exist for independent power generation from wood waste, or for cogeneration by non-utility producers, but where the provincial utility does not seem to facilitate such competition. The second focuses on the Bonneville Power Administration's perception of the current and possible future state of the electric power market and the steps it is taking to survive and prosper. Challenges faced by the Administration include low natural gas prices, a surplus of generation capacity in the western United States, and competition from independent power producers.

The Power of regulation : competition and regulatory change

By J. Mack Wathen. Montreal : Canadian Electrical Assn, 1995. 7 p. *Presented at the Power of Change Conference, part of Electricity '95*.
MICROLOG 96-00204 (1 fiche)

This paper focuses on the impacts of competition on utility regulation in the United States and some of the potential paths that regulation can take to satisfactorily address competitive pressures. Five attributes of regulation are outlined for consideration in near-term regulatory changes: pricing flexibility; ability to implement rapid changes to prices, terms, and conditions; the need to understand the risks and the regulatory rules; the ability to maintain confidentiality; and the ability to earn returns commensurate with risk. Other aspects of the regulatory environment discussed in the paper include the separation of those parts of the electricity business which are a natural monopoly from those which are not, the use of incentive regulation, and the need to impose the same obligations on all competitors to ensure fairness in competition.

Power system applications for B.C. Hydro's new Energy Management System

By Greg Dwernychuk and Brett Garrett. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Telecontrol & Telecommunications Section, 1995. 21 p. : *Bibl. Presented at Electricity '95*.
MICROLOG 96-00149 (1 fiche)

BC Hydro uses a hierarchical control center organization, with system control having responsibility for generation dispatch, interchange scheduling, and bulk transmission circuits. The utility initiated the Control Centre Redevelopment Project to install the Energy Management System (EMS) at the System Control Centre in Burnaby. The project includes installation of new remote terminal units, new VAX computers, and related hardware and software. This paper outlines the applications of the new EMS for automatic generation control, hydro generation dispatch, interchange transaction scheduling, generation scheduling, load forecasts, plant unit commitment, network analysis, and dispatcher training. It then discusses issues involved in working with the software vendor, such as project schedules, functional specifications, system architecture, sizing limits, quality assurance, software demonstration, and restrictions imposed by the modelling.

Preliminary market review for existing and future British Columbia freshwater aquaculture products

Prepared for British Columbia Ministry of Regional and Economic Development ; by View West Marketing. Victoria : Ministry of Agriculture & Fisheries, 1990. iii, 106 p. : *Bibl.* ISBN 0-7726-1114-9

MICROLOG 96-00026 (2 fiche)

This report presents results of a study intended to determine possible markets for British Columbia freshwater aquaculture products, to assess the factors which could constrain the success of those products in the identified markets, and to recommend possibilities, if any, for accelerated development of commercial freshwater aquaculture operations in the province. The report reviews production of selected freshwater products in western Canada, the western and southern United States, and in several overseas countries. It also reviews markets in western Canada, the western United States, Japan, and Hong Kong. Separate sections of the report analyze the markets by geographic area and by freshwater species: trout, Arctic char, crayfish, and other species such as carp, sturgeon, shrimp, and catfish. The report ends with some recommended marketing strategies to create market niches and to improve the market position of British Columbia producers.

Preliminary seismic microzonation assessment for British Columbia

Victoria : Resources Inventory Committee, Earth Sciences Task Force, 1994. vii, 131 p. : *Maps, Bibl.*

MICROLOG 96-00063 (2 fiche)

British Columbia is in a seismically active area. Seismic microzonation maps are essential tools for effective earthquake emergency and related land use planning. They may include information on one or more earthquake hazards, are compiled from geologic and geotechnical data, and reflect local ground conditions. The first part of this report reviews seismic hazards in British Columbia and gives examples of mapping techniques considered to represent the state of the practice for three selected hazards. It also presents examples of the costs and benefits of seismic microzonation work, the costs of selected seismic vulnerability studies and upgrading programs, and discussion of the economic impact of a major earthquake. The second part gives an overview of seismic hazard map preparation issues and general procedures for mapping two of the seismic hazards discussed in the first part (liquefaction and amplification of ground motion).

Presentation on capital system consultations : a report

Winnipeg : Dept. of Northern Affairs, Local Government Division, 1995. 51 p.

MICROLOG 96-00458 (1 fiche)

Through its capital program, the Local Government Development Division of the Dept. of Northern Affairs fulfills its mandate of providing municipal infrastructure in northern Manitoba communities. This report describes the consultations that the Division conducted to improve the capital program. The consultation process involved three rounds of meetings or workshops with staff and community representatives which first identified the major problems with the capital program system and then clarified the system processes and specified their impact on the communities. The community representatives and staff subsequently suggested improvements, explored how the parties could work together, assessed the extent to which they were prepared to commit themselves to the change process, outlined preliminary criteria to allocate resources, and advised on specific avenues for improvement.

Programmes de traitement pour les hommes violents : une analyse qui témoigne de leur succès

Par Nanci M. Burns, Colin Meredith et Chantal Paquette. Ottawa : Ministère de la Justice Canada, Section de la recherche, 1991. i, 74 p. : *Bibl.* (Document de travail / Canada. Ministère de la Justice. Section de la recherche ; WD1991-10b) *L'éd. anglaise (Treatment programs for men...)* : 92-05950/1.

MICROLOG 96-00665 (1 fiche)

Ce rapport vise à analyser et à évaluer les travaux de recherche sur l'efficacité des groupes de traitement pour les hommes qui agressent leur conjointe. Un travail documentaire en bibliothèque et des contacts personnels établis avec des chercheurs reconnus dans ce domaine ont alimenté l'étendue. Bien que la plupart des publications sur l'efficacité de ces traitements viennent des États-Unis, on a également intégré les études canadiennes mises à notre disposition. Le reste du document présente brièvement le contexte entourant la question de l'efficacité de ces traitements. Au chapitre suivant on trouve un examen plus approfondi des travaux de recherche. En conclusion, on donne un résumé de ce qu'on sait et de ce qu'on ignore sur l'efficacité des programmes de traitement pour les hommes violents. On trouve également un calendrier des recherches à venir dans ce domaine.

Projected population patterns and the Canadian justice system

By A.R. Gillis and Warren E. Kalbach. Ottawa : Dept. of Justice, Research Section, 1990. iv, 39 p. : *Ill., Bibl.* (Technical report / Canada. Dept. of Justice. Research Section ; TR 1991-16e) MICROLOG 96-00409 (1 fiche)

The most salient of the changes in population characteristics likely to affect the Canadian justice system will probably relate to size, distribution, concentration, and composition of the population. This report examines specific population variables for their potential repercussions on the justice system, including the degree of urbanization, age structure, sex ratio, ethnicity, divorce rates, and household composition. The first section of the report studies the relationships between those variables and crime, civil litigation, and fear of crime. The second section examines relevant demographic trends and the third presents the authors' projections concerning the increase or decrease in crime and delinquency, civil litigation, and fear of crime among the Canadian population.

Le projet du lac Robertson, c'est l'énergie hydro-électrique pour la Basse-Côte-Nord du Québec. Il se distingue par son isolement des grands centres urbains et par son climat particulier. Cet article illustre la démarche qui a été suivie pour la sélection du tracé, présente les éléments qui gouvernent la conception des pylônes et la construction des lignes faisant appel aux méthodes hélicoptères. Les faits saillants sont passés en revue. CA EN PW QU SC

La Propagande haineuse -- Rév.

Par Philip Rosen. Ottawa : Bibliothèque du Parlement, Service de recherche, 1995. 26 p. : Bibl. (Bulletin d'actualité / Canada. Bibliothèque du Parlement. Service de recherche ; 85-6F) Révisé le 11 avril 1995. ISBN 0-660-95019-7 GCC-E no YM32-1/85-6-1995-05F MICROLOG 96-00701 (1 fiche)

La propagande haineuse suscite une controverse d'une virulence et d'une ampleur qui ne semblent pas justifiées, si l'on ne tient compte que de son volume et de sa diffusion. La propagande incitant à la haine et préconisant l'inégalité raciale a probablement toujours existé, mais le dernier quart de siècle a été le témoin d'un débat généralisé sur ce qu'il convient de faire à ce sujet. Ce document porte sur la propagande haineuse et examine la vue d'ensemble; les lois fédérales; le pour et le contre des mesures législatives en matière de propagande haineuse; et, les mesures parlementaires. Proposals for harmonization of cost of credit disclosure laws in Canada

Federal/Provincial Cost of Credit Disclosure Working Group. S.I. : The Working Group, 1995. 34 p. MICROLOG 96-00273 (1 fiche)

This paper presents policy proposals intended to form the basis of harmonized federal and provincial rules governing disclosure of the cost of credit to consumers. The revised and harmonized laws will fulfil a commitment made in the June 1994 Agreement on Internal Trade, and will provide the core of consumer protection in an area of major and growing significance to both individual consumers and the Canadian economy. Objectives of the proposed reforms are to harmonize laws to reduce compliance costs and provide uniform consumer protection across Canada, to clarify and simplify cost-of-credit disclosure rules; and to modernize laws to take account of recent developments in credit markets. The proposals apply to such types of arrangements as fixed loans, lines of credit, credit cards, supplier credit, brokered loans, informal credit arrangements, and certain long-term leases of consumer goods. The proposals also relate to compliance provisions and remedies. CA CO JU PR SS

Proposed quantitative approach to safety for nuclear power plants in Canada

Canada. Advisory Committee on Nuclear Safety. Ottawa : Atomic Energy Control Board of Canada, 1995. vi, 31 p. : Bibl. (Report / Canada. Atomic Energy Control Board ; INFO-0568(E)) MICROLOG 96-00692 (1 fiche)

This report proposes a set of quantitative risk and frequency limits plus required processes to help ensure that a nuclear power plant in Canada meets the qualitative safety objectives defined in the Advisory Committee on Nuclear Safety report ACNS-2 and International Atomic Energy Agency report

75-INSAG-3. The quantitative approach proposed is consistent with a growing consensus on the need for, and the elements of, a quantitative approach to risk management of all major activities in an advanced industrial society. The approach consists of qualitative risk or frequency limits that must not be exceeded under any circumstances; the use of ALARA (as low as reasonably achievable) and VIA (value-impact analysis) processes to establish acceptable risks or frequencies below the limit values; and exemption levels based on de-minimis risks below which ALARA or VIA processes are not required. The Prosecution of sexual offences against children and Bill C-15 : a case law research project

By Nicholas Bala, Wendy Harvey and Hilary McCormack. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Research & Development Directorate, 1992. iv, 123 p. : Bibl. (Technical report / Canada. Dept. of Justice. Research Section ; TR1992-16e) MICROLOG 96-00402 (2 fiche)

This report summarizes and analyzes judicial decisions interpreting and applying the new provisions enacted by Bill C-15, as well as cases dealing with some other related legislative provisions, relating to sexual offenses against children. The report focuses on appellate court decisions and on decisions that deal with contentious issues or which are illustrative of broader trends in the caselaw. It also discusses recent Canadian jurisprudence on certain issues which are important to child sexual abuse cases and are governed by the common law. The provisions analyzed relate to such matters as sexual exploitation, juvenile prostitution, sexual assault, child witnesses, videotaped evidence, publication bans, expert evidence, hearsay and children's disclosure of abuse, similar-fact evidence, and Crown disclosure. Protection orders in the domestic violence context : a bibliography

By George Rigakos. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research & Statistics Directorate, 1993. iv, 28 p. (Technical report / Canada. Dept. of Justice. Research Section ; TR1993-13e) MICROLOG 96-00430 (1 fiche)

This bibliography serves as a preliminary aid to a literature review which will form part of the federal Dept of Justice's study into the effectiveness of judicial recognition orders in Canada. These orders, commonly called protection orders, are imposed where there are grounds to believe that an individual may damage or injure another person, property, spouse, or child; breach of the order is considered a summary conviction offense. The first part of the bibliography gives annotated citations of international articles relating to protection orders and pertinent research into police response to domestic violence. The second part is a listing of international legislation with provisions for a protection order. CA CI JU ND SA SS

Public-private partnering : discussion paper

Halifax : Deputies' Committee, Public-Private Partnering, 1995. 13 p.
MICROLOG 96-00361 (1 fiche)

The Nova Scotia government is exploring new and innovative ways to ensure high-quality services and modern infrastructure remain available and are enhanced. One such way is through public-private partnerships, already being initiated in such areas as transportation infrastructure. The government is considering expanding its partnering activities, and this discussion paper is intended to solicit public opinion on various matters related to public-private partnerships. It explains the rationale behind such partnerships, their potential risks and benefits, and challenges for public employees and organizations. The paper then outlines the guiding principles of the provincial government's partnering activities and a partnership strategy that includes a comprehensive policy framework, a human resources strategy, a financing infrastructure, and a strong focal point. The paper ends with a proposed action plan.

Radiation doses to technologists from radiotherapy equipment

By P.F. Hinrichsen, A. Houdayer and C. Keith Scott. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. xvi, 168 p. : ill., Bibl. (Report / Canada. Atomic Energy Control Board ; INFO-0504)
MICROLOG 96-00653 (2 fiche)

The goal of this research was to measure and compare the radiation doses received over a 12-month period by radiotherapy technologists while performing their normal duties using two types of radiotherapy machines: a cobalt-60 teletherapy unit and two medical accelerators. A further goal was to compare the dose registered at the neck and wrist with that at the waist (the nominal position of routinely-worn radiation monitors). The first part of this report presents a detailed study of the gamma-ray leakage field around the head of the teletherapy unit with the shutter closed. In addition, the investigators measured the neutron-induced activity in the machine components and room walls. This activity is due to the energy of the accelerators being above the photo-neutron threshold. The second part of the report presents the personal dosimeter measurements of the gamma-ray and neutron dose rates received by the technologists.

Rapport sur l'application de la procédure d'examen des plaintes déposées à la Régie régionale de la santé et des services sociaux de l'Outaouais pour l'année 1993-94

Régie régionale de la santé et des services sociaux de l'Outaouais (Québec). Direction des priorités. Service des relations avec la population. Hull, PQ : le Service, 1994. 18 p.

MICROLOG 96-00389 (1 fiche)

Ce document fait état de l'ensemble des rapports des plaintes reçues de chaque établissement dans la région. Il décrit les motifs des plaintes reçues et indique pour chaque type le nombre de plaintes reçues, rejetées sur examen sommaire, examinées, refusées ou abandonnées; les délais d'examen des plaintes; et les suites données après leur examen. On traite des centres locaux de services communautaires (CLSC), les centres d'hébergement et de soins de longue durée (CHSLD), les centres hospitaliers (CH) de soins de courte durée, les centres de réadaptation (CR), le centre hospitalier de soins psychiatriques Pierre-Janet, et le Centre de protection de l'enfance et de la jeunesse de l'Outaouais.

Rapports techniques sur les pommes de terre, 1993, vol. 6

Nouveau-Brunswick. Ministère de l'agriculture. Comité de coordination de l'industrie de la pomme de terre. Frédéricton : Ministère de l'agriculture, Comité de coordination de l'industrie de la pomme de terre, 1993. i, 139 p. : ill., Cartes

géogr., Bibl. L'éd. anglaise (Technical reports on potatoes...) : 96-00610/2.

MICROLOG 96-00607 (2 fiche)

Cette publication annuelle présente des rapports techniques sur les pommes de terre. Les rapports ont pour but de fournir aux agriculteurs et aux spécialistes agricoles un résumé des principaux résultats des projets de démonstration et de recherche appliquée sur les pommes de terre. On traite des sujets tels les suivants : la présence de pucerons, la surveillance aérienne des pucerons, la lutte contre les doryphores, services d'inspection et de vérification sur le terrain, essai d'espacements, essai de cultivars, et étude de peuplements de pommes de terre.

Les Rapports université-industrie en sciences et technologie

Par Jérôme Doutriaux et Margaret Barker. Ottawa : Industrie Canada, 1995. ix, 161, vii, 141 p. : Bibl. (Document hors-série / Canada. Industrie Canada ; 11) *Bilingue (The University-industry...).*

MICROLOG 96-00482 (4 fiche)

Cette étude contribue à mettre à jour et à améliorer notre compréhension des rapports université-industrie au Canada. Elle débute par un examen des travaux publiés sur la question à la fin des années 80 en corroborant certaines des premières conclusions de ces travaux par les constatations issues des études récentes et de certaines enquêtes. Ayant bénéficié récemment d'une bourse de recherche, les auteurs de cette étude ont pu examiner attentivement les stratégies régionales en matière de transferts de technologie. Dans ce rapport, ils insistent sur le fait qu'une gamme d'organisation, et non uniquement les universités et l'industrie, ont un rôle important à jouer dans les transferts de technologie et le développement économique local, en soulignant l'importance de la diversité des sources de financement et des stratégies et leur complémentarité souhaitable.

Rate design in a competitive environment

By J. Mack Wathen. Montreal : Canadian Electrical Assn, 1995. 7 p. *Presented at the Power of Change Conference, part of Electricity '95.*

MICROLOG 96-00199 (1 fiche)

This paper examines some of the types of innovative rate designs that utilities in the United States have used to meet some of the challenges of increasing competition. It discusses how one utility goes about developing special, customer-focused rates and then outlines characteristics of economic development rates, load retention/anti-bypass rates, cogeneration and self-generation deferral rates, distressed industry rates, load management rates (including time-of-use pricing and peak shaving rates), and special situation rates. Many of these rate structures are implemented through special contracts with individual customers, and the paper also discusses issues related to such contracts such as customer discrimination and confidentiality. Finally, the paper suggests future trends in utility pricing.

RBE of H-3 beta rays and CO-60 gamma rays at low and high dose rates

By D.P. Morrison, B.P. Smith and K.L. Gale. Ottawa : Atomic Energy Control Board, 1994. 55 p. : ill., Bibl. (Research report / Canada. Atomic Energy Control Board ; INFO-0486)

MICROLOG 96-00645 (1 fiche)

To establish the effective biological dose equivalence of radiations of different qualities, a correction factor is applied to reflect the relative effectiveness per unit dose with which particular radiations affect biological systems. A major determinant of this factor is the relative biological effectiveness (RBE) with respect to a standard reference radiation. This report describes work undertaken to pro-

vide data on the effect of dose rate on the RBE of tritium beta-rays, relative to X-rays from a cobalt-60 source, in human cell strains that differed greatly in their DNA repair capacities. The two separate biological endpoints measured assessed the responses to the exposures at different levels. The survival of colony-forming ability assessed the cellular ability to recover from radiation damage, while measurement of micronucleus induction provided an indication of the cells' ability to repair damage to DNA specifically.

Re-evaluating the thrust and torque measurement capability of the Mark I propulsion system for the DREA static test rig

By George D. Watt, Dartmouth, NS : National Defence, Research & Development Branch, Defence Research Establishment Atlantic, 1995, v, 54 p. : *ill.*, *Bibl.* (DREA technical memorandum / Defence Research Establishment Atlantic ; 95/209) MICROLOG 96-00713 (1 fiche)

Submarine propulsion testing with the DREA Static Test Rig in a 9-meter wind tunnel has been successfully implemented. This capability allows propulsion force measurements to be made when modelling a propeller operating in the behind-the-boat condition. This report re-evaluates data from the 1992 benchmark tests of the redesigned propulsion system for the test, following an initial assessment of low quality. Some of the data have systematic error or erratic behavior. The report identifies most of the reasons for these problems and demonstrates the repeatability of the remaining data compared to that achieved in open-water propulsion tests in a towing tank. The report also examines the effects of compressibility on the thrust and torque measurements, and indicates the consistency of theoretical predictions of compressibility effects compared to those present in the data.

Recent series capacitor applications in North America

S.A. Miske...et al. Montreal : Canadian Electrical Assn, 1995, 12 p. : *ill.*, *Bibl.* Presented at Electricity '95. MICROLOG 96-00158 (1 fiche)

This paper reports on the equipment used at three recent installations of series capacitors on North American transmission systems. The first installation is on the Hydro-Quebec 735-kilovolt system and involves twelve series capacitor banks for increasing system reliability and ensuring that stability is maintained during normal contingencies. Equipment described includes metal oxide varistors, bypass gap, damping circuit, and control/protection devices. The second involves series capacitors on four 735-kilovolt Hydro-Quebec lines to block direct currents from the Quebec-New Eng-

land 450-kilovolt direct current line. The third installation is the world's first and only multi-module thyristor-controlled series capacitor system. Each module, installed at the Bonneville Power Administration 500-kilovolt Slatt substation, comprises a capacitor, bidirectional thyristor valve, and varistor. Field test results for the three installations are included.

Recommended safety objectives, principles and requirements for mini-reactors

Canada. Advisory Committee on Nuclear Safety. Ottawa : Atomic Energy Control Board, 1991, 15 p. : *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0388(E)) MICROLOG 96-00640 (1 fiche)

This report reviews Canadian and international publications containing objectives, principles, and requirements for the safety of nuclear facilities in general, and nuclear power plants in particular, for their relevance to mini-reactors. It notes whether some prescriptive requirements for the shutdown, emergency core cooling, and containment systems of power reactors are considered appropriate for mini-reactors. The report refers to the Interorganizational Small Reactor Criteria Working Group views on this subject and makes recommendations with regard to how the objectives, principles, and requirements for the nuclear safety of mini-reactors should be based.

Règlement sur les pièces pyrotechniques à l'usage des consommateurs, rapport final

Par Shelley Trevethan, Wendy Gordon et Marie-Andrée Roy. Ottawa : Ministère de la justice Canada, Secteur du droit civil et gestion ministérielle, Direction générale de la recherche, de la statistique et de l'évaluation, 1995. v, 62 p. (Document de travail / Canada. Ministère de la justice. Section de la recherche ; WD1995-4f) L'éd. anglaise (Consumer fireworks regulations...) : 96-00446/1. MICROLOG 96-00447 (1 fiche)

Ce rapport décrit le déroulement du projet-pilote sur la lisibilité appliquée au Règlement sur les pièces pyrotechniques à l'usage des consommateurs. La lisibilité juridique est un aspect important de la réalisation de la conformité aux lois. La théorie moderne en la matière, souvent appelée observation volontaire, préconise la prise de mesures progressivement plus rigoureuses à l'égard de segments toujours plus résistants de la population réglementée. L'objet visé est d'atteindre la conformité au moyen des mesures les moins envahissantes possibles et au moindre coût.

CA JU ND SS

Règles budgétaires pour l'année scolaire, 1995-96 : commissions scolaires

Québec : Gouvernement du Québec, Ministère de l'éducation, Direction générale du financement et des équipements, 1995. 232 p. ISSN 1198-4988
ISBN 2-550-24516-4
MICROLOG 96-00621 (3 fiche)

En conformité avec ses responsabilités d'élaborer des règles budgétaires, ces règles comportent 2 volets, à savoir : les règles budgétaires de fonctionnement auxquelles s'ajoutent les règles budgétaires du service de la dette; les règles budgétaires des investissements. Pour chacun de ces 2 volets, le texte des règles budgétaires précise l'établissement des allocations, et les sources de financement. L'application des règles budgétaires permet de préciser en différentes étapes, lors de la transmission des paramètres d'allocation avant l'année scolaire et tout au cours de cette année scolaire jusqu'à l'analyse du rapport financier; le montant des subventions; le montant des dépenses à pourvoir par l'impôt foncier, ainsi que par les revenus autres que les subventions.

Rehabilitation of small hydroelectric stations : Ontario Hydro's experience to date

By G.B. Pollock and W.W. Hall. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Hydraulic Power Section, 1995. 13 p. : ill. Presented at Electricity '95.
MICROLOG 96-00085 (1 fiche)

Of Ontario Hydro's 69 hydroelectric generating stations, 34 have capacities under 10 megawatts and

are defined as small hydro. The small hydro stations have an average age of about 60 years and are typically situated in picturesque locations, many with powerhouse buildings with a heritage value. This paper discusses how Ontario Hydro has rehabilitated several of these stations while maintaining the heritage value of the structures. It notes problems with modifying powerhouse substructures to accommodate modern turbines while leaving the superstructures unaltered, and describes four small-hydro retrofits where site-specific features dictated different designs to achieve an up-graded station while preserving its heritage value. The four stations retrofitted were Big Chute (near Coldwater), Sidney (at Trenton), Seymour (at Campbellford), and Merrickville (in the village of the same name).

Les Relations fédérales-provinciales -- Rév.

Par Jack Stilborn. Ottawa : Bibliothèque du Parlement, Service de recherche, 1995. 18 p. : Bibl. (Bulletin d'actualité / Canada. Bibliothèque du Parlement. Service de recherche ; 93-10F) L'éd. anglaise (Federal-provincial relations) sur la même fiche. Révisé le 28 avril 1995.
ISBN 0-660-95064-2 GCE-E
no YM321/93-10-1995-05F
MICROLOG 96-00696 (1 fiche)

Les relations fédérales-provinciales influent sur la plupart des grandes activités du gouvernement au Canada et elles sont en évolution quasi constante. Ces changements trouvent principalement leur source dans l'élection de nouveaux gouvernements qui ont des priorités politiques nouvelles et une conception neuve du fédéralisme, dans l'environnement social et politique, qui suscite constamment de nouveaux problèmes et de nouvelles questions, et dans l'expérience de relations intergouvernementales de plus en plus complexes, qui requiert des ajustements sur le plan des politiques et des institutions. Dans ce bulletin, on fait état des événements survenus sur la scène fédérale-provinciale sous l'angle des enjeux et des tendances. On vise ainsi à prévoir les orientations probables des relations fédérales-provinciales et des institutions.

Renewing education, new directions : a foundation for excellence

Winnipeg : Manitoba Education & Training, 1995. iv, 70 p. ISBN 0-7711-1358-7
MICROLOG 96-00592 (1 fiche)

The purpose of this document is to provide the vision to guide kindergarten to Senior 4 schools and schooling in Manitoba. It outlines the guiding principles governing the mission of Manitoba Education and Training, the broad outcomes (academic, personal, social, career, and life management) of kindergarten to Senior 4 education, and describes the Manitoba curriculum development process, the types of curriculum documents developed and the elements integrated into curriculum, and provides information on reporting student marks and issuing diplomas and transcripts. The document then describes the revised requirements in Manitoba's four school programs: the English Program, Français Program, French Immersion, and Senior Years Technology Education. Appendices include a draft sketch of a mathematics curriculum framework of outcomes and standards, samples of educational outcomes, and a glossary.

Replacement of shipborne and rescue helicopters -- Rev.

By Michel Rossignol. Ottawa : Library of Parliament, Research Branch, 1995. 10 p. : *Bibl.* (Current issue review / Canada. Library of Parliament. Research Branch ; 94-3E) *Revised 11 April 1995. French ed. (Remplacement des hélicoptères...) on the same fiche.* ISBN 0-660-16156-7 CCG-P
no. YM32-1/94-3-1995-05E
MICROLOG 96-00699 (1 fiche)

Despite the end of the Cold War, the cancellation in November 1993 of the contract for the EH-101 helicopters, and cuts in the defence budget, discussion continues on the replacement of the Sea King shipborne helicopters and Labrador search and rescue helicopters of the Canadian Forces. This paper examines the reasons for these replacements and the options available.

Réponse policière à la violence familiale : examen du recours aux dispositions du Code criminel relatives aux armes à feu

Par Colin Meredith et Chantal Paquette. Ottawa : Ministère de la Justice Canada, Secteur des politiques et programmes ministériels, Sous-direction de la réforme du droit, de la recherche et du développement, 1991. iv, 64 p. (Document de travail / Canada. Ministère de la Justice. Section de la recherche ; WD1993-2f) *L'éd. anglaise (Police responses to domestic...) : 96-00444/1.* MICROLOG 96-00445 (1 fiche)

Ce rapport présente les constatations d'une étude préliminaire sur la fréquence avec laquelle les agents de police ont recours à certains articles du Code criminel portant sur les armes à feu lorsqu'ils interviennent dans des affaires de violence familiale. La première partie décrit brièvement le contexte de l'étude, donne un aperçu des textes législatifs pertinents et expose les raisons qui justifient la réalisation de l'étude. L'autre partie présente le résumé et les constatations.

Report of the Cypress Park Special Planning Commission

British Columbia. Cypress Park Special Planning Commission. Victoria : The Commission, 1995. 165 p. : *Bibl. Background (2 p.) laid in.* MICROLOG 96-00269 (2 fiche)

Cypress is British Columbia's most-visited provincial park. Cypress Bowl Recreation (CBR) holds a 50-year park use permit to operate a ski hill in the park. Both CBR and BC Parks are suing each other as a result of the ambiguity and vagueness of their existing agreements and deteriorated relationship over the past decade. The provincial cabinet directed a special commission to resolve the issues at Cypress. This report presents the results of the commission's consultations and studies. The report reviews the legal framework of the park and then discusses issues related to such matters as the conflict between conservation and recreational uses, CBR's redevelopment plans, the Park Master Plan, park administration, access rights, reclamation of damaged areas, summer operation, infrastructure, and hiking trails. The report ends with recommendations on park development. Appendices include a review of CBR's redevelopment proposal, a biophysical and recreation overview of the park, and provincial park policy documents.

Report of the Respite Rationalization Committee

British Columbia. Ministry of Social Services. Community Support Services Division. Respite Rationalization Committee. Victoria : The Committee, 1995. 31 p.
MICROLOG 96-00068 (1 fiche)

In this report, respite is defined as a family support service provided by the British Columbia Ministry of Social Services aimed at alleviating the parents of direct care of an identified child for an intermittent period of time for the purpose of rest or relief to the family. This report summarizes discussions on issues regarding the delivery of respite services to children, with the intent to develop recommendations for a service which makes sense and which considers respite in the context of the broader range of supports available to a child and his or her family. The report identifies certain issues that specifically relate to existing programs as they are currently delivered, then considers the issues of eligibility criteria, respite caregivers, and the transition to adult services. Finally, the report outlines models of respite used in other locations, recommends improvements to current programs, and outlines further actions that can be taken to address the issues discussed.

Report to the Social Policy Committee of the Provincial Cabinet

Classroom Issues Committee (Nfld.). St. John's : The Committee, 1995. iii, 45 p.
MICROLOG 96-00044 (1 fiche)

This report first presents an integrated service management model for coordination of service delivery in Newfoundland and Labrador schools. It then summarizes the findings of a committee with the mandate to examine the difficulties related to disruption of the classroom setting by students, the difficulties related to integration of special needs children in the classroom, issues related to the quality of work life in the teaching/learning situation, and government employment equity proposals. The committee made recommendations with respect to changes in procedures, approaches, policy, and/or legislation to address the issues examined. The appendix contains subcommittee background papers on the service management model, discipline, school violence, the child maltreatment reporting process, young offenders, professional development, integration, quality of work life, and employment equity.

Research on the application of Section 85 of the Criminal Code of Canada

By Colin Meredith, Sherilyn A. Palmer and Bruno Steinke. Ottawa : Dept. of Justice Canada, Corporate Management, Policy & Programs Sector, Research, Statistics & Evaluation Directorate, 1994. x, 50 p. : *Bibl.* (Working document / Canada. Dept. of Justice. Research Section ; WD1994-20e) *French ed. (Recherche sur l'application de l'Article 85...)* : 96-00560/1.
MICROLOG 96-00559 (1 fiche)

Section 85 of the Criminal Law Amendment Act requires imposition of a minimum term of imprisonment for each firearms offense, when firearms are used in the commission of an indictable offense. The objective of this report is to assemble and analyze several types of data concerned with the application and effectiveness of Section 85, with particular emphasis on the issue of sentencing. After an introduction outlining the provisions of Section 85, the report summarizes the empirical literature on mandatory minimum sentences, especially as those provisions concern firearms offenses. The report then presents statistics on Section 85 charges collected from selected federal and provincial systems and from the Statistics Canada Adult Court Survey. Finally, the report summarizes information obtained through interviews with selected police agencies, prosecutors, and judges, and reviews case law relevant to Section 85.

A Research project to encourage system-compatible design of end-use appliances

By Doug Dorr, Thomas S. Key and Gene Sitzlar. Montreal : Canadian Electrical Assn, 1995. 10 p. : *ill.*, *Bibl.* *Presented at Electricity '95.*
MICROLOG 96-00165 (1 fiche)

Ensuring that electronic appliances are compatible with the electric power system has significant benefits for both power producers and users. This paper describes a project sponsored by the Canadian Electrical Association and the Electric Power Research Institute to characterize the power compatibility of various types of electrical equipment and appliances, evaluate their susceptibility to power quality disruptions, and identify opportunities for enhanced immunity from power quality problems. The research reported focuses on lighting systems and switch-mode power supplies such as those used in computers. The paper ends with an analysis of the costs and benefits of improving appliance tolerance to the expected electrical environment.

Residential care regulation review : a discussion guide

Victoria : Ministry of Health & Ministry Responsible for Seniors, Steering Committee for Review of Residential Care Regulations, 1995. 13 p.
MICROLOG 96-00058 (1 fiche)

This discussion guide is meant to provide an overview of the work of the Steering Committee for Review of Residential Care Regulations in British Columbia and to encourage informed public participation in community forums regarding changes to provincial residential care regulations. Those regulations, which define the Ministry of Health and Ministry Responsible for Seniors expectations concerning the minimum acceptable quality of service to be provided to individuals in licensed residential settings, need to be updated to be brought into line with a rapidly changing society. Community forums for providing an opportunity to make suggestions to changes in the regulations are expected to start in September 1995. The guide outlines the forum procedures, the guiding principles of the Steering Committee, some issues for consideration at the forums, and the contents of the current and proposed adult care regulations.

Residual life evaluation method for transmission line conductors subjected to fatigue damage

Phuc Nguyen-Duy...et al. Montreal : Canadian Electrical Assn, Transmission Section, Transmission Line Refurbishment & Life Extension Session, 1995. 13 p. : *ill.*, *Bibl.* *Presented at Electricity '95.*
MICROLOG 96-00142 (1 fiche)

The objective of this study was to develop a method for evaluating the status of electrical conductors subjected to fatigue damage and to estimate their residual life. The proposed method is based on the correlation between the loss of ductility of the material subjected to cyclic loading and the fatigue-consumed life fraction. The approach put forward to confirm this correlation comprises four consecutive steps: determination of the tensile ductility of the conductor strands before the damage occurs; establishment of the fatigue curve of the strand; fatigue tests on the strands at different fractions of fatigue life; and determination of the residual tensile ductility of the tested strands. This paper presents the results of the study test program, performed on steel and aluminum strands of an ACSR 26/7 conductor. The end product of the study is a diagram containing all the necessary elements for estimating the residual life of conductors stressed by fatigue loading.

Residual stress measurement

J.O. Igwemezie...et al. ; prepared for Transportation Development Centre, Policy & Coordination, Transport Canada ; by Canadian Institute of Guided Ground Transport and Applied Rail Research Technologies, Inc. Montreal : The Centre, 1994. 2 v. : *ill.*, *Bibl.* (CIGGT report / Canadian Institute of Guided Ground Transport ; no. 93-4) *Contents: Vol. 1 : Report -- vol. 2 : Appendices.*
MICROLOG 96-00437 (5 fiche)

Manufacturing and heat treatment process to produce head-hardened rail with improved properties, while maintaining geometrical tolerances, often produce residual stress in excess of acceptable values. This may result in derailments. This report describes a research program undertaken to address this safety problem by developing a better understanding of residual stresses in rails, developing simplified methodologies for evaluating such stresses, and contributing to the development of residual stress quality control test methods. The program included tests on two rail samples from each of six manufacturers. The tests were based on the saw-cutting technique, known to provide a simple and effective way of evaluating residual stresses. The investigators also examined the chemical and

physical properties of the rails and performed linear elastic stress and fracture mechanics analyses to develop failure criteria for residual stresses in rails. CA ND SC TR

Retour de l'expérience de l'exploitation des centrales nucléaires

Canada. Comité consultatif de la sûreté nucléaire. Ottawa : Commission de contrôle de l'énergie atomique, 1995. iii, 16, iii, 15 p. (Rapport / Canada. Commission de contrôle de l'énergie atomique ; INFO-0567) *Bilingue (Feedback of operating experience...)*. MICROLOG 96-00691 (1 fiche)

Le retour d'expérience de l'exploitation des installations nucléaires vers les concepteurs, les fabricants, les exploitants et les organismes de réglementation est un moyen important d'assurer et d'améliorer la sûreté. Le Comité consultatif de la sûreté nucléaire de la Commission de contrôle de l'énergie atomique a examiné les moyens de retour d'expérience actuellement employés, leur efficacité et les améliorations qu'il y a lieu d'apporter. Cet examen a permis de constater que le besoin du retour d'expérience est bien reconnu chez les organismes qui contribuent à la sûreté des centrales CANDU et que les modalités actuelles sont généralement efficaces. Toutefois, des recommandations sont présentées dans les pages de ce document afin d'améliorer le processus. CA EN ND PW SC

Retrofit of SCR on 157 MW gas fired units

By W. Roy Penny, Para H. To and Peter D. Calder. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Thermal & Nuclear Power Section, Environmental Requirements Subsection, 1995. 17 p. : ill. *Presented at Electricity '95. On cover: Stone & Webster.* MICROLOG 96-00091 (1 fiche)

BC Hydro is in the process of implementing nitrogen oxide (NOx) controls on six 157-megawatt gas-fired power boilers at the Burrard Thermal Generating Station. This paper describes the boiler testing program executed to confirm the general NOx control approach required to meet the interim NOx emissions limit of 170 milligrams per cubic meter. The overall approach involved implementing a variety of combustion tuning techniques and testing NOx emissions at loads of 150 megawatts and at reduced loads. The paper then reviews the technical requirements of a selective catalytic reduction (SCR) system to be installed on the Burrard Unit 5 boiler to reduce NOx emissions to the prescribed limit of 35 milligrams per cubic meter or less. Finally, the paper provides some details of the selected SCR design and of the current status of the SCR retrofit project. BC CA EN SC

Return of investment for turbine control upgrades

By Patricia A. Cliff and Robert A. Weitendorf. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Thermal & Nuclear Power Section, Station Control & Instrumentation Subsection, 1995. 16 p. : ill. *Presented at Electricity '95.* MICROLOG 96-00097 (1 fiche)

This paper describes the control systems used in modern utility-class steam generator units. Such systems utilize distributed control system (DCS) technology and efficient high-pressure hydraulic actuators in three basic functional groups: automatic control, valve control, and overspeed protection. Optional functions include automatic turbine startup, rotor stress calculations, and turbine auto-synchronization. These DCS-based systems have significant advantages over older mechanical hydraulic control systems. The paper also discusses the benefits of upgrading these older systems and presents calculation methods for determining some of the cost savings that may accrue from a control system retrofit. Those methods enable estimation

of return on investment from increased unit availability, improved unit generation capability, and higher turbine efficiency resulting from turbine control system upgrading. CA EN PS SC

Review of human factors guidelines and methods

W. Rhodes... et al. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. viii, 259 p. : Bibl. (Report / Canada. Atomic Energy Control Board ; INFO-0543) MICROLOG 96-00672 (3 fiche)

This review examines the use of human factors guidelines and methods in high technology applications, with emphasis on application to the nuclear industry. The study methodology included a literature review and surveys of experts who indicated which guidelines were used and why they were favored. An annotated bibliography describes 33 of the most applicable guideline documents and indicates their applicability to the nuclear industry. The document also contains a bibliographic list of over 280 references. The appendix includes general summaries of ten human factors methods of analysis, including procedures, applications, and specific techniques. Each technique is rated for applicability and practicality. CA EN ND SC

Review of legal aid tariffs

R.L. Sloan Associates. Ottawa : Dept. of Justice, Research Section, 1990. vi, 113 p. (Technical report / Canada. Dept. of Justice. Research Section ; TR1991-2) MICROLOG 96-00414 (2 fiche)

This study documents the development of the tariffs administered by the ten provincial legal aid plans. The study only considers those tariffs which involve criminal matters. Following an introduction, the study is organized into 11 additional sections, ten of which describe the development of each provincial plan's tariff. These descriptive sections are generally structured to follow a standard format which provides a brief overview of the plan's tariff development and then a description of each version of the tariff, making relevant comparisons of different versions. These descriptions tend to emphasize the type of tariff used by the plan in terms of the degree to which the plan uses different types of fees and differentiating factors. Another focus of the descriptions is the fee increases introduced by a plan. The final section discusses trends in the similarities and differences among the tariffs and some key concepts used in construction and rationalization of legal aid tariffs. CA JU ND SA SS

Review of selected hydrogeologic and geophysical characterization methods for intact crystalline rocks

By K.G. Raven and A.C.F. West ; with contributions from: A.P. Annan, G.F. West. Ottawa : Atomic Energy Control Board, 1995. ix, 136 p. : ill., Bibl. (Research report / Canada. Atomic Energy Control Board ; INFO-0506) MICROLOG 96-00655 (2 fiche)

This study evaluates the ability of borehole hydraulic tests, seismic methods, and ground penetrating radar to remotely detect fractures in otherwise massive crystalline rock surrounding openings in the Canadian shield at depths of 500 to 1,000 meters. Detection of such fractures is likely to be an important component of site characterization studies to demonstrate the feasibility of geologic disposal of nuclear fuel wastes. The evaluators examined the theoretical basis of each method, completed simple scoping calculations for prescribed test cases, and reviewed available application and verification case studies in the international literature. The findings indicate the feasibility of detection of fracture zones or single fractures using the three methods evaluat-

ed, as well as their theoretical detection ranges. CA ND NR SC

A Review of the application of SF6 HV and EHV circuit breakers in Canada

By Daniel Péroquin and Jocelyn Tremblay. Montreal : Canadian Electrical Assn, Electrical Apparatus Section, Station Equipment Subsection ; Switchgear Subsection, 1995. 19 p. : ill., Bibl. *Presented at Electricity '95.* MICROLOG 96-00156 (1 fiche)

This paper reviews the history of high voltage circuit breaker technology, from bulk oil circuit breakers of the early 1900s to sulfur hexafluoride (SF6) breakers of the modern era. It focuses on the evolution of SF6 technology and its application to the low temperature conditions found in Canada, and includes information on SF6 properties, arc quenching techniques, types of operating mechanisms, behavior of SF6 at low temperatures, and the use of gas mixtures such as SF6 and nitrogen in circuit breakers. The paper then outlines special switching applications for SF6 breakers, the factors to consider in selecting high-voltage and extra-high-voltage SF6 breakers, standards and tests used in evaluating circuit breakers, and future possibilities for circuit breaker technology such as wider application of electronic components and synchronous closing. Review of the storage and disposal of health care records in British Columbia : report

By Shaun H. Peck. Victoria : Ministry of Health & Ministry Responsible for Seniors, 1995. iv, 32 p. : *Bibl.*

MICROLOG 96-00267 (1 fiche)

Health care records are kept on all of the approximately 3.7 million residents of British Columbia. In view of public concern about the storage and disposal of such records in the province, the health minister requested a review of health care record storage and disposal. This report presents the results of that review. In the introduction, the report describes five incidents of public exposure of health care records. The report then reviews procedures and legislation applicable to the storage and disposal of health care records, including arrangements for physical, operational, and technical security. It discusses related issues that apply to records management, the Freedom of Information and Protection of Privacy Act, issues related to health system regionalization, issues for discussion by the Health Professions Council, and issues related to electronic records. The report ends with recommendations intended to ensure confidentiality of health records information.

The Role of condition assessment in increasing boiler output and economically extending boiler life

By G. Nakoneczny. Montreal : Canadian Electrical Assn, 1994. 8 p. : *ill.* On cover: Babcock & Wilcox technical paper, BR-1569. Presented at Utility Thermal Plant Life Management Conference, part of Electricity '95.

MICROLOG 96-00190 (1 fiche)

This paper presents the approach used by Babcock & Wilcox for assessing the remaining life of power plant boilers and for considering options for upgrading and extending boiler life. The approach begins by defining the operating objective for the plant, such as the additional service life required, allowable emissions limits, and whether the plant is for baseload or cycling duty. The next steps involve a three-phase approach to condition assessment (pre-outage planning, inspection/testing during outage, post-outage testing and engineering analysis). The paper includes description of typical areas of failure and condition assessment procedures for key boiler components, condition assessment considerations for cycling operation, analysis of remaining life, and determination of the feasibility of upgrading the plant. Upgrades may include capacity increases and tighter control of emissions.

CA EN SC

The Role of welding in the life extension of turbine plant

By R. Hill and R. Conroy. Montreal : Canadian Electrical Assn, Engineering & Operating Division, 1994. 15 p. : *ill.* Presented at Utility Thermal Plant Life Management Conference, part of Electricity '95. On cover: Rolls-Royce Industrial Power Group.

MICROLOG 96-00189 (1 fiche)

Welding plays a very important role in maintaining and improving the integrity of turbine components. This paper describes the experience and philosophy of Parsons Power Generation Systems for the repair of turbine components using an approach that not only fixes the component but also addresses the root cause of the original failure, thereby preventing re-occurrence. The paper outlines repairs made to turbine cylinders, steam valve chests, turbine blade tip restraint mechanisms, and blade airfoils. It also describes rehabilitation and modifi-

cation of feedwater heaters and turbine rotors, and adopting modern materials and methods such as new high-strength steels and component designs to improve service life performance (notably for turbine blades).

Rotating classifier and spring load auto-adjustor improvements increase pulverizer and combustion efficiency

S.A. Bryk...et al. Montreal : Canadian Electrical Assn, 1994. 8 p. : *ill.* Presented at Utility Thermal Plant Life Management Conference, part of Electricity '95. On cover: Babcock & Wilcox technical paper, BR-1570.

MICROLOG 96-00193 (1 fiche)

Using low-sulfur coals in power plants designed for typical North American high-sulfur bituminous coals can lead to reduced pulverizer capacity and/or performance, which can reduce overall boiler capacity. Retrofitting of low-nitrogen-oxide burners without reducing effective combustion efficiency requires grinding the fuel to a smaller particle size. In both cases, pulverizers with rotating dynamic classifiers can be installed to address efficiency problems. This paper describes recent improvements in pulverizer and classifier design, including a dual-stage dynamic classifier for coal applications and the combination of spring load adjusters with a classifier to effectively increase the pulverizer working load at low outputs.

Safeguards for children in residential care : a review of the Nova Scotia Youth Training Centre & the Nova Scotia Residential Centre : a report

To the Minister of Community Services ; [submitted by] the Institute for the Prevention of Child Abuse. Toronto : The Institute, 1995. 117 p.

MICROLOG 96-00272 (2 fiche)

This report details the results of the review of two Nova Scotia child/youth residential care facilities regarding the adequacy of safeguards in place to protect children from all forms of abuse. The matters investigated by the review team included the kinds of safeguards currently in place at each facility, the effectiveness of those safeguards, whether existing safeguards require strengthening, and whether additional safeguards are needed. The team conducted the review through interviews with staff, administration, current and past residents of the facilities as well as their parents, consultants, and collateral agencies and professionals. It also examined numerous documents and reports and sought information from the Department of Community Services. The appendices contain a profile of Nova Scotia Residential Centre residents, staff training statistics, and policy statements.

La Santé de l'érable à sucre au Canada : résultats du Projet canado-américain d'étude du dépérissement de l'érable, 1988-93

D. Lachance...et al. Ottawa : Ressources naturelles Canada, Service canadien des forêts, Direction des sciences et du développement durable, 1995. iii, 24, 27 p. : *ill.*, *Cartes géogr.*, *Bibl.* (Rapport d'information / Service canadien des forêts ; ST-X-10 ISSN 1192-1064) *Bilingue* (Health of sugar maple in Canada...). ISBN 0-662-62002-X GCC-E no Fo29-33/10-1995

MICROLOG 96-00723 (1 fiche)

Le Projet canado-américain d'étude du dépérissement de l'érable est une entreprise conjointe du

Service canadien des forêts du ministère des Ressources naturelles et du United States Department of Agriculture Forest Service, qui a été lancée en 1988 dans le but de surveiller les changements dans l'état de la cime de l'érable à sucre. Le projet couvre 233 sites expérimentaux répartis dans l'est de l'Amérique du Nord, dans l'aire de distribution de l'érable à sucre. Ce rapport décrit l'état de santé de l'érable à sucre sur 62 sites expérimentaux canadiens entre 1988 et 1993; la moitié des arbres se trouvent dans des érabières et la moitié dans des peuplements non exploités.

Saskatchewan education indicators : kindergarten to grade 12 -- Update

Regina : Saskatchewan Education, Training & Employment, 1995. 41 p. : *Ill., Bibl.* ISBN 0-921291-31-0 MICROLOG 96-00594 (1 fiche)

This report provides information relating to the effectiveness of the Saskatchewan education system during the past year, using various kinds of indicator data. The report begins with a presentation of data on changes in Saskatchewan population and socio-economic trends, then gives information on the education system such as size, number of schools, student/teacher ratios, and long-term trends in educational levels of the population. Further sections of the report cover student aspirations and achievements; graduation and attendance rates; education of specific populations such as aboriginals, women, and people with disabilities; public perceptions of the educational system; public accountability; and educational spending.

Saskatchewan long-term integrated forest resource management plan

Regina : Saskatchewan Environment & Resource Management, 1995. viii, 271 p. : *Bibl.* On cover: Canada-Saskatchewan Partnership Agreement in

Forestry.

MICROLOG 96-00469 (3 fiche)

This document sets out Saskatchewan's integrated forest management plan, intended to allow for sustainable development of the province's forest resource. The first part of the document presents an overview of the forest resource, including its value (both economic and non-economic), distribution, and characteristics. It provides the administrative context for the plan, including the role of the plan in national and international forest resource agreements, and outlines the concept of integrated forest resource management, the goals of the plan, and the eleven strategies that are to be used to implement the plan. These strategies relate to such goals as renewable resource management, urban forestry, economic development, tourism, funding, inventory, and research. The second part consists of supporting material: a summary of the public consultation process involved in forming the plan, an assessment of forest resource issues, timber production scenarios, and the protected areas policy.

Saskatchewan's forest management policy framework

Regina : Saskatchewan Environment & Resource Management, 1995. 6 p. MICROLOG 96-00487 (1 fiche)

Over the past few years, Saskatchewan Environment & Resource Management has held public consultations on forest management. This initiative has resulted in a fundamental shift in how the province views the forest and makes decisions about its use. This booklet outlines the new policy direction for forest management in Saskatchewan, reflecting

a commitment to sustainable resource management and a balance of forest uses among economic, social, and cultural purposes, with the need to protect the long-term health of forest ecosystems. This commitment is reflected in eight strategic directions in the areas of forest ecosystem stewardship, sustainable use of forest resources, multiple benefits, environmental protection, public involvement, aboriginal participation, sustainable management of forest resources on private land, and improved decision-making and information management.

The Sawmill and planing mill industry of Newfoundland

By Peter M. Trelawny. St. John's : Natural Resources Canada, Canadian Forest Service, Newfoundland & Labrador Region, 1994. x, 64 p. : *Ill., Bibl.* (Information report / Canadian Forest Service, Newfoundland & Labrador Region ; N-X-294 ISSN 0704-7657) ISBN 0-662-22792-1 CCG-P no. Fo46-15/294E MICROLOG 96-00720 (1 fiche)

This report analyzes the sawmill and planing mill industry in the island of Newfoundland using the widely-applied structure, conduct, and performance framework. This framework is based on the premise that the structure of an industry influences the conduct of operators of firms within that industry, which in turn is assumed to influence the industry's performance. The report provides information on such matters as distribution of mills by size and technology, degree of industrial integration and product differentiation, pricing and production of lumber, operator characteristics, economic and technical efficiency of the industry, and the economic impact of the mills. The report concludes with recommendations for improving the industry problems identified in the analysis.

School district multiculturalism policies

Victoria : Ministry of Education, 1994. 43 p. MICROLOG 96-00056 (1 fiche)

This document is a compendium of multiculturalism policies in 21 British Columbia school districts, current as of March 1994. The policies listed cover a wide range of issues including multicultural curriculum development, in-service training, employment equity, non-racist working and learning environments, processes for dealing with propagandist or prejudicial conduct, and basic recognition of societal diversity. The intent of the document is to provide some useful models and options for implementing multiculturalism and anti-racism principles in school communities. For each district, the document gives the name and number of the policy and the date adopted (and amended, if applicable), describes the policy, and lists specific regulations and/or administrative procedures, if any.

Sedimentology and source-rock potential of the Lower Kaskapau Formation, Cenomanian-lowermost Turonian, northwestern Alberta

By K.E. Wallace-Dudley and D.A. Leckie. Ottawa : Natural Resources Canada, Geological Survey of Canada, 1995. 60 p. : *Ill., Maps, Bibl.* (Bulletin / Geological Survey of Canada ; 490) ISBN 0-660-15819-1 CCG-P no. M42-490E MICROLOG 96-00009 (1 fiche)

The Cenomanian to earliest Turonian (Upper Cretaceous) Kaskapau Formation in northwestern Alberta and adjacent British Columbia contains three sandstone bodies encased in shale: the Doe Creek, Pouce Coupe, and Howard Creek Members. The Doe Creek Member contains up to five sandstone bodies of which three produce hydrocarbons. This report describes the stratigraphy and regional geology of the study area and describes and interprets the ten subsurface facies of the Kaskapau Formation. It then details the sedimentary sequences and

lateral relationships of the facies of the three members in outcrop and assesses the potential of the lower Kaskapau as a source rock for hydrocarbon generation. The appendices contain core descriptions, with accompanying porosity measurements, and macrofaunal analyses of core samples.

Seismic assessment of the Pickering pressure relief duct

By A. Ghobarah. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. ix, 95 p. : ill., *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0548)
MICROLOG 96-00674 (2 fiche)

The pressure relief duct at the Pickering nuclear power plant is a special safety system designed to contain and direct outflow from the reactor buildings to the pressure suppression and containing systems in the vacuum building. The duct is a large elevated rectangular reinforced concrete structure supported on piers and frames. This report examines the structural response of the duct when subjected to earthquake ground motions. The study method included modelling of a representative section of the duct and using analytical simulations to determine the structure's dynamic characteristics and linear response. Additional inelastic nonlinear dynamic analysis provided the duct's response to severe levels of ground motion. The study determined the seismic withstand capacities of various components of the structural system and identifies the hierarchical progression of events at increasing levels of ground motion.

Seismic evaluation and upgrading of critical tower pile foundations in liquefiable soils

By B.C. Anderson, A.B. Good and M.K. Lee. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Transmission Section, Transmission Line Refurbishment & Life Extension Subsection, 1995. 28 p. : ill., *Bibl.* Presented at *Electricity '95*.
MICROLOG 96-00145 (1 fiche)

BC Hydro has been assessing and upgrading its facilities and implementing response alternatives to potential damage resulting from a major earthquake. This paper reviews the utility's seismic evaluation of its overhead transmission system, focusing on the Lower Mainland area where most of the tall critical river-crossing towers are located. The paper gives an overview of the geologic environment of the Lower Mainland and outlines the criteria used for assessing existing structures for their ability to withstand design seismic loads. It then describes the investigation and analysis methods used in the assessment, including geotechnical field tests, ground response analysis, determination of soil liquefaction potential, and dynamic analysis of structures and piles. Options for seismic upgrades are discussed and illustrated by the case of the Pitt River crossing, where tower foundations were reinforced with steel pipe piles.

Seismic reliability assessment methodology for CANDU concrete containment structures

By M.J. Stephens, H.P. Hong and M.A. Nessim. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. ix, 64 p. : ill., *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0550)
MICROLOG 96-00676 (1 fiche)

This report describes a study undertaken to develop a reliability-based methodology for the assessment of existing CANDU concrete containment structures with respect to seismic loading. The focus of the study was on defining appropriate specified values and partial safety factors for earthquake loading and resistance parameters. The preferred

method for seismic hazard analysis was the uniform hazard spectrum method. Material resistance data from various nuclear structures were reviewed and used to develop an approach for selecting equivalent material resistance values using available structure-specific data. Models for calculating element resistance from equivalent material properties were developed and incorporated into a reliability model and reliability analyses, focusing on earthquake loading, were conducted for test cases. Based on this, the parameters needed to implement the assessment methodology were defined.

Seismic response of the Pickering pressure relief duct to the 1985 Nahanni earthquake

By A. Ghobarah. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. vi, 30 p. : ill., *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0549)
MICROLOG 96-00675 (1 fiche)

This study examines the structural response of the Pickering nuclear power plant's pressure relief duct when subjected to the ground motions experienced during the 1985 Nahanni (Northwest Territories) earthquake. That earthquake has been suggested as providing ideal engineering design data for critical facilities in eastern North America. The study also estimates the possible impact of such an earthquake on the nuclear safety function of the duct. The analysis used structural models developed in an early study (fiche 96-00574). The investigators determined the response of the duct to earthquake ground motion on the basis of the estimated capacities of the various structural components of the duct.

Seismic upgrading of Seymour Falls Dam

N.N. Heidstra...et al. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Hydraulic Power Section, 1995. 24 p. : ill., *Maps, Bibl.* Presented at *Electricity '95*. On cover: *Klohn-Crippen*.
MICROLOG 96-00083 (1 fiche)

The Seymour Falls Dam is located about 18 kilometers north of Burrard Inlet in British Columbia. The dam is a composite structure consisting of a concrete buttress dam in the original river bed and an earthfill embankment dam to the west of the buttress dam. This paper begins with an overview of the seismic and geological characteristics of the dam site area. It then reviews the seismic assessments of the concrete and earthfill dams, identifies deficiencies, and outlines the measures required to upgrade the dams to be able to resist the maximum credible earthquake predicted for the area. The paper includes results of dam structural analyses and calculations of earthquake induced cyclic stresses on the dam foundations.

Sentences involving fines : feasibility study

By Robert G. Hann. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Law Reform, Research & Development Directorate, 1992. v, 145 p. : *Bibl.* (Technical report / Canada. Dept. of Justice. Research Section ; TR1992-20e)
MICROLOG 96-00416 (2 fiche)

This report documents the feasibility phase of a project exploring the use, nature, impact, and effectiveness of fines in Canada. Specific purpose of this phase were to help identify priority issues, collect information of value for understanding different specific issues, and identify the feasibility of undertaking further priority projects to address those issues for which data are currently unavailable. The bulk of the report summarizes results of interviews with criminal justice officials from the ten provinces and two territories. The interviews examined the attractiveness of fines as a sentencing option, the frequency with which fines are used, the unwarranted disparity in the use of fines, fine enforcement, and impacts of recent changes in fines-related legislation. An overall summary of the interview findings and recommendations based on those findings are also included.

Shallow seismic reflection investigation of bedrock and Quaternary strata in the Rouge River Valley, Toronto

By A.A. Mohajer, N. Eyles and J.I. Boyce. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. vi, 26 p. : ill., Bibl. (Report / Canada. Atomic Energy Control Board ; INFO-0557)

MICROLOG 96-00683 (1 fiche)

The investigators obtained over 1.5 kilometers of high-resolution shallow seismic reflection data along four profiles at various orientations within the Rouge River valley in eastern Metro Toronto. Seismic profiles were acquired across the projected strike of fault zones mapped in Quaternary deposits and bedrock outcrops exposed along the river. The aim of this work was to determine the subsurface geometry and lateral continuity of faults mapped in outcrop exposures, and to evaluate this information in light of tectonic and other proposed mechanisms of fault origin, within 7 kilometers of the Pickering nuclear station. This report presents the results of that investigation, including the processed seismic profiles and suggested interpretations of the origin of observed displacements.

The Social, economic and environmental value of groundwater in Canada, phase I : developing a conceptual model

Wayne B. Trusty & Associates Ltd. Ottawa : Environment Canada, Inland Waters Directorate, 1991. ix, 104 p. : ill., Bibl.

MICROLOG 96-00435 (2 fiche)

This report presents results from a study conducted as part of a wider study whose results will be essential to understanding the benefits of access to

uncontaminated groundwater relative to the costs of protecting groundwater sources and cleaning up existing contamination. The first phase of the study focuses on developing a conceptual model for estimating groundwater value in various defined uses (municipal, agricultural, residential, industrial, and indirect) and in aggregate for a given site. Specific tasks described in this report include a review of the applicable literature, development of the model, and a review of characteristics of groundwater use in the Waterloo, Ontario region to illustrate specific problems or aspects of the conceptual model. The model includes a groundwater use categorization system, techniques for estimating the value for each category, and suitable weighting procedures to develop composite value estimates.

L'objectif de ce rapport est de passer en revue et d'analyser les données destinées à évaluer les ressources et les besoins en énergie, ainsi que la production de déchets liés au cycle de vie de six matières d'emballage. L'étude est concentrée sur des données relatives à la situation au Canada et elle couvre trois questions principales : quelles sont les données qui devraient être recueillies et de quelle manière les considérations relatives à la profondeur et à l'ampleur de l'analyse, les raisons qui ont motivé l'analyse du cycle de vie et les ressources qui y sont affectées peuvent influencer sur les données à recueillir; de quelle manière la qualité des données peut-elle être évaluée et comment peut-on prendre en compte le caractère actuel, représentatif, variable et fiable des données; et, quelles sont les sources de données qu'il est approprié d'utiliser dans l'analyse du cycle de vie des emballages canadiens et quelle est leur applicabilité dans les diverses régions du pays.

The SPARK story

Science Council of British Columbia. Strategic Planning for Applied Research & Knowledge. Burnaby, BC : The Council, 1995. 53 p. : ill. MICROLOG 96-00046 (1 fiche)

The SPARK process began in 1988 as a means of sectoral strategic planning for British Columbia industries. SPARK committees were established to describe each sector's strengths and weaknesses and to identify ways in which science and technology could improve the sector's prospects. This report outlines the history of SPARK and summarizes the activities and achievements of SPARK committees in the following sectors: agriculture and food processing, aquatic resources and oceans, biotechnology, construction, energy, environment industries, forests and forest products, health industries, information technology, manufacturing and machinery, mining/minerals and metals, transportation, and cross-sectoral committees on international partnerships, taxation, funding, human resources, science and technology awareness, and marketing.

Sparse logical terms

By Andrew Fall. Burnaby, BC : Simon Fraser University, Laboratory for Computer & Communications Research, 1994. 8 p. : ill., *Bibl.* (Technical report / Simon Fraser University, Centre for Systems Science and Laboratory for Computer & Communications Research (B.C.) ; CSS/LCCR TR94-18) MICROLOG 96-00256 (1 fiche) (Available on fiche only)

This paper proposes a sparse representation for logical terms analogous to formalisms used for sparse matrices. For applications which manage terms containing many anonymous variables, this approach can provide a savings both in terms of storage space and unification time. The paper describes several variations of the representation which allow for schemes to enhance the expressiveness of terms and to incorporate finer degrees of uncertainty than that offered by variables. These variations permit a simple implementation of the required algorithms (such as unification and subsumption) in either a logic language or as an extension to a logic language, suitable for diverse applications such as taxonomic encoding, natural language processing in computational linguistics, and automatic configuration.

Specifications for human factors guiding documents

By W. Rhodes, I. Szlapetis and C. MacGregor. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. vi, 115 p. :

ill., *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0544) MICROLOG 96-00673 (2 fiche)

This report specifies the content, function, and appearance of three proposed human factors guiding documents to be used by the Atomic Energy Control Board and its licensees. The specifications were developed by examining the best documents identified in the report called Review of human factors guidelines and methods (fiche 96-00272) and a brief literature review. The best features and content were selected from existing documents and used to develop specifications for the guiding documents. The three documents specified are a higher level human factors process guide, containing general considerations and rationale regarding the administration of human factors analysis, design, implementation, and evaluation/testing activities; an activities guide describing those activities; and a guide giving information specific to the integration of human factors principles into the facility, control rooms, workstations, and equipment of Canadian nuclear facilities.

St-Maurice River PMF study

By D. Sparks and B. Massé. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Hydraulic Power Section, Hydraulic Structures Subsection, 1995. 21 p. : ill., *Bibl.* Presented at *Electricity '95*. MICROLOG 96-00071 (1 fiche)

The hydropower generation complex on the St-Maurice River in Quebec consists of eight power plants and nine reservoirs with a total installed capacity of 1,610 megawatts. The spillways and outlet structures in the complex have insufficient capacity for handling extreme floods such as the probable maximum flood (PMF). Recent studies on upgrading the complex and adding new power stations require up-to-date estimations of the PMF. This paper reviews the evolution of PMF studies for the St-Maurice since 1990, including the estimation of maximum snow accumulation, development of realistic temperature sequences for the snowmelt period, and consideration of a wide set of scenarios for PMF generation. The paper then presents the results of the latest PMF study, taking into account precipitation, probable maximum snow accumulation, critical temperature sequences, snowmelt, flood routing, and reservoir operation. Finally, it compares the results to those of previous studies.

State-of-the-art on power line de-icing

By J.-L. Laforte, J. Laflamme and M.A. Allaire.
Montreal : Canadian Electrical Assn, Engineering & Operating Division, Transmission Line Refurbishment & Life Extension, 1995. 19 p. : *Bibl.*
Presented at Electricity '95.
MICROLOG 96-00144 (1 fiche)

This paper presents a detailed review of the different de-icing techniques, already developed or under development, which could be applied to the conductors and wires of electric power lines. The review considered de-icing techniques used in such fields as air and rail transport, telecommunications, and electrical networks, and identifies over 30 techniques capable of removing ice and assuring anti-icing protection. The techniques include thermal, mechanical, passive, and other methods. The paper subjects these techniques to a comparative evaluation based on energy efficiency and practicability, and makes recommendations regarding the favored techniques for use on power lines.

Station based semi-adaptive auto-reclose design and operating experience

By K. Kuras. Montreal : Canadian Electrical Assn, Power System Protection Subsection, 1995. 20 p. : *Ill.* *Presented at Electricity '95. At head of title: Modern trends in digital protection and control protection, control and communication.*
MICROLOG 96-00122 (1 fiche)

TransAlta Utilities substation control designs have traditionally been based on the discrete relays concept. In recognition of the limits of discrete relay technology, the utility decided to experiment with computer-based technology that would enable implementation of much more complex and sophisticated control schemes. This paper describes the studies conducted at TransAlta substations to identify overvoltage problems and to implement solutions based on programmable logic controller (PLC) technology with the objectives of avoiding terminal overvoltages, power transfer optimization and an increased success rate of autoreclosing. The paper outlines the new system's design rules and criteria and includes short descriptions of the hardware involved and a review of the operating experience, benefits, and potential future applications of the PLC-based system.

Statistical review of pressure tube inspection data

By J.H. Parker and J.T. Smith. Ottawa : Atomic Energy Control Board, 1995. iv, 101 p. : *Ill.*, *Bibl.* (Research report / Canada. Atomic Energy Control Board ; INFO-0502)
MICROLOG 96-00651 (2 fiche)

This report presents results from statistical analyses of a database consisting of measurements of deuterium content made on Ontario Hydro reactor pressure tubes, along with the operational and manufacturing data available for each tube. The statistical analyses were performed to identify possible predictive relationships between deuterium in-

gress in service and various operational, manufacturing, and metallurgical variables. The analyses included a new approach to data analysis developed by Lyashenko and called empirical inference, which uses an information-theoretic measure of association to detect nonlinear functional relationships. This measure enables the determination of cluster of related variables. The cluster that included the deuterium variable was identified for further analysis using such techniques as nonparametric regression.

Steam generator tube fitness-for-service guidelines

By Jeffrey A. Gorman, David B. Lowenstein and John E. Harris. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program,

1995. xi, 285 p. : *Ill.*, *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0572)
MICROLOG 96-00694 (4 fiche)

This report characterizes the degradation mechanisms that could affect CANDU steam generator tubes, reviews design standards and safety criteria that apply to steam generator tubing in nuclear power plant service in Canada and internationally, and evaluates and describes in detail the fitness-for-service guidelines used for a variety of specific defect types in Canada and internationally in order to highlight the considerations involved in developing such defect-specific guidelines. The report then identifies existing procedures for defect assessment and disposition and compares and contrasts the approaches used in Canada and internationally for fitness-for-service guidelines for a variety of defect mechanisms. The strengths and weaknesses of these approaches are assessed. The report concludes with recommendations on approaches that may be adopted in developing fitness-for-service guidelines for use in the dispositioning of steam generator tubing defects in Canada.

A Strategic review of fisheries resources and management objectives : Stuart/Takla habitat management area -- Final draft

Otto E. Langer...et al. Vancouver, BC : Dept. of Fisheries & Oceans, 1992. xix, 186 p. : *Ill.*, *Maps*, *Bibl.* *Fraser River Action Plan.*
MICROLOG 96-00474 (3 fiche)

This report is organized as a quick reference document addressing issues of direct concern to continuing fisheries production in the Takla Habitat Management Area in central British Columbia. The cornerstone of the report is the fish habitat management plan, which summarizes and assesses the fisheries production plans and recommendations for fish and fish habitat protection for proposed logging developments. The plan also outlines other significant land-use issues, standard in-stream construction timing requirements, and water extraction approval requirements. The bulk of the plan is a detailed assessment of fisheries and land management issues discussed in terms of seven sub-units of the Area. Subsequent sections of the report provide detailed information on the life history, stocks, and spawning of the fisheries resources in the Area; describe the physiographic features, hydrology, and climatic conditions of the Area; and provide a broad overview of the resource development issues likely to influence fish management decisions.

Strategies for social regulations : the case of occupational health and safety regulation

By R. Brown. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Research & Development Directorate, 1991. v, 86 p. : *Bibl.* (Working document / Canada. Dept. of Justice, Research Section ; WD1991-15e) *French ed.* (*Stratégies pour une réglementation sociale...*) : 96-00667/2.
MICROLOG 96-00668 (1 fiche)

The typical regulatory approach to social problems is to promulgate legal standards that are enforced by inspectors who detect violations and attempt to bring about compliance. This report explores the limitations of conventional regulation and reviews alternative regulatory strategies, such as economic incentives and standards for organizational structure, that might be used to supplement it. The discussion is set in the context of occupational health and safety. Chapters of the report cover the goals of occupational health and safety regulation, the uses and limitations of conventional regulation, a review of the uses and limits of two types of incentives that could be used in the occupational health and safety arena (exposure fees and experience rating of workers' compensation assessments), organizational structure, the role of labor-management health and safety committees, and the role of two key members of management responsible for health and safety.

Stretching the tax dollar, meeting temporary administrative support needs : a cost comparison

Ottawa : Treasury Board of Canada, Secretariat, 1995. iv, 47 p. : *ill.*, *Bibl.* *French ed.* (*Faire plus avec l'argent des contribuables...*) : 96-00032/1.
MICROLOG 96-00033 (1 fiche)

This paper is an analysis of the delivery of short-term administrative support services for the federal government in the National Capital Region. The study was undertaken to determine under which conditions it is more economical to make (i.e. use in-house employees) or to buy (use private sector suppliers) such services. The study provides costs for the use of six employment processes: casuals, secondments, terms, deployments, and indeterminate appointments using open and closed competitions. The study focuses specifically on the activities usually found in jobs classified as clerk, secretary, and office composing equipment operator/typist. The cost findings are derived from applying the make-or-buy methodology to the actual ex-

periences and expenditures of six participating departments during 1993-94. Relevant statistics on employment and contracting are included.

Strong semantic systematicity from unsupervised connectionist learning

By Robert F. Hadley and Michael Hayward. Burnaby, BC : Simon Fraser University, Centre for Systems Science, 1994. 32 p. : *ill.*, *Bibl.* (Technical report / Simon Fraser University. Centre for Systems Science ; CSS-IS TR94-02)
MICROLOG 96-00245 (1 fiche) (Available on fiche only)

A network exhibits strong semantic systematicity just in case, as a result of training, it can assign appropriate meaning representations to simple and embedded sentences which contain words in syntactic positions they did not occupy during training. The experience of researchers indicates that strong systematicity in any form is difficult to achieve in connectionist systems. This paper describes a network which displays strong semantic systematicity in response to unsupervised training. In addition, the network generalizes to novel levels of embedding. Successful training requires a corpus of about 1,000 sentences, and network training is quite rapid. The architecture and learning algorithms are purely connectionist, but classical insights are discernible in the respect that complex semantic representations spatially contain their semantic constituents.

Structural challenges in renewing, altering and uprating existing transmission tower facilities

By W.C. Lo and G.D. Schildt. Montreal : Canadian Electrical Assn, Transmission Section, Transmission Line Refurbishing & Life Extension Subcommittee, 1995. 25 p. : *ill.* Presented at *Electricity '95*.
MICROLOG 96-00143 (1 fiche)

This paper presents three case studies illustrating BC Hydro's approaches in renewing, modifying, and upgrading existing power line structures. The first involves the uprating of operating capacity for a number of 500-kilovolt transmission lines, where tower raising was required to compensate for the greater sag at higher temperatures due to the greater current in the uprated line. The second involves raising double-circuit 138-kilovolt rigid towers and 500-kilovolt single-circuit guyed towers to provide sufficient clearance over a new highway. In the third case, structures supporting three 69-kilovolt lines crossing Burrard Inlet needed replacement due to severe corrosion. The paper describes the alternative structural additions considered and the final selection and construction.

Structural modifications to fish habitat to mitigate flow fluctuation impacts below two B.C. hydroelectric projects

By Carol Lamont. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Hydraulic Power Section, Environmental Subsection, 1995. 9 p. : *Bibl.* Presented at *Electricity '95*.
MICROLOG 96-00076 (1 fiche)

The Stave River flows into the Fraser River downstream from Mission, British Columbia. Hydroelectric development has restricted anadromous salmonids to the lower 3.5 kilometers of the river, and river flow fluctuations due to hydroplant peaking plus destruction of habitat during gravel removal operations during the 1950s have impacted the fisheries productivity of the river. This paper describes several recontouring and construction projects undertaken 1990-94 to improve the fish spawning and rearing capacity of the Stave River. These included an excavated spawning channel, gravel additions, and spawning beaches, plus implementation of flow agreements to eliminate the impacts of hydroplant peaking during spawning and incubation periods. The paper also describes a pilot channel project designed to provide trout spawning habitat at the Norns Creek alluvial fan below the Hugh Keenleyside Dam on the Columbia River.

Stuart-Takla watersheds : terrain and sediment sources

By June M. Ryder. Victoria : Ministry of Forests, Research Program, 1995. vi, 41 p. : *ill.*, *Maps*, *Bibl.* (Working paper / British Columbia. Ministry of Forests ; 03/1995) *Fold. maps not filmed*.
MICROLOG 96-00508 (1 fiche)

Concern over the potential impacts of logging on sockeye salmon in the Stuart-Takla watershed of British Columbia has led to initiation of a multi-agency project to study the effects of forest practices on fish production and aquatic environments. As the effects of logging and road construction on sediment input to streams are strongly affected by the erodibility and stability of local surficial materials, a terrain (surficial geology) map is an essential part of the database for such a project. This report reviews the bedrock geology, topography, and evolution of the landscape under glaciation of the Stuart-Takla watershed, and describes the terrain mapping methodology used in the project. It then defines and describes the types of surficial materials found in the watershed, including till and other glacier-derived material, the geomorphological processes affecting the landscape, and sediment sources encountered. The report concludes with consideration and recommendations for forest surface management.

Study of synthetic moorings for aid-to-navigation buoys

Submitted to: Transportation Development Centre, Policy & Coordination ; prepared by: L.N. Pussegoda, B.C. Menon. Kanata, ON : Fleet Technology, 1994. xi, 98 p. : ill., Bibl.
MICROLOG 96-00449 (2 fiche)

In this project, the investigators collected descriptions of the physical and mechanical properties of synthetic fiber ropes and terminations from manufacturers and suppliers. The ropes considered included conventional (e.g. nylon, polyester) ropes as well as those made from advanced fibers such as aramid and high-strength polyethylene. The data gathered were used to develop recommended practice for mooring line and termination selection. In the absence of information on long-term performance, selection criteria were based on the specific strength (strength/weight ratio) and strength/dollar value of unused rope. The investigators considered methods of improving the wear resistance of mooring ropes and identified alternative fittings and connections that eliminate corrosion. They also identified two types of mooring configurations that minimize abrasion of the synthetic rope in service.

Study tools for series compensated networks

By Pierre Lacasse, Pierre-Jean Lagacé and Jean Mahseredjian. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operation Section, 1995. 16 p. : ill., Bibl. Presented at Electricity '95. On cover: Insulation coordination and EMTP applications session.
MICROLOG 96-00110 (1 fiche)

The presence of nonlinear varistors in series compensated networks creates a major limitation in the traditional steady-state network analysis algorithms. A short-circuit analysis program is based on the assumption of completely linear fundamental frequency sequence networks and cannot account for the nonlinear conduction of the varistor. The first part of this paper reviews the development of a new fundamental frequency model for the series compensator and its incorporation in the Hydro-Quebec short-circuit analysis program for balanced and unbalanced faults. Another approach for short-circuit calculations is to use the EMTP program. The second part of the paper proposes a new varistor modelling technique that will allow the EMTP steady-state module to calculate the exact harmonic steady state of a network in a faulted condition. Hydro-Quebec's series compensated network is used as a test circuit for the proposed solution methods.

Summary of the Industry Canada proposed specification for meter data communications

By Avgvord Moise. Montreal : Canadian Electrical Assn, Metering Devices Performance Subsection, 1995. 24 p. : Bibl. Presented at Electricity '95.
MICROLOG 96-00173 (1 fiche)

This paper summarizes a proposed specification which defines end-device data presentation formats (likely to become a North American standard), data communication protocols for use with the ANSI Type II point-to-point optical interface, and Industry Canada supplementary requirements for meter approval of types for use in Canada. The end-devices can include gas, water, and electricity meters. The proposed specification is table-driven; all data and control information is collected into predefined structures called tables, grouped into two major classes: standard tables and manufacturer tables. Standard tables are grouped by function such as configuration, metrological register, display control, access security, time of use, load profile recorder, and user-defined tables. Manufacturer tables do not have any data structures defined by this specification.

Supplier relationships in the next decade

By B.H. Court. Montreal : Canadian Electrical Assn, 1995. 29 p. Presented at the Power of Change Conference, part of Electricity '95.
MICROLOG 96-00205 (1 fiche)

This paper begins with examining the concept of purchasing as a business process with such goals as ensuring a supply base and obtaining benefits from suppliers. It identifies the six basic elements of a purchasing strategy and outlines the process of strategic purchasing, which includes supply planning, supply positioning, reviewing supplier preferences, conducting a supply vulnerability analysis, defining the current supply market, and changing the market to the benefit of the buyer. The strategy is presented with reference to a supply planning model that includes the full spectrum of buyer/supplier relationships. Finally, the paper reviews how organizations can use both purchasing strategy and strategic purchasing concepts to benchmark

their purchasing organizations. The appendix provides details on supply positioning and partnership sourcing.

Survey of 1994 New Brunswick Community College graduates

Baseline Market Research. Fredericton : Dept. of Advanced Education & Labour, Planning Services Unit, Labour Market Analysis Branch, 1995. iv, 263, iv, 265 p. : ill. Bilingual (*Sondage des diplômés du...*). ISSN 1203-3472 ISBN 1-55137-570-2
MICROLOG 96-00466 (6 fiche)

Information gathered by surveying the graduates of N.B. training programs provides valuable feedback on their success in the labour market. This annual telephone survey begins with a profile of graduates, followed by an overview of the survey results, including summary tables. Factsheets for each college, cluster and program, as well as for each college in which a program is offered, follow. These factsheets describe the survey population, labour force results, employment, program evaluation, occupations and industries of employment, and reasons for unemployment.

Survey of geoscientific data on deep underground mines in the Canadian Shield

By K.G. Raven and I.D. Clark. Ottawa : Atomic Energy Control Board, 1994. ix, 182 p. : ill., Maps, Bibl. (Research report / Canada. Atomic Energy Control Board ; INFO-0503)
MICROLOG 96-00652 (2 fiche)

This report reviews geoscientific data available from deep underground mines in the Canadian shield to identify future geoscientific studies at selected candidate mines for use in evaluating the Canadian concept for disposal of nuclear fuel wastes. The investigators collected geological, geomechanical, hydrogeological, and geochemical data from 59 operating mines with openings below 500 meters depth. Data collection methods included reviews of published information, circulation of a questionnaire to mine operators, and analysis of groundwater samples from selected mines. The findings reveal the relationship of continuous groundwater inflow below 500-meter depths to the structural discontinuities in the host rock. The report also identifies candidate mines for recommended studies on such subjects as long-term stability of deep underground openings, hydraulic conductivity, and hydrogeologic communication and mixing.

Survey of organizations providing programs that assist prostitutes

By Robert Paiement. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Research & Development Directorate, 1991. iii, 115 p. (Working document / Canada. Dept. of

Justice, Research Section : WD1992-22e) *French ed. (Enquête sur les organismes...)* : 96-00502/2. MICROLOG 96-00501 (2 fiche)

This document consists mainly of a directory of organizations currently providing services to prostitutes. The directory is arranged by region (Pacific, prairie, Ontario, Quebec, Atlantic) and information for each organization includes name, address, telephone number, name of contact person, program description, type of clientele, services offered to prostitutes, number of prostitutes seen in 1990, and referral mechanism employed. The document also contains a summary of survey results, including statistics on the percentage of agencies serving various subgroups of prostitutes, types of difficulties encountered by service providers, types of services provided, and gaps in service delivery. Survey of students at ten law schools in Canada

By Colin Meredith and Chantal Paquette. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Research & Development Directorate, 1992. xi, 68 p. (Working document / Canada. Dept. of Justice, Research Section ; WD1992-19e) *French ed. (Sondage auprès des étudiants...)* : 96-00511/1. MICROLOG 96-00530 (1 fiche)

This report describes the conduct and findings of a survey of third-year law students, conducted with the broad objective of providing information about the representativeness of the law student population of Canada as a whole. Of particular concern was the extent to which four target groups (women, aboriginals, visible minorities, and the disabled) were present. The survey also sought to identify barriers to equitable access to legal education experienced by members of these groups, and to assist participating schools to ensure that their admission procedures, as well as their education and support programs, are attracting and retaining students from the target groups. Questions were included examining students' perceptions of the frequency and sources of discrimination occurring at law school. The appendix contains a copy of the survey questionnaire. Symposium international sur le traitement des eaux usées, Atelier sur l'eau potable, Congrès régional de l'est du Canada de l'ACQE, Atelier sur l'estimation des crues (GREHYS-CRSNG) : compte rendu 1994

Delisle, C.E. et Bouchard, M.A., eds. Ottawa : Environnement Canada, Région Québec, 1994. 730 p. : ill., *Bibl.* (Collection environnement / Université de Montréal ; vol. 2 hors série) *Les rapports sont dans la langue de présentation, français ou anglais (International Symposium on Wastewater...)*. ISBN 0-662-61459-3 GCC-E no EN 44-14/1994. MICROLOG 96-00326 (8 fiche)

Le symposium sur le traitement des eaux usées se veut un lieu de rencontre et de communication pour ceux et celles qui s'intéressent au domaine du traitement des eaux usées domestiques et industrielles, que ce soit au niveau de la recherche et de la conception, de la construction ou à celui de l'opération et de la gestion des ouvrages. Il est conçu pour favoriser la diffusion et l'échange des nouvelles connaissances entre chercheurs, ingénieurs, technologues, opérateurs, formateurs, et étudiants. L'objectif de l'atelier sur l'eau potable est de permettre aux intervenants techniques, spécialistes du domaine de l'eau potable de se rencontrer et d'échanger sur l'avancement technologique de cette spécialité. Les conférences mettent l'accent sur la qualité de l'eau potable, ozonation, filtration biologique, demande en chlore, sous-produits de désinfection, et filtration sur membranes, entre autres. L'atelier sur l'estimation régionale des crues présente les résultats d'une recherche portant sur l'estimation régionale des crues pour la région Québec-Ontario. Les responsables, le

Groupe de recherches en Hydrologie Statistique (GREHYS), sont des chercheurs provenant du secteur public et du milieu académique. Finalement, le congrès régional de l'ACQE vise à promouvoir l'échange d'informations scientifiques et techniques dans tous les aspects du domaine de la qualité de l'eau. CA EV ND PW QU SC

Systematicity revisited : reply to Christiansen and Chater and Niklasson and van Gelder

By Robert F. Hadley. Burnaby, BC : Simon Fraser University, Centre for Systems Science, 1994. 15 p. : *Bibl.* (Technical report / Simon Fraser University, Centre for Systems Science ; CSS-IS TR 94-01) MICROLOG 96-00241 (1 fiche) (Available on fiche only)

The author had presented a revision of the Fodor and Pylyshyn (1988) challenge to connectionism, founded on the systematicity and compositionality of thought and language. The revision distinguished four degrees of systematicity in terms of the capacity for linguistic generalization which an agent acquires through learning. In the same issue of the journal publishing that revision, two commentaries appeared in which Niklasson and van Gelder describe their connectionist experiments which straightforwardly satisfy the author's third degree of systematicity and in which Christiansen and Chater describe their experiments which satisfy that degree in a qualified fashion. The present paper explores the author's significant reservations about the claims made in those two commentaries. BC PR PS SC

Systèmes en développement, symposium des meilleures pratiques : compte rendu

Systèmes en développement, symposium des meilleures pratiques (1993 : Ottawa, Ont.). Ottawa : Bureau du vérificateur général du Canada, 1993. 128, 114 p. : ill. *Bilingue (Systems Under Development...)*. MICROLOG 96-00719 (3 fiche)

Pour répondre aux préoccupations du Comité permanent des comptes publics, le vérificateur général du Canada s'est engagé, dans son Rapport annuel de 1992, à procéder à une série d'examen sur l'élaboration des principaux systèmes informatiques au sein du gouvernement. Le Bureau et le Conseil du Trésor ont donc invité 150 hauts fonctionnaires et membres du secteur privé à un symposium, intitulé Systèmes en développement, meilleures pratiques, qui a eu lieu le 23 septembre 1993. Vous trouverez dans ce document les actes du symposium, notamment une allocution d'ouverture ainsi que les présentations des conférenciers et le rapport préliminaire. Vous y trouverez également le procès-verbal d'un panel, suivi d'une période de questions, qui terminait la journée. CA ND PA PS SC

Systems Under Development Best Practices Symposium : proceedings

Systems Under Development Best Practices Symposium (1993 : Ottawa, Ont.). Ottawa : Office of the Auditor General of Canada, 1993. 114, 128 p. : ill. *Bilingue (Systèmes en développement...)*. MICROLOG 96-00719 (3 fiche)

Pressures are increasing on government to improve service to the public in spite of opposing pressures to reduce costs. This volume documents the proceedings of the day the symposium was held on September 23, 1993. It includes opening remarks, the speakers' presentations and the preliminary report. Also included are the minutes of a concluding panel discussion on systems under development, followed by a question and answer period. CA ND PA PS SC

A TEM cell for electromagnetic pulse applications : design considerations and mechanical details (U)

By J.S. Seragelyi, R.G. Apps and J.A. Walsh. Ottawa : National Defence, Defence Research Establishment Ottawa, 1995. vii, 49 p. : *Ill., Bibl.* (Report / Defence Research Establishment Ottawa ; no. 1263)
MICROLOG 96-00054 (1 fiche)

Electromagnetic pulse (EMP) simulators are designed to emulate the intense EMP generated by a nuclear explosion and are used to evaluate the susceptibility of electronic systems to EMP effects. This report is concerned with the development of a small, coaxial type of EMP simulator intended for both routine testing and for research and development purposes. The report discusses the mechanical details and some electrical properties of a transverse electromagnetic (TEM) cell which produces a pulsed electromagnetic field with a peak value of 50,000 volts per meter with only insignificant deviations from an ideal double-exponential waveshape. The cell is fabricated in a modular format so that it can be removed and replaced with an extended taper to allow conventional measurements to be performed, thereby increasing the versatility of the cell. The cell design emphasizes the use of common construction materials and simple assembly techniques for cost reduction.

Teratogenic effects of ionizing radiation and chemical substances

By R. Narbaitz ; with the collaboration of M. Hincke and W. Ross. Ottawa : Atomic Energy Control Board, Regulatory Research & Support Program, 1995. vii, 38 p. : *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0509)
MICROLOG 96-00658 (1 fiche)

This study was conducted to establish the feasibility of an experimental plan to investigate the possibility of interaction between chemical teratogens and ionizing radiation. The chemical teratogen best suited for this study, cadmium, was chosen from among those substances to which workers at nuclear plants and nuclear medicine facilities are exposed most frequently. This report begins with a background review on teratogenesis by ionizing radiation, the toxicity and teratogenicity of cadmium, and the interaction of cadmium and radiation, as evidenced from studies reported in the literature. The report then discusses the advisability and feasibility of the proposed experimental plan, outlines its rationale, proposes an experimental design, and details the experimental methodology in which laboratory rodents will be used. The appendices include lists of chemicals used at nuclear facilities.

The Thermal evolution and timing of hydrocarbon generation in the Maritimes Basin of eastern Canada : evidence from apatite fission track data

By A.M. Grist, R.J. Ryan and M. Zentilli. Halifax : Dept. of Natural Resources, 1995. 11 p. : *Ill., Bibl.* In *Bulletin of Canadian petroleum geology* : vol. 43, no. 2, 1995.
MICROLOG 96-00548 (1 fiche)

The authors analyzed sandstone drill core and/or cuttings from six wells in the Gulf of St Lawrence and Cabot Strait using the apatite fission track method to assess the level of maturation in hydrocarbon-prone strata. This report reviews the stratigraphy of the Maritimes Basin and the analytical procedures used, and discusses the implications of the findings for the generation of hydrocarbons and coalbed methane in the Basin. Complementary information about the integrated thermal history of the Basin from vitrinite reflectance data is also discussed. Finally, the report presents thermal models of the fission track data and examines whether these models are consistent with a history of exhumation of basin strata since late Permian time.

Three Sisters Dam, modifications and performance

By L.J. Courage. Montreal : Canadian Electrical Assn, 1994. 23 p. : *Ill., Maps Presented at Dealing with Hydraulic Power Plant Rehabilitation, part of Electricity '95.*
MICROLOG 96-00182 (1 fiche)

Three Sisters Dam impounds the Spray Reservoir south of Canmore, Alberta. Flows from the reservoir are regulated through a small power plant at the toe of the dam. The dam has experienced abnormally high foundation leakage since its completion in 1951, and has a history of related sinkhole activity. This paper describes the modifications and maintenance undertaken since 1951 to enhance the structure against leakage and to avoid internal erosion of the foundation due to piping. It includes description of the geological and geotechnical conditions at the dam site, and of studies conducted to evaluate a range of options such as installing an upstream blanket or a foundation cutoff wall. Finally, the paper describes modifications to the dam spillway, long-term monitoring of leakage and voids, and reservoir operation procedures to handle the probable maximum flood.

A Training guide for laboratory analysis of forest tree seeds

By D. George Edwards and B.S. Wang. Victoria : Natural Resources Canada, Canadian Forest Service, Pacific Forestry Centre, 1995. x, 64 p. : ill., Bibl. (Information report / Pacific Forestry Centre : BC-X-356 ISSN 0830-0453) *With financial assistance from the Canada-British Columbia Partnership Agreement on Forest Resource Development, FRDA II.* ISBN 0-662-23407-3
MICROLOG 96-00001 (1 fiche)

Seed testing provides a means of estimating the value and potential performance of seedlots irrespective of their provenance, collection method, and subsequent handling. The primary aim of seed testing is to assess the quality of a seedlot so that its value for seedling production can be calculated. Seed tests are carried out under standardized conditions using standard procedures, so that results should be comparable to those produced at other testing facilities. This report is intended as a guide to training forestry sector personnel in the basics of laboratory analysis of tree seeds. It includes procedures for sampling in the field and laboratory, the purity test, weight determination, germination testing, moisture content testing, quick tests for seed viability, and interpretation and application of seed test results. Exercises and worksheets are provided throughout the document.

Transmission line controlled switching

K. Froehlich...et al. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operating Section, Power System Reliability Subsection, 1995. 14 p. : ill., Bibl. *Presented at Electricity '95.*
MICROLOG 96-00125 (1 fiche)

Energizing of long, no-loaded transmission lines often causes significant overvoltage. Countermeasures include preinsertion resistors or surge arresters. A more sophisticated alternative is controlled switching, which requires determination of the optimal switching moment. This paper describes the theory and practice of controlled switching and the development of a suitable algorithm, hardware, and software for recognizing and analyzing the voltage signal across the circuit breaker and predicting the optimal future switching moments by extrapolation of the data required. The developed algorithm predicts optimal closing moments hundreds of milliseconds ahead of a possible tripping signal for the breaker. Implementation included designing a microprocessor-supported device which provides controlled switching in all three phases independently. The paper includes results of bench tests and simulation tests.

The University-industry relationship in science and technology

By Jérôme Doutriaux and Margaret Barker. Ottawa : Industry Canada, 1995. vii, 141, ix, 161 p. : Bibl. (Occasional paper / Canada. Industry Canada : 11) *Bilingual (Les Rapports université-industrie...)*. MICROLOG 96-00482 (4 fiche)

This paper updates and improves our understanding of university-industry relations in Canada. It begins with the volume of literature produced on this topic in the late 1980s and strengthens some of the initial, and perhaps, intuitive conclusions of this literature with findings from recent studies and some surveys. Benefiting from recent scholarship, the paper places significant emphasis on regional approaches to technology transfer. It insists that a variety of organizations, not just universities and industry, have important roles to play in technology transfer and local economic development, and suggests that both different sources of funding and approaches are important and should be complementary.

Power Plant Rehabilitation, part of Electricity '95.
On cover: TransAlta Utilities.
MICROLOG 96-00180 (1 fiche)

This paper describes the upgrading of the Number 3 generating unit at the Kananaskis Power Development hydroelectric plant, located 65 kilometers west of Calgary. The original plant was built in 1913 with two 4.5-megawatt units, and a third 11.25-megawatt unit was added in 1951. The advent of newer turbine designs and other technological advances prompted a study of the economic feasibility of upgrading some or all of the generating units at the plant. The study revealed that only a repowering of the third unit would be justifiable. The paper reviews the economic evaluation and budgeting process for the upgrade project, the disassembly of the old turbine and preparation of the new installation, the installation of speed governors and other controls, and the operating results with the new unit.

Upgrading generator protection using digital technology

By Charles J. Mozina. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Power System Planning & Operating Section, 1995. 18 p. : ill., Bibl. Presented at *Electricity '95*. MICROLOG 96-00120 (1 fiche)

This paper reviews the reasons why utilities as well as non-utility generators should consider upgrading the electrical protection of their electric generators to meet today's standards. It specifically outlines the risks assumed in eight functional areas where the protection of generators 20 years old (or more) is inadequate. These areas include negative sequence (unbalanced current) protection, 100% stator ground fault protection, dual level loss-of-field protection, inadvertent (accidental) generator energizing, VI fuse loss protection, sequential tripping, generator breaker failure, and generator breaker flashover protection. The paper also summarizes the need to provide generator oscillographic monitoring, and discusses the advantages of digital versus conventional technology for such an upgrade program.

The Use of the insanity defense in British Columbia : a quantitative and qualitative analysis

By James R. Ogloff. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Research & Development Directorate, 1992. iv, 60 p. : Bibl. (Technical report / Canada. Dept. of Justice. Research Section ; TR1992-2e)
MICROLOG 96-00401 (1 fiche)

While the insanity defense has a long history in Canada, very little empirical attention has been paid to the practical aspects of its implementation. This report attempts to remedy some of that deficiency by outlining how the insanity defense is used in British Columbia. To fully describe the process by which the insanity defense is employed, the author reviewed Forensic Psychiatric Services referrals for 1989 and interviewed key personnel such as Crown and defense counsels, forensic psychiatrists, and forensic psychologists. Results presented and discussed include the frequency with which the insanity defense is raised, the type of behavior or evidence generally employed to raise the defense, the stage in judicial proceedings when the defense is raised, the duration of insanity assessments, the type and severity of crimes for which the defense is raised, and information about those remanded to the Forensic Psychiatric Institute for evaluation.

Use of various habitat types by nesting ducks on islands in the St. Lawrence River between Montréal and Trois-Rivières

By Luc Bélanger and Denis Lehoux. Ottawa : Environment Canada, Canadian Wildlife Service, 1995. 26 p. : ill., Bibl. (Occasional paper / Canadian Wildlife Service ; no. 87 ISSN 0576-6370) ISBN 0-662-22982-7 CCG-P no. CW69-1/87E MICROLOG 96-00221 (1 fiche)

The freshwater portion of the St. Lawrence River between Montreal and Trois-Rivières has 224 islands, many of which provide nesting habitat for waterfowl. This report presents results of a survey conducted to describe the use of those islands by dabbling ducks and to assess the role of the habitat characteristics (such as area, plant cover, and degree of human activities) in the selection of the islands by the ducks. The survey also intended to compare the value of the islands as waterfowl nesting sites and to identify those islands of highest priority for conservation efforts. The report ends with some recommendations for conservation strategies, integrated management of agricultural practices on the islands, and construction of artificial islands using material dredged from the St. Lawrence Seaway channel.

Using migration counts to monitor landbird populations : review and evaluation of current status

By Erica H. Dunn and David J. Hussell. Ottawa : Canadian Wildlife Service, 1995. 46 p. : ill., Bibl. French ed. (*Utilisation des dénombrements migratoires...*) : 95-06730/1. In *Current ornithology* : vol. 12, 1995.
MICROLOG 96-00008 (1 fiche)

This paper summarizes current knowledge about the use of migration counts to monitor populations of landbirds, evaluates that knowledge, and clarifies what still needs to be learned. The review focuses on the status and future of migration monitoring in North America. It discusses how a migration count is defined, describes the migration data counting methods along with their advantages and drawbacks and the ways in which they can be standardized, and reviews methods of analyzing migration count data. The paper then assesses the usefulness of migration counts in providing information about bird populations and examines the future of migration monitoring in North America.

Utility repowering options using natural gas

By Manfred Klein. Montreal : Canadian Electrical Assn, Thermal & Nuclear Power Section, Environmental Requirements Subsection, 1995. 16 p. : ill., Bibl. Presented at *Electricity '95*. MICROLOG 96-00094 (1 fiche)

A large number of Canada's fossil-fuelled utility units will need major maintenance or upgrading over the next decade to allow for continued operation. Where sufficient supplies of natural gas are available, there are significant engineering, environmental, and economic benefits to the use of gas fuel in thermal power plants. This paper compares the air pollutant emissions from various types of thermal plants, including coal, oil, and gas-fired plants and plants with combined cycles. It then discusses the availability of natural gas in Canada, the state of existing utility generating units, and general options available for upgrading or repowering these units. The paper describes repowering options using natural gas, including gas turbine combined cycle, supplementing the existing boiler (hot windbox repowering), supplemental heat recovery steam generator repowering, feedwater heating, and parallel repowering with combined cycle.

Value-based benefit-cost of local DSM

By Victor Stein. Montreal : Canadian Electrical Assn, Power Resource Planning & Operation Subsection, 1995. 11 p. : ill., Bibl. Presented at *Electricity '95*. MICROLOG 96-00108 (1 fiche)

This paper discusses the value-based benefits and costs of demand side management (DSM) in the context of local electricity resource planning. The analysis considers the effect on local customer interruption cost as a result of DSM and the deferment in need for local transmission and distribution upgrades. The study methodology employs the Ontario Hydro VERA model to simulate customer interruption costs expected from all statistically relevant contingencies of bulk transmission facilities serving downtown Toronto, for alternative electricity demand scenarios and load flows foreseen in the years 1995 to 2015. The paper assesses the life cycle and cash flow benefits and costs of DSM from the perspectives of the electric utility, the DSM-participating and non-participating customers, and society as a whole.

Verbalisation, séance de verbalisation sur l'événement

Québec : Gouvernement du Québec, Ministère de la santé et des services sociaux, Direction générale de la coordination régionale, 1994. 31 p. MICROLOG 96-00266 (1 fiche)

La séance de verbalisation sur l'événement est un moyen simple mais efficace d'aider à atténuer les réactions de stress manifestées sur les lieux d'un sinistre. Elle permet aussi d'atténuer, voire éliminer, les réactions de stress qui perdurent à la suite de l'événement. Afin de faciliter votre animation, on présente quelques consignes et les phases d'une séance de verbalisation sous forme de fiches. Vous trouverez, en annexe du guide d'animation, trois suggestions de modèle que peut prendre une séance de verbalisation, elles sont destinées aux jeunes et s'appliquent bien aux groupes-classes : un bulletin de nouvelles; un journal collectif; un droit de parole.

Verifying safety properties of discrete event control systems expressed in temporal logic via algebraic Petri net analysis

By Paul Freedman. Montreal : Centre de recherche Informatique de Montréal, 1993. 27 p. : ill., Bibl. (Collection scientifique et technique / Centre de recherche Informatique de Montréal) (Rapport technique / Centre de recherche Informatique de Montréal ; CRIM-93/08-09) ISBN 2-921316-10-2 MICROLOG 96-00005 (1 fiche)

In discrete event dynamic systems, the control problem is viewed as the interaction between the controller and the controlled process. The controller receives feedback messages from the process, and as circumstances dictate, sends command messages to the process in order to change its behavior. Of particular importance to the control systems engineer are issues related to system safety, and many safety properties take the form of qualifications about events which give rise to changes in state. This report suggests that such safety properties are most easily verified when reformulated as reachability questions about an associated Petri net model. The report shows how such verification may be performed algebraically using the incidence matrix of a Petri net, with the temperature control of a water tank and boiler used as an illustrative example.

Victim impact statements in Canada, vol. 1 : evaluation of the Victoria project

Focus Consultants. Ottawa : Dept. of Justice Canada, Policy, Programs & Research Sector, Research & Development Directorate, 1990. xxv, 233 p. (Working document / Canada. Dept. of Justice, Research Section ; WD1990-3a) *French ed. (Déclaration de la victime...vol.1...)* : 96-00735/3.
MICROLOG 96-00730 (3 fiche)

The Victoria Police Department's Victim Impact Statement (VIS) Project (1985-87) was an attempt to demonstrate a police- and interview-based model of gathering and presenting victim impact information for use by criminal courts in Victoria. This report begins with introductory chapters on the Victoria and other VIS projects, the historical background of VIS projects, and the perceived benefits and drawbacks of VIS. The evaluation of the Victoria project included VIS victim interviews, court observations, and content analysis of the victim statements. The findings reported include a profile of VIS victims, the effects of VIS on victim participation in and satisfaction with the justice system, a comparison of VIS victims with a group of crime victims not involved in the VIS project, victim attitudes toward the VIS project, types of usage of the VIS made by Crown counsel, and the impact of VIS on sentencing patterns.

Victim impact statements in Canada, vol. 2 : evaluation of the Calgary project

By Judith Muir. Ottawa : Dept. of Justice Canada, Policy, Programs & Research Sector, Research & Development Directorate, 1990. xx, 139 p. (Working document / Canada. Dept. of Justice, Research Section ; WD1990-4a) *French ed. (Déclaration de la victime...vol.2...)* : 96-00732/2.
MICROLOG 96-00729 (2 fiche)

After an introduction on recent initiatives undertaken to provide additional services to crime victims, notably the use of victim impact statements, this report describes the Calgary Victim Impact Statement Project and presents the results of its evaluation. The Project featured a mailout/mailback system whereby victims of crimes filled out short forms that dealt with their physical injury, property loss/damage, financial loss, and personal impact. The Project evaluation included interviews with 275 victims and comparison of participants' responses with those of nonparticipants with regard to such issues as attitudes toward service provided, the service delivery mechanism, and their participation and satisfaction with the justice system. Other issues discussed in the report include the impact of victim statements on sentencing decisions and the use of the statements by justice agents and Crown prosecutors.

Victim impact statements in Canada, vol. 4 : evaluation of the Winnipeg project

R.L. Sloan Associates. Ottawa : Dept. of Justice Canada, Policy, Programs & Research Sector, Research & Development Directorate, 1990. xxiv, 152 p. (Working document / Canada. Dept. of Justice, Research Section ; WD1990-6a) *French ed. (Déclaration de la victime...vol.4...)* : 96-00733/2.
MICROLOG 96-00734 (2 fiche)

The Winnipeg Victim Impact Statement (VIS) Project was a court-based program initiated in 1986 which created a procedure by which victims of certain crimes could inform the court of the physical, financial, and emotional impact of the crime. After an introduction on crime victim initiatives in various jurisdictions and issues raised by VIS, this report describes the Winnipeg project and presents results of a project evaluation. The research design consisted of a longitudinal study of 466 cases as they proceeded through the Winnipeg criminal justice system. The findings presented include victim profiles, victim experiences with the VIS project, the degree of duplication of VIS information with other information received by the court, victims' motivation to complete a VIS, victims' views of the criminal justice system and of sentencing, victim-offender relationships, and the use of VIS in court.

Victims' needs and services in Nova Scotia research project

By Christopher Murphy. Ottawa : Dept. of Justice Canada, Corporate Policy & Programs Sector, Research & Development Directorate, 1991. vii, 60 p. : *Bibl.* (Working document / Canada. Dept. of Justice, Research Section ; WD1992-3e) *French ed. (Projet de recherche...)* : 96-00526/1.
MICROLOG 96-00529 (1 fiche)

The purpose of this study was to provide research data and information with a view to helping develop services for Nova Scotia crime victims, both within the criminal justice system and the community. This report summarizes the major findings of the study and makes recommendations that identify problem areas and solutions. The study addressed the following issues: identification of the service needs of crime victims; determining the degree to which existing services fulfill those needs; distinguishing priorities for funding development of community-based victims' services; and describing alternative strategies for delivering such services. Research methods included a literature review, structured interviews with victims' service representatives, and surveys of community, government, and criminal justice agencies. The report includes a separate chapter on service needs of special victims (e.g. of domestic violence, sexual abuse).

Violence against women with disabilities : a service needs assessment

Toronto : Ontario Women's Directorate ; Ministry of Community & Social Services ; Office for Disability Issues, 1993. xiv, 133 p. : *Bibl.*
MICROLOG 96-00286 (2 fiche)

This study is intended to contribute to the Ontario government's policy on program development process with respect to the accessibility, appropriateness, and effectiveness of services for women with disabilities who have experienced violence in community settings. The study presents results of a literature review undertaken to identify significant findings and trends, and results of a service needs assessment survey of service providers and of women with disabilities. In addition to questionnaires, the survey also conducted community consultations to provide an opportunity for disabled women and service providers to meet and discuss their respective concerns. The survey findings include a profile of respondents, reports of experiences of women with disabilities, discussion of the role of services, and discussion of the need for awareness, information, and education. Appendices include an annotated bibliography and summaries of questionnaire responses.

Visibility and ambient aerosols in southwestern British Columbia during REVEAL : application of analytical techniques for source apportionment and related visibility impacts of the REVEAL fine particulate optical and scene data

By Sara Pryor and Douw G. Steyn. Victoria : Ministry of Environment, Lands & Parks, Air Resources Branch, 1994. 196 p. : *ill.*, *Bibl.* *On cover: BC Environment, fine particulates.* ISBN 0-7726-2284-1
MICROLOG 96-00314 (3 fiche)

The REVEAL (REgional Visibility Experimental Assessment in the Lower Fraser Valley) program collected detailed data on visibility and fine particulates, providing information so that sources contributing to airborne particulates could be identified and quantified, and so that factors involved in visibility reduction could be understood. This report presents the results of the application of multivariate statistical techniques to the REVEAL particulate data, both to the measurements of the components of light extinction and measurement of the mass and speciation of ambient aerosols. Techniques used in this study include principal components analysis and Procrustes target analysis. The results indicate how visibility degradation occurs and provide a preliminary view of the sources of particulates in the Lower Fraser Valley. BC EV PR SC

A Water management strategy for balancing water uses in the Rideau Canal

By B. McClennan, P. Rae and K. McGonegal. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Hydraulic Power Section, Environmental Subsection, 1995. 20 p. : *ill.* *Presented at Electricity '95.* MICROLOG 96-00078 (1 fiche)

The Rideau Canal system in eastern Ontario was originally constructed for navigation purposes in 1832. Water uses of the canal have since increased dramatically and now include hydropower, fish and wildlife use, flood abatement, water supply, and recreational uses. This paper summarizes parts of a multidisciplinary study on water management policies for the Rideau Canal system, examining hydropower operations along with other operating objectives. The study included public input from water users and major stakeholders in the Cataract and Rideau basins, simulation modelling of the water resources system, and investigations of various single-purpose water management policies. The paper discusses the study results with special reference to hydropower as well as the results of evaluation of integrated policies. CA EN EV ON SC

Wind and ice load maps on transmission line design

By Tsoi-Ching Yip and Heather Auld. Montreal : Canadian Electrical Assn, Engineering & Operating Division, Transmission Section, Line Design Section, 1995. 11 p. : *Bibl.* *Presented at Electricity '95.* MICROLOG 96-00129 (1 fiche)

The Canadian Standards Association standard C22.3 for overhead systems introduced the wind and ice load maps developed by the Atmospheric Environment Service as part of the standard's chapter on reliability based design. This paper describes the procedure used to derive those two maps, discusses the data source and data analysis scheme, and identifies sources of uncertainty or error in the data. The values shown on the wind map are 50-year return period extreme wind speeds, while values on the ice load map are 50-year return period equivalent radial ice amounts for glaze ice caused by freezing precipitations only. The glaze ice amounts assume a 25-millimeter diameter conductor and are derived from the model developed by Chaîne and Skeates, 1974. The design values are regionally representative ones for sites ten meters above flat ground with fairly open exposure. CA EN PS SC

Women's equality in Canada : progress in implementing the Nairobi Forward-Looking Strategies for the Advancement of Women, January 1992 to April 1995

Ottawa : Status of Women Canada, 1995. vi, 92 p. : *Bibl.* *French ed. (L'Égalité des femmes au Canada...)* : 96-00726/4. *Adoption of the Declaration and the Platform for Action of the Fourth World Conference on Women (216 p.) laid in.* MICROLOG 96-00727 (4 fiche)

This document consists of fact sheets that review the progress Canada has made from 1992 to 1995 in implementing the strategies adopted at the 1985 Third World Conference on Women. Each fact sheet is organized in the following manner: a paragraph introducing the issue; a summary of what the Conference strategies say about the issue; current information on how the Canadian government is addressing the issue in partnership with the provinces and territories; if appropriate, a section detailing Canada's international initiatives on the issue; and a list of bibliographic references. The fact sheets are arranged by broad topic, such as institutional and political structures, legal issues, work and family, employment, economic policies, health, human environments, education, gender discrimination and violence, women with special needs, peace, and international and regional cooperation. The Power of regulation : competition and regulatory change. MICROLOG 96-00204 (1 fiche)

Power plant life management. MICROLOG 96-00187 (2 fiche)

Rate design in a competitive environment. MICROLOG 96-00199 (1 fiche)

Recent series capacitor applications in North America. MICROLOG 96-00158 (1 fiche)

A Research project to encourage system-compatible design of end-use appliances. MICROLOG 96-00165 (1 fiche)

The Role of condition assessment in increasing boiler output and economically extending boiler life. MICROLOG 96-00190 (1 fiche)

Rotating classifier and spring load auto-adjustor improvements increase pulverizer and combustion efficiency. MICROLOG 96-00193 (1 fiche)

Supplier relationships in the next decade. MICROLOG 96-00205 (1 fiche)

Telecom infrastructure leasing. MICROLOG 96-00148 (1 fiche)

Telecommunications opportunities for electrical utilities. MICROLOG 96-00154 (1 fiche)

Three Sisters Dam, modifications and performance. MICROLOG 96-00182 (1 fiche)

Transformer insulation aging : a review of the state of the art. MICROLOG 96-00163 (1 fiche)

Transition from rate design to competitive pricing. MICROLOG 96-00211 (1 fiche)

Canadian Electrical Assn. Conductor & Hardware Subsection

Hydro-Québec's experience with anti-galloping pendulums. MICROLOG 96-00139 (1 fiche)

Canadian Electrical Assn. Conductor & Hardware Subsection (cont'd)

Modelling of single conductor and damper vibration. MICROLOG 96-00174 (1 fiche)

Canadian Electrical Assn. Construction & Commissioning Subsection

Genesee Generating Station, unit 1 : construction and commissioning. MICROLOG 96-00098 (1 fiche)

Operating experience with low NOx burners at New Brunswick Power Belledune Station. MICROLOG 96-00089 (1 fiche)

Canadian Electrical Assn. Corporate Resources Division

Calgary Integrated Telecommunications Network (CITN). MICROLOG 96-00210 (1 fiche)

Panel presentation on the future of the electric utility industry in Canada : annual Corporate Resources and Customer Services conference, the Power of Change. MICROLOG 96-00196 (1 fiche)

Partnerships : labour/management approaches. MICROLOG 96-00202 (1 fiche)

The Power of Change, for a panel discussion on "the power of competition". MICROLOG 96-00197 (1 fiche)

Canadian Electrical Assn. Customer Services Division

Calgary Integrated Telecommunications Network (CITN). MICROLOG 96-00210 (1 fiche)

Panel presentation on the future of the electric utility industry in Canada : annual Corporate Resources and Customer Services conference, the Power of Change. MICROLOG 96-00196 (1 fiche)

Partnerships : labour/management approaches. MICROLOG 96-00202 (1 fiche)

The Power of Change, for a panel discussion on "the power of competition". MICROLOG 96-00197 (1 fiche)

Canadian Electrical Assn. Distribution System Planning Committee

Electrical Distribution System Planning Conference : proceedings. MICROLOG 96-00177 (4 fiche)

Canadian Electrical Assn. Electrical Performance of Insulators Committee

Development of phase-to-phase spacer for 275-kV transmission lines in Hokkaido Electric Power Co., Inc. MICROLOG 96-00107 (1 fiche)

Performance of insulation coatings under contamination and icing conditions. MICROLOG 96-00126 (1 fiche)

Canadian Electrical Assn. Engineering & Operating Division

Automatic meter reading and POWERPLUS (TM) services : concept to implementation. MICROLOG 96-00172 (1 fiche)

B.C. Hydro's experience with refurbishing 500 kV series capacitor banks. MICROLOG 96-00159 (1 fiche)

Parsons Power Generation Systems approach to life extension of steam turbines. MICROLOG 96-00186 (1 fiche)

The Role of welding in the life extension of turbine plant. MICROLOG 96-00189 (1 fiche)

Update on distribution automation plans at B.C. Hydro. MICROLOG 96-00150 (1 fiche)

Canadian Electrical Assn. Environmental Requirements Subsection

Decommissioning of a coal fired generating station with reference to the environmental codes of practice for steam electric power generation, decommissioning phase. MICROLOG 96-00176 (1 fiche)

Experiences with Department of Fisheries and Oceans' no net loss guiding principle at hydroelectric developments in Newfoundland. MICROLOG 96-00077 (1 fiche)

How do you get value for money from environmental work during fossil power plant rehabilitation projects? MICROLOG 96-00195 (1 fiche)

Mercury mitigative measures related to hydroelectric reservoirs : the La Grande Complex experience. MICROLOG 96-00079 (1 fiche)

Canadian Electrical Assn. Environmental Requirements Subsection (cont'd)

NOx optimization on Alberta Power's and TransAlta Utilities's Sheerness Unit no. 2. MICROLOG 96-00090 (1 fiche)
 Retrofit of SCR on 157 MW gas fired units. MICROLOG 96-00091 (1 fiche)
 Structural modifications to fish habitat to mitigate flow fluctuation impacts below two B.C. hydroelectric projects. MICROLOG 96-00076 (1 fiche)
 Utility repowering options using natural gas. MICROLOG 96-00094 (1 fiche)
 A Water management strategy for balancing water uses in the Rideau Canal. MICROLOG 96-00078 (1 fiche)

Canadian Electrical Assn. Environmental Subsection

See Canadian Electrical Assn. Environmental Requirements Subsection

Canadian Electrical Assn. Equipment Rehabilitation Subsection

Diagnostic testing and repair of Hollingsworth Generating Station's unit one. MICROLOG 96-00087 (1 fiche)

Canadian Electrical Assn. High Voltage Cables Subsection

Extra high voltage cable sheath protection system using "elbow type surge arresters" developed by Hydro-Québec. MICROLOG 96-00138 (1 fiche)

Canadian Electrical Assn. Hydraulic & Rotating Electrical Equipment Subsection

Enhancement of insulation systems with extended use of corona resistant materials. MICROLOG 96-00074 (1 fiche)
 Extensive use of computational fluid dynamics in the upgrading of hydraulic turbines. MICROLOG 96-00088 (1 fiche)
 Grand Rapids : turbine upgrading and repair of unit 1. MICROLOG 96-00086 (1 fiche)

Canadian Electrical Assn. Hydraulic Power Section

Design, installation and maintenance of stator wedging systems for hydrogenerators. MICROLOG 96-00072 (1 fiche)
 Environmental assessment requirements and process for hydroelectric rehabilitation in Ontario Hydro. MICROLOG 96-00178 (1 fiche)
 Flood action plans. MICROLOG 96-00181 (1 fiche)
 An Integrated hydrometric network for B.C. Hydro. MICROLOG 96-00080 (1 fiche)
 The Lesotho Highlands Water Project : an example of complex international cooperation. MICROLOG 96-00075 (1 fiche)
 Rehabilitation of small hydroelectric stations : Ontario Hydro's experience to date. MICROLOG 96-00085 (1 fiche)
 Seismic upgrading of Seymour Falls Dam. MICROLOG 96-00083 (1 fiche)
 Studies and field tests of ice cover effects on the Yukon River. MICROLOG 96-00081 (1 fiche)

Canadian Electrical Assn. Hydraulic Structures Subsection

Lake Robertson Hydroelectric Project : construction of a roller compacted concrete dam. MICROLOG 96-00082 (1 fiche)
 St-Maurice River PMF study. MICROLOG 96-00071 (1 fiche)

Canadian Electrical Assn. Insulation Coordination Subsection

Modelling of induction motors in the EMTP using existing synchronous machine models. MICROLOG 96-00109 (1 fiche)
 Power electronics applications using the EMTP. MICROLOG 96-00111 (1 fiche)

Canadian Electrical Assn. Line Design Subsection

 Field testing of SAFE foundations. MICROLOG 96-00133 (1 fiche)
 Wind and ice load maps on transmission line design. MICROLOG 96-00129 (1 fiche)

Canadian Electrical Assn. Metering Devices Performance Subsection

Summary of the Industry Canada proposed specification for meter data communications. MICROLOG 96-00173 (1 fiche)

Canadian Electrical Assn. Metering Section. Customer Value Through Metering Innovations Session

Portable wireless metering. MICROLOG 96-00171 (1 fiche)

Canadian Electrical Assn. Overhead Line Electrical & Underground Cables Subsection

Harmonization of international standards for high voltage self-contained fluid filled cables. MICROLOG 96-00137 (1 fiche)
 A New generation of electronically controlled pumping plants for HPLF cables. MICROLOG 96-00135 (1 fiche)

Canadian Electrical Assn. Power Resource Planning & Operation Subsection

Decision support system for generation scheduling. MICROLOG 96-00114 (1 fiche)
 Evaluation of the capacity value of a windfarm including the correlation between wind and demand. MICROLOG 96-00118 (1 fiche)
 Margins for uncertainties in Hydro-Québec's short-term operations planning. MICROLOG 96-00117 (1 fiche)
 Value-based benefit-cost of local DSM. MICROLOG 96-00108 (1 fiche)

Canadian Electrical Assn. Power Resource, Transmission & Stations Planning, Operation & Reliability Subsection

Field testing : modeling of speed governing systems for hydraulic turbines. MICROLOG 96-00106 (1 fiche)

Canadian Electrical Assn. Power System Planning & Operating Section

Avoided operating costs in thermal generating systems. MICROLOG 96-00115 (1 fiche)
 NUG reliability implications in a composite generation and transmission system. MICROLOG 96-00102 (1 fiche)
 Study tools for series compensated networks. MICROLOG 96-00110 (1 fiche)
 Upgrading generator protection using digital technology. MICROLOG 96-00120 (1 fiche)

Canadian Electrical Assn. Power System Planning & Operating Section. Electrical Performance of Insulators Committee

See Canadian Electrical Assn. Electrical Performance of Insulators Committee

Canadian Electrical Assn. Power System Planning & Operating Section. Protection Subsection

See Canadian Electrical Assn. Power System Protection Subsection

Canadian Electrical Assn. Power System Protection Subsection

Adaptive relaying for ground fault protection of a distribution network. MICROLOG 96-00123 (1 fiche)
 Artificial neural network based protection of transformers. MICROLOG 96-00124 (1 fiche)
 High speed phase segregated line differential relay. MICROLOG 96-00116 (1 fiche)
 Overcurrent protection co-ordination : a modern approach for modern devices. MICROLOG 96-00121 (1 fiche)
 Station based semi-adaptive auto-reclose design and operating experience. MICROLOG 96-00122 (1 fiche)

Canadian Electrical Assn. Power System Reliability Subsection

Composite system reliability evaluation and probabilistic planning : B.C. Hydro's practice. MICROLOG 96-00103 (1 fiche)
 Local integrated resource planning of a large load supply system. MICROLOG 96-00104 (1 fiche)
 A Monte Carlo based method for establishing reserve margin criteria. MICROLOG 96-00105 (1 fiche)

Canadian Electrical Assn. Power System Reliability Subsection (cont'd)

Transmission line controlled switching. MICROLOG 96-00125 (1 fiche)

Canadian Electrical Assn. Power Transformer Subsection

Large quadrature boosters, with particular reference to a 2000 MVA 400/400+ -j80kV unit built for the NGC in UK. MICROLOG 96-00162 (1 fiche)

Canadian Electrical Assn. Protection, Control & Substations Subsection

Adaptive applications for microprocessor based distribution and transformer protection systems. MICROLOG 96-00168 (1 fiche)
 Application of a new concept for a compact series capacitor scheme for distribution networks. MICROLOG 96-00166 (1 fiche)
 Gas insulated switchgear and switches for application at medium voltages. MICROLOG 96-00167 (1 fiche)

Canadian Electrical Assn. Rotating Machines Subsection

Brushgear diagnostics project overview. MICROLOG 96-00073 (1 fiche)
 Evaluation of self-lubricating bushing materials. MICROLOG 96-00084 (1 fiche)

Canadian Electrical Assn. Station Control & Instrumentation Subsection

Continuous emission monitoring system. MICROLOG 96-00096 (1 fiche)
 Return of investment for turbine control upgrades. MICROLOG 96-00097 (1 fiche)

Canadian Electrical Assn. Station Equipment Subsection

Economic assessment of HVDC links. MICROLOG 96-00160 (1 fiche)
 Induced current switching development work for the application of ground interrupter switches on the Hydro-Quebec H.V. system. MICROLOG 96-00157 (1 fiche)
 A Review of the application of SF6 HV and EHV circuit breakers in Canada. MICROLOG 96-00156 (1 fiche)

Canadian Electrical Assn. Switchgear Subsection

Induced current switching development work for the application of ground interrupter switches on the Hydro-Quebec H.V. system. MICROLOG 96-00157 (1 fiche)
 A Review of the application of SF6 HV and EHV circuit breakers in Canada. MICROLOG 96-00156 (1 fiche)

Canadian Electrical Assn. Task Group on Transmission Cable Standards

Harmonization of international standards for high voltage self-contained fluid filled cables. MICROLOG 96-00137 (1 fiche)

Canadian Electrical Assn. Telecontrol & Telecommunications Section

Power system applications for B.C. Hydro's new Energy Management System. MICROLOG 96-00149 (1 fiche)

Canadian Electrical Assn. Thermal & Nuclear Power Section

A.L. Cole PCB contamination clean-up. MICROLOG 96-00093 (1 fiche)
 Application of computational fluid dynamics (CFD) to coal fired utility boilers. MICROLOG 96-00095 (1 fiche)
 Control system retrofits to improve plant efficiency. MICROLOG 96-00099 (1 fiche)
 The Environmental approvals process in Alberta. MICROLOG 96-00101 (1 fiche)
 Evaluation of Westinghouse Fast Gen II Robotics inspection. MICROLOG 96-00191 (1 fiche)
 Fossil plant life management : metallurgical considerations. MICROLOG 96-00192 (1 fiche)
 Life assessment of structural systems of thermal generating stations at Ontario Hydro. MICROLOG 96-00188 (1 fiche)
 Life assessment process. MICROLOG 96-00185 (1 fiche)

Canadian Electrical Assn. Thermal & Nuclear Power Section (cont'd)

Life assessment study : essential in charting future operational plans at Battle River 1 and 2. MICROLOG 96-00184 (1 fiche)
 Life cycle management, Nova Scotia Power Inc. MICROLOG 96-00183 (1 fiche)
 Metallographic methods for creep life assessment of plant components. MICROLOG 96-00194 (1 fiche)

MICROMEDIA'S FAMILY OF

Canadian Reference Sources

Canadian Index

Three indexes in one: news, business and general periodicals. Current subject and name indexing for articles from 10 daily newspapers and 600 periodicals.

Canadian Index on CD ROM: CBCA OnDisc

Over 2 million citations from the past ten years of the predecessors of *Canadian Index*, plus thousands of informative abstracts.

Full text newspaper articles: CNI Clips

Complete copies of articles marked as Clips in the *Canadian Index*.

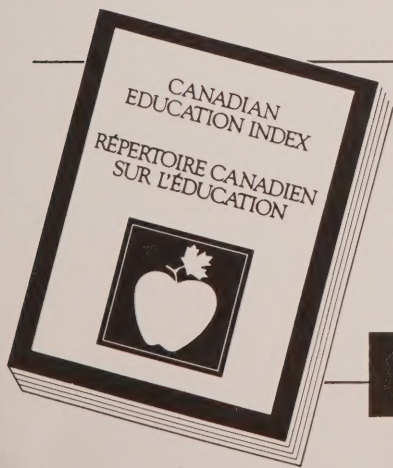

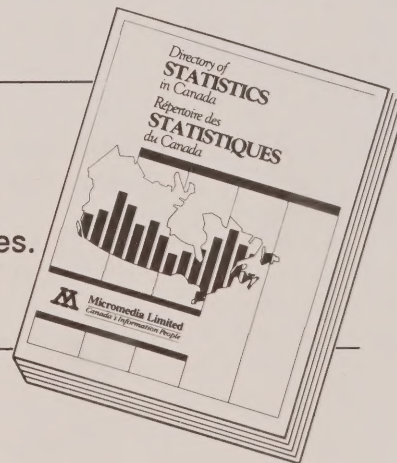

Government publications and research

Current Canadian government reports, indexed and abstracted in the *Canadian Research Index* and available through the *Microlog* clearinghouse service.

Statistics

The only reference guide available to Canadian statistical data sources.

Education

Indexing and abstracting of current Canadian research in education, supported by a document delivery service.
